Mathematics Curriculum for Primary Schools (Basic 4–6)

The new *Mathematics Curriculum for Primary Schools (Basic 4–6)* is standards-based, which means that the Ministry of Education wants to place learning at the heart of every classroom and ensure that every learner receives quality education. Quality education should be accessible to everyone, without exception, so that the human capital needs of our country can be met.

This Teacher’s Guide clearly sets out the learning areas recorded in the curriculum, how they should be taught and how they should be assessed. It provides a set of core competencies and standards that learners should know, understand and demonstrate as they progress through the content standards and phases.

*Mathematics Curriculum for Primary Schools (Basic 4–6)* promotes the fundamental belief of the curriculum that education should be inclusive and gender-responsive within the context of learning-centred teaching methods, so that every learner can participate and enjoy learning.

The role of the teacher is vital to make these books work for the intended purpose – to teach the core competencies and values, to make learning happen and thereby improve learning outcomes.

Rationale for Primary Mathematics

Mathematics forms an integral part of our everyday lives. It is a never-ending creative process that serves to promote discovery and understanding. We consider Mathematics to be vital to the country’s future development.

To provide quality Mathematics education, teachers must facilitate learning in the Mathematics classroom. This will provide the foundations for discovering and understanding the world around us and provide the basics for further studies in this field. This Teacher’s Guide will help you to guide learners to understand how Mathematics can be used to explain what is occurring, predict how things will behave and analyse causes and origins of things in our environment. It considers the desired outcomes of education for learners at the basic level, in terms of the new curriculum. In order to ensure that the learners are mathematically and technologically literate, Mathematics ought to be taught using hands-on and minds-on approaches that learners will find as fun and will remember for the rest of their lives.
Philosophy

The Ministry of Education promotes two basic philosophies:

<table>
<thead>
<tr>
<th>Teaching philosophy</th>
<th>Learning philosophy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• An effective Mathematics education should be inquiry-based.</td>
<td>• Mathematics learning is an active contextualised process of constructing knowledge based on learners’ experiences rather than acquiring it.</td>
</tr>
<tr>
<td>• It must provide learners with opportunities to expand, change, enhance and modify the ways in which they view the world.</td>
<td>• Learners are information constructors who operate as researchers.</td>
</tr>
<tr>
<td>• It should be pivoted on learner-centred Mathematics teaching and learning approaches that engage learners physically and cognitively in the knowledge-acquiring process in a rich and rigorous inquiry-driven environment.</td>
<td>• Teachers serve as facilitators by providing the enabling environment that promotes the construction of learners’ own knowledge, based on their previous experiences.</td>
</tr>
<tr>
<td></td>
<td>• This makes learning more relevant to the learner and leads to the development of critical thinkers and problem solvers.</td>
</tr>
</tbody>
</table>

General aims

This Teacher’s Guide works in conjunction with the new curriculum to develop individuals to become mathematically literate, good problem solvers, have the ability to think creatively and have both the confidence and competence to participate fully in society as responsible local and global citizens.

Subject aims

The Teacher’s Guide follows the curriculum guidelines to help learners to:

• recognise that Mathematics permeates the world around us  
• appreciate the usefulness, power and beauty of Mathematics  
• enjoy Mathematics and develop patience and persistence when solving problems  
• understand and be able to use the language, symbols and notation of Mathematics  
• develop mathematical curiosity and use inductive and deductive reasoning when solving problems  
• become confident in using Mathematics to analyse and solve problems both in school and in real-life situations  
• develop the knowledge, skills and attitudes necessary to pursue further studies in Mathematics  
• develop abstract, logical and critical thinking and the ability to reflect critically upon their work and the work of others.
Instructional expectations

This Teacher’s Guide will help you, the teacher, to:

- guide and facilitate learning by encouraging discussions among learners and challenging them to accept and share responsibility for their own learning
- select Mathematics content, adapt and plan lessons to meet the interests, knowledge, understanding, abilities and experiences of your class
- work together with colleagues within and across disciplines and grade levels to develop communities of Mathematics learners who exhibit the skills of mathematical inquiry and the attitudes and social values conducive to Mathematics learning
- use multiple methods and systematically gather data about learners’ understanding and ability to guide Mathematics teaching and learning
- arrange to provide feedback to both learners and parents
- design and manage learning environments that provide learners with the time, space and resources needed for learning Mathematics.

Core competencies

The core competencies are a set of skills that teachers need to develop in their learners. These are ways in which teachers and learners engage with the subject matter as they learn the subject. These competencies form a connected body of core skills that are acquired throughout the processes of teaching and learning.

| Critical thinking and problem solving (CP) | This skill develops learners’ cognitive and reasoning abilities to enable them analyse and solve problems. The CP skill enables learners to draw on their own experiences to analyse situations and choose the most appropriate out of a number of possible solutions. |
| Creativity and innovation (CI) | This skill promotes entrepreneurial skills in learners through their ability to think of new ways of solving problems and developing technologies for addressing the problem at hand. It requires ingenuity of ideas, arts, technology and enterprise. Learners are also able to think independently and creatively. |
| Communication and collaboration (CC) | This promotes the skills to use language, symbols and text to exchange information about themselves and their life experiences. Learners actively participate in sharing their ideas. They engage in dialogue with others by listening to and learning from them. They also respect and value the views of others. |
Cultural identity and global citizenship (CG)

Learners learn how to put country and service foremost by understanding what it means to be active citizens. They develop a strong sense of social and economic awareness and use their skills to contribute effectively towards the socioeconomic development of the country and on the global stage. They build skills to critically identify and analyse cultural and global trends.

Personal development and leadership (PL)

PL improves self-awareness and builds self-esteem. It also entails identifying and developing talents, fulfilling dreams and aspirations, and learning from mistakes and failures of the past. They recognise the importance of values, such as honesty and empathy, seeking the well-being of others and to distinguish between right and wrong. PL helps them acquire the skill of leadership, self-regulation and responsibility.

Digital literacy (DL)

DL helps learners to discover, acquire, and communicate through ICT to support their learning. It also makes them use digital media responsibly.

Learning domains (expected learning behaviours)

There are three integral learning domains that should be the basis for instruction and assessment:
- Knowledge, understanding and application
- Process skills
- Attitudes and values.

Knowledge, understanding and application

Under this domain, learners may acquire some knowledge through learning experiences. They may also show understanding of concepts by comparing, summarising, rewriting etc. in their own words and constructing meaning from instruction. The learner may also apply the knowledge acquired in some new contexts.

See the new *Mathematics Curriculum for Primary Schools (Basic 4–6)* pages ix–x for a more detailed description.

Skills and processes

The mathematical method is the means by which a mathematician solves problems or seeks to gain information about events. Learners should be exposed to situations that challenge them to raise questions and attempt to solve problems. The more often they are faced with these challenges, the more likely they are to develop a positive attitude toward Mathematics, and the more likely they are to develop the relevant process skills.
See the new *Mathematics Curriculum for Primary Schools (Basic 4–6)* pages x–xi for a more detailed description.

**Attitudes**
To be effective, competent and reflective citizens who are capable of solving personal and societal problems, learners should be exposed to situations that challenge them to raise questions and attempt to solve problems. Learners therefore need to acquire positive attitudes, values and psychosocial skills that will enable them participate in debates and take a stand on issues affecting them and others.

See the new *Mathematics Curriculum for Primary Schools (Basic 4–6)* page xii for a more detailed description.

**Values**
At the heart of this curriculum is the belief in nurturing honest, creative and responsible citizens. As such, every part of this curriculum, including the related pedagogy should be consistent with a certain set of values.

See the new *Mathematics Curriculum for Primary Schools (Basic 4–6)* page xiii for a more detailed description.

**Assessment**
Assessment is a process of collecting and evaluating information about learners and using the information to make decisions to improve their learning.

In the curriculum, it is suggested that assessment is used to promote learning. Its purpose is to identify the strengths and weaknesses of learners to enable teachers ascertain their learner’s response to instruction. This Teacher’s Guide contains a Teacher Assessment section to guide you how to assess the concepts taught. See the new *Mathematics Curriculum for Primary Schools (Basic 4–6)* page xiv, that provides a detailed outline of the difference between formative and summative assessment and how to apply it to your classroom.

It is important to remember that, when developing assessment procedures, try to select indicators in such a way that you will be able to assess a representative sample from a given strand. Each indicator in the curriculum is considered a criterion to be achieved by the learners. When you develop assessment items or questions that are based on a representative sample of the indicators taught, the assessment is referred to as a “Criterion-Referenced Assessment”. In many cases, a teacher cannot assess all the indicators taught in a term or year. The assessment procedure you use, for example, class assessments, homework, projects, and so on, has to be developed in such a way that the various procedures complement one another to provide a representative sample of indicators taught over a period.
Suggested time allocation
Two periods per day (two 30-minute periods)

Pedagogical approaches
These include the approaches, methods, strategies, appropriate relevant teaching and learning resources for ensuring that every learner benefits from teaching and learning process. The teacher should:

• create learning-centred classrooms through the use of creative approaches
• position inclusion and equity at the centre of quality teaching and learning
• use differentiation and scaffolding as teaching and learning strategies
• use Information Communications Technology (ICT) as a pedagogical tool
• identify subject specific instructional expectations to make the subject relevant
• integrate all assessment strategies
• use questioning techniques that promote deep learning.

This Teacher’s Guide provides teaching methodology for each lesson and concept to ensure that the correct pedagogical approach is used. However, this may need to change based on the skills levels of your class in any year, so use your own experience and discretion to adapt these methodologies accordingly.

Learning-centred pedagogy
A learning-centred classroom creates the opportunity for learners to engage in meaningful hands-on activities that relate what they are learning with the real world. Learners have to discuss ideas, become actively engaged in looking for answers, and work in groups to solve problems. They also research for information, analyse and evaluate information. The aim of the learning-centred classroom is to enable learners to take ownership of their learning.

Inclusion
Inclusion is ensuring access and learning for all learners, especially the disadvantaged learners. Each lesson in this Teacher’s Guide contains advice on how to teach that particular concept to large classes, and to learners with special needs.

Differentiation and scaffolding
Differentiation is a process by which differences (learning styles, interest and readiness to learn) between learners are accommodated, so that all learners in a group have the best possible chance of learning. Differentiation could be by content, tasks, questions, outcome, groupings and support.
Technique | Process | Example
--- | --- | ---
Differentiation by task | Teachers set different tasks for learners of different abilities. | When sketching the plan and shape of their classroom, some learners could be made to sketch with free hand while others would be made to trace the outline of the plan.

Differentiation by support | The teacher gives needed support. | The teacher refers weak learners to the Guidance and Counselling Unit for academic support.

Differentiation by outcome | The teacher allows learners to respond at different levels. | Weaker learners are allowed more time for complicated tasks.

Scaffolding | The teacher uses a variety of instructional techniques to progress learners towards stronger understanding. | Break up the learning task, experience or concept into smaller parts and then provide learners with the support they need to learn each part.

**Information and communication technology (ICT)**

ICT has been integrated into the Mathematics curriculum as part of the core of education, alongside reading, writing and numeracy. Teachers are encouraged to use ICT as a teaching and learning tool to enhance deep and independent learning. If your school has internet access, these functions can be done online. Alternatively, download the clips or games to use offline in the classroom.

**Examples of ICT in the Mathematics classroom**

Use calculators to solve problems.
- Use cameras to record results and steps in a problem-solving process.
- Use multimedia to support the teaching and learning process.
- Show YouTube videos to explain certain concepts visually.
- Search for grade-appropriate online Mathematics games for each concept.
- Encourage learners to play the game online in groups, pairs or individually.
- Learners research data online to bring to school when required.
- Start teaching the basic skills of MS Office, using basic word processing skills, spreadsheets and PowerPoint presentations.

The use of ICT as a teaching and learning tool is to provide learners with access to large quantities of information online and offline. It also provides the framework for analysing data to investigate patterns and relationships. Once learners have made their findings, ICT can help them organise, edit and print the information in many different ways.
The exposure that learners are given at the primary school level to use ICT in exploiting learning will build their confidence and will increase their level of motivation to apply ICT use in later years, both within and outside of education. ICT use for teaching and learning is expected to enhance the quality and competence level of learners.

**Organisation and structure of the curriculum**

*Mathematics Curriculum for Primary Schools (Basic 4–6)* follows the curriculum in organising its content under key headings and annotations as shown in the figure below.

The content standards in this document are organised by grade level. Within each grade level, the contents are grouped first by strands. Each strand is further subdivided into sub-strands of related indicators.

- **Class** is the level/year being studied.
- **Indicators** are learning outcomes that define what learners should know and be able to do.
- **Content Standards** are groups of related indicators. Note that indicators from different standards may sometimes be closely related, because Mathematics is a connected subject.
- **Strands** are the main branches of the Mathematics content to be studied.
- **Sub-strands** are larger groups of related indicators (or Mathematics topics to be studied). Indicators from different sub-strands may sometimes be closely related.
The Standards are organised under four strands:
1. Number
2. Algebra
3. Geometry and Measurement
4. Data

The following table shows the scope and sequence of the strands addressed at the B4–B6 phase. The remaining part of the document presents the details of the standards and indicators for each grade level.

</tbody>
</table>
1. **Learning outcomes**

   Learners will be able to recognise, describe and represent numbers and their relationships, and to count, estimate with competence and confidence in solving problems.

2. **Essential for learning**

   Learners should have prior experience with counting forwards and backwards on number lines and number grids, place value, factors and multiples, ordering and comparing up to 6-digit numbers, rounding to the nearest number, working on number lines, as well as number patterns or sequences.

   Consider a baseline test, so that you can determine your learners’ level of knowledge.

3. **Key words**

   Place value, digits, expanded form, multiples, whole numbers, equivalence symbols (<, >, or =), ascending order, descending order, less than/smaller than, greater than/bigger than, equal to, rounding up/down, rounding off, less than/smaller than, greater than/bigger than, equal to

4. **Resources used in this chapter**

   Learner’s Book, Workbook, graph sheets, multi-base blocks, number cards, beads, plastic straws, number bonds, place
value charts number wheel, number chart, abacus, pictures of animals, see-saw, number line, number cards

5. **Large class teaching**

Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition for logical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

6. **Support for learners with special needs**

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps.

Develop a balance between individual teaching, peer teaching, cooperative learning and whole class teaching. If you see learners who are struggling, allow them more time to complete the task.

When the learners attempt word problems, first help them to explore the vocabulary in word problems. Make sure the learners understand the language and vocabulary used.

The learners should be able to explain their comparisons in the examples that follow: 258,214,879 and 265,321,897; 658,122,140 and 658,122,411 …. Learners should also be able to explain their skills in determining the placing of whole numbers in relationship with the other.

7. **Additional content for the teacher**

Review the different systems that were used to represent numbers, for example, the systems used by the tallies used by the olden days traders, cocoa / cattle farmers and Barter traders and the Hindu-Arabic number system.
If you have access to the Internet, explore YouTube for video material on multiples and factors, ordering whole numbers and equivalence, rounding off, up or down, as well as number patterns or sequences.

8. Teaching methodology

Ask learners to count in 1s, 2s, 3s and 4s, as far as possible, and revise multiplication up to $12 \times 12$. Play games and have a class competition to encourage learner participation.

Prepare a Place value chart, up to millions, and ask the learners to read off numbers from the chart. Use concrete, semi-concrete and abstract sequence. Make use of peer-assisted learning.

Ask learners to count in multiples of 10,000. Prepare a number chart and ask learners, in pairs, to identify and read off numbers from the chart in different positions around a given number. Ask them to count forwards and backwards, in different sequences. The learners should be able to identify the rules in each sequence, for example, adding 25 each time to get next number.

When the learners progress to ordering numbers in ascending or descending order, start with the first three digits, before moving to the next digits. Let them use a number line to say whether the number is nearer to a lower or higher value. Ask pairs to use number cards as a starting point, then skipping forwards or backwards to reach the next whole number.

9. Assessment

Assessment should take many forms. Use a baseline test as a diagnostic assessment (numbers in words and numerals, odd, even, skipping numbers forwards and backwards, place value, and so on). Also assess the learners on mental maths. This can take the form of teacher assessment, class work, or self- or peer assessment.
10. Answers

Exercise 1

1. a) 4 Blocks, 2 Flats, 3 Rods, 7 Cubes
   b) 6 Blocks, 3 Flats, 4 Rods, 5 Cubes
   c) 5 Blocks, 1 Flat, 2 Rods, 8 Cubes
   d) 3 Blocks, 2 Flats, 3 Rods, 0 Cubes
   e) 2 Blocks, 0 Flats, 5 Rods, 2 Cubes, 6 Hundreds
   f) 8 Flats, 4 Rods, 3 Cubes, 5 Hundreds
   g) 7 Flats, 4 Rods, 6 Cubes, 2 Hundreds
   h) 1 Block, 5 Flats, 2 Rods, 3 Cubes, 4 Hundreds

   e) Fifty thousand

6. a) 700,000; 900,000; 1,100,000  
   b) 800,000; 1,000,000; 1,200,000  
   c) Two hundred thousand

7. a) 57; 47; 37. Ten  
   b) 205; 105; 5. Hundred  
   c) 73,000; 72,500; 72,000. Five hundred  
   d) 973,821; 973,721; 973,621. One hundred  
   e) 934,321; 924,321; 914,321. Ten thousand

8. a) 670; 370  
   b) 754; 784  
   c) 94,729; 91,729; 90,729  
   d) 110,000; 140,000; 150,000  
   e) 689,749; 689,719  
   f) 792,989; 492,989

Strand 1: Number
Exercise 9

1. 4,000,000; 5,000,000. Counted forwards
2. 8,000,000; 9,000,000. Counted forwards
3. 5,500,000; 6,500,000. Counted forwards
4. 3,000,004; 4,000,004. Counted forwards
5. 3,099,999; 4,099,999. Counted forwards
6. 17,000,450; 16,000,450. Counted backwards
7. 271,269,271; 271,268,271. Counted backwards
8. 888,888,888; 858,888,888. Counted backwards

Exercise 10

1. 800,000,000; 900,000,000
2. 1,000,004,000; 1,000,005,000
3. 1,534,567,890; 1,634,567,890
4. 1,000,000; 100,000
5. 1,000,000,000; 1,010,000,000
6. 1,452,456,456; 1,453,456,456

Exercise 11

1. a) Two hundred and one, seven hundred and twenty seven, four thousand, thirty one thousand
   b) Six hundred and seventeen, five thousand and seventeen, twelve thousand, seventeen million, twenty-one million
2. a) 612,000
   b) 27,683,316

11. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 1 to 11 as Extension exercises. You can also choose any Exercises from pages 1 to 11 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
1. **Learning outcomes**
Learners will demonstrate an understanding of Roman numerals up to C. They will investigate the relationship between Roman numerals and Hindu-Arabic numerals and develop problem-solving skills.

2. **Essential for learning**
Learners should have a good understanding of the binary number system. They should also have encountered Roman numerals in previous years.

3. **Key words**
Numerals, vertically, zigzag, diagonally

4. **Resources used in this chapter**
Learner’s Book, Workbook, Roman numeral and symbols

5. **Large class teaching**
Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of logical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

6. **Support for learners with special needs**
As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps.
7. **Additional content for the teacher**

Consult your learners’ History curriculum for additional material on counting methods. If you have access to the Internet, explore YouTube for material on Hindu Arabic numbers and Roman numerals.

8. **Teaching methodology**

Use a wall chart to familiarise the learners with Roman numeration. Learners should use the chart to place numbers in a sequential order. Then, they should use the wall chart to convert Roman numerals to the Hindu Arabic numeral system and vice versa.

9. **Assessment**

Assessment can take many forms, for example teacher assessment (class work activity), self or peer assessment.

10. **Answers**

**Exercise 12**

1. Learning outcomes

The learners will be able to recognise, describe and represent numbers and their relationships, and to count, estimate with competence and confidence in solving problems.

2. Essential for learning

Learners should have prior experience with prime numbers.

3. Key words

Highest common factor (HCF), lowest common multiples (LCM), prime factors

4. Resources used in this chapter

Learner’s Book, Workbook, hundreds chart

5. Large class teaching

Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning.
Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of logical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

6. **Support for learners with special needs**

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Make sure that learners understand the vocabulary in word problems.

7. **Additional content for the teacher**

Videos on prime factors and the prime factorisation method. Consult YouTube.

8. **Teaching methodology**

Revise the use of the factor tree method to determine prime factors. Learners use this method above to express numbers as product of their prime. Use concrete, semi concrete and abstract sequence. Make use of peer-assisted learning.

9. **Assessment**

Teacher assessment, for example, a class work activity. Also include self and peer assessment.

10. **Answers**

**Exercise 16**

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.1.2.1 Apply mental mathematics strategies and number properties for multiplication and division</td>
</tr>
</tbody>
</table>

1. **Learning outcomes**
   The learners will be able to use a range of strategies to perform written and mental calculations with whole numbers, with competence and confidence in solving problems.

2. **Essential for learning**
   Learners should have prior experience with the different multiplication strategies.

3. **Key words**
   Multiplier, multiplicand, product, doubling, halving, factors

4. **Resources used in this chapter**
   Learner’s Book, Workbook, multiplication tables, distributive and associative property charts

5. **Large class teaching**
   Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.
   When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

6. **Support for learners with special needs**
   As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into
small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

7. Additional content for the teacher
You tube videos on multiplication bonds, and multiplication using the vertical column method

8. Teaching methodology
Use addition and subtraction to split numbers inside brackets (distributive property). Use factors to split up numbers, and use doubling and halving. Encourage peer-assisted learning using the vertical column method.

9. Assessment
Teacher assessment, for example, a class work activity. Also make use of self or peer assessment.

10. Answers

Exercise 1

7. **Additional content for the teacher**

YouTube video on using the divisibility rule

8. **Teaching methodology**

Use the divisibility rule to determine the multiples of 6, 8, 9, 11. Draw a $6 \times 6$ multiplication chart and use it as a game to play the 3-in-line game. Include peer-assisted learning using the vertical column method.

9. **Assessment**

Teacher assessment, for example, a class work activity

10. **Answers**

**Exercise 6**

1. a) **Yes.** The last number is 8, and 8 is an even number.
   
   b) **No.** The last number is 5. 5 is an odd number and not divisible by 2.

   c) Yes. The last number is 6, and 6 is an even number.

   d) No. The last number is 5. 5 is an odd number and not divisible by 2.

2. a) **Yes.** The last two digits, 40, is divisible by 4.

   b) Yes. The last two digits, 48, is divisible by 4.

   c) **No.** The last number is 5. 5 is an odd number and not divisible by 4.

   d) Yes. The last two digits, 24, is divisible by 4.

   e) **No.** 26 ÷ 4 = 6.5. It leaves behind a remainder.

3. a) **No,** it is not divisible by 3,6 or 9. They leave behind remainders.

   b) No, it is not divisible by 3, 6 or 9. They leave behind remainders.
c) No, it is not divisible by 3, 6 or 9. They leave behind remainders.

\[ \text{d) Yes. } 108 ÷ 3 = 36. \quad 108 ÷ 6 = 18. \quad 108 ÷ 9 = 12 \]

4. 42: 2; 3; 6
   162: 2; 3; 6; 9
   354: 2; 3; 6
   245: 5
   16,852: 2; 4
   857: not divisible by any of the numbers
   916: 2; 4
   240: 2; 3; 4; 5; 6; 10
   342: 2; 3; 6; 9;
   2,286: 2; 3; 6; 9
   4,992: 2; 3; 4; 6
   62,370: 2; 3; 5; 6; 9; 10
   432: 2; 3; 4; 6; 9
   38,385: 3, 5, 9
   723: 3

5. a) The number 1,536 is divisible by 6.
   b) The number 81 is divisible by 3.
   d) The number 72 is divisible by 4.
   e) The number 22 is divisible by 2.

11. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 25 to 26 as Extension exercises. You can also choose any Exercises from pages 25 to 26 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.1.2.4 Divide 2- or 3-digit numbers by 1- or 2-digit numbers</td>
</tr>
</tbody>
</table>

1. Learning outcomes

The learners will be able to use a range of strategies to perform written and mental calculations with whole numbers, with competence and confidence in solving problems.
2. **Essential for learning**

Learners should have experience with using different strategies to perform the four basic operations.

3. **Key words**

Order of operations

4. **Resources used in this chapter**

Learner’s Book, Workbook

5. **Large class teaching**

Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

6. **Support for learners with special needs**

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

7. **Additional content for the teacher**

YouTube videos on division techniques

8. **Teaching methodology**

Model mathematical statements from a given word problem, using the long division method. Role-play a given word problem involving division and subtraction and solve using an appropriate strategy.
Assessment
Teacher assessment, for example, class work activity

9. Answers

Exercise 7
LB page 46

1. a) 66, remainder 6     b) 228, remainder 1
   c) 109, remainder 1     d) 14, remainder 20
   e) 73                   f) 10
   g) 915                  h) 604
   i) 692                  j) 211

2. a) \(966 \div 69 = 14\). So, \(14 \times 69 = 966\)
    b) \(4,182 \div 41 = 102\). So, \(102 \times 41 = 4,182\)
    c) \(2,880 \div 24 = 120\). So, \(120 \times 24 = 2,880\)
    d) \(3,150 \div 15 = 210\). So, \(210 \times 15 = 3,150\)

11. Homework
Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook page 27 as Extension exercises. You can also choose any Exercises from page 27 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. Additional content for the teacher

YouTube videos on rounding off, up or down

7. Teaching methodology

Use the number line to compare and order a set of integers. Take care that learners are able to precisely locate integers on the number line.

8. Assessment

Teacher assessment

9. Answers

Exercise 8

1. \(24 \times 12 = 288\)
2. 7 days = 1 week and 2 weeks = 14 days. So, \(260 \times 14 = 3,640\). Yao consumes 3,640 calories eating chocolate.
3. \(84 \div 12 = 7\). The baker will need to prepare 7 boxes.
4. $30 \times 4 = 120$. $120 + 40 = 160$. $200 - 160 = 40$. Ebor will give her mom GH₵ 40.00 change.
5. $24 \times 3 = 72$. $72 + 24 = 96$. They picked 96 mangoes altogether.
   $96 \div 3 = 32$. They each get 32 mangoes.
6. $12 \times 12 = 144$
   a) $144 - 90 = 54$. She has GH₵ 54.00 remaining after purchasing jeans
   b) $126 - 54 = 72$. $72 \div 12 = 6$. Anaika needs to save for 6 more weeks.

10. **Homework**

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook page 28 as Extension exercises. You can also choose any Exercises from page 28 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

**Exercise 15**

**1.**

- a) \(4 \times 4 = 16\)
- b) \(-2 \times 2 = -4\)
- c) \(7 \times 3 = 21\)
- d) \(-3 \times 4 = -12\)
- e) \(-6 \times 3 = -18\)
- f) \(-4 \times 6 = -24\)

**2.**

- a)
- b)
- c)
3. a) $3 \times (-2) = -6$
   b) $-4 \times 3 = -12$
   c) $8 \times 2 = 16$
   d) $8 \times (-2) = -16$
   e) $5 \times (-3) = -15$
   f) $4 \times (-9) = -36$

4. a) $2 \times (-5) = -10$
   b) $-3 \times 6 = -18$
   c) $5 \times (-10) = -50$
   d) $-8 \times 10 = -80$
   e) $0 \times (-4) = 0$
   f) $-2 \times 10 = -20$
   g) $4 \times 6 = 24$
   h) $5 \times (-4) = -20$
   i) $6 \times 6 = 36$
   j) $9 \times (-6) = -54$
   k) $8 \times (-4) = -32$
   l) $-3 \times 11 = -33$

5. a) $-4$
   b) $-4 \times 5 = -20$. The bird’s height changes by $-20$ m after 5 seconds.
   c) $100 - 20 = 80$. The bird’s height must change by $-80$ m before it reaches the ground.
   d) $-80 \div (-4) = 20$. It will take 20 seconds for the bird to reach the ground.

6. a) $-6$
   b) $-6 \times 6 = -36$
   c) 6 laps = 36 litres of petrol. $54 - 36 = 18$. The car has 18 litres of petrol after 6 laps.
   d) $18 \div 6 = 3$. It will be able to do 3 more laps.

7. a) $7 \times 8 = 56$. The change in depth is 56 m after 8 minutes.
   b) A negative integer
   c) The submarine submerges below sea level.

11. Homework
Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly,
select questions from Workbook pages 29 to 43 as Extension exercises. You can also choose any Exercises from pages 29 to 43 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

**Sub-strand 3: Fractions**

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>B6.1.3.1</strong> Compare, add, subtract, multiply and divide fractions</td>
</tr>
</tbody>
</table>

1. **Essential for learning**

   Learners should have experience with objects that are whole and objects of which there are parts missing. They should also have experience of using different strategies to perform the four basic operations on whole numbers.

2. **Key words**

   Common fractions, decimals, percentages, part of a whole, numerator, denominator, improper fractions, mixed numbers, common denominator, equivalent

3. **Resources used in this chapter**

   Learner’s Book, Workbook, fraction charts, number cards, counters

4. **Large class teaching**

   Plan your activities for an inclusive class. Determine your learners’ point of entry. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

   When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.
5. Support for learners with special needs

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. Additional content for the teacher

YouTube videos on comparing fractions, addition and subtraction of fractions, multiplication and division of fractions

7. Teaching methodology

Cut concrete objects (e.g. fruit and sheets of card/papers) into parts and state the part as a fraction of the whole. Ask the learners to draw whole items and then partition them according to your instruction. Ask learners to shade fractions of shapes that they have drawn. Also use concrete objects to add and subtract fractions of a whole. Use a fraction chart to make these operations easier.

When teaching multiplication of fractions, express the whole number as a fraction and multiply the numerators, then denominators. Change all fractions into common fractions, then multiply them separately (numerators first then denominators). Stress that the learners should always simplify the products to their simplest form.

8. Assessment

Teacher assessment, for example, a class work activity, or end of unit test. Also create work sheets for extra practise.

9. Answers

Exercise 1

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>

<tr>
<td>( \frac{7}{10} )</td>
<td>70%</td>
<td>0.7</td>
</tr>
<tr>
<td>( \frac{3}{4} )</td>
<td>75%</td>
<td>0.75</td>
</tr>
</tbody>
</table>

2. a) 45%         b) 40%         c) 94%
3. a) \[ \frac{58}{100} = \frac{29}{50} \] 
   b) \[ \frac{74}{100} = \frac{37}{50} \] 
   c) \[ \frac{77}{100} \]
   d) 10% 
   e) 80%

4. a) \[ \frac{86}{100} = \frac{43}{50} \] 
   b) \[ \frac{21}{100} \] 
   c) \[ \frac{229}{1000} \] 
   d) \[ \frac{33}{100} \] 
   e) \[ \frac{50}{100} = \frac{1}{2} \] 
   f) \[ \frac{25}{100} = \frac{1}{4} \] 
   g) \[ \frac{23}{100} \]

5. a) 0.48 
   b) 0.159 
   c) 0.94 
   d) 0.11 
   e) 0.30 
   f) 0.18 
   g) 0.85 
   h) 0.65

Exercise 4

Exercise 5

\[ \frac{17}{5} - 2\frac{2}{3} \]
\[ = 3\frac{2}{5} - 2\frac{2}{3} \]
\[ = (3 - 2) + (\frac{2}{5} - \frac{2}{3}) \]
\[ = (3 - 2) + (\frac{6}{15} - \frac{10}{15}) \]
\[ = 1 - \frac{4}{15} \]
\[ = \frac{15}{15} - \frac{4}{15} \]
\[ = \frac{11}{15} \]

\[ \frac{5}{3} + \frac{2}{3} \frac{3}{4} \]
\[ = (5 + 2) + (\frac{1}{3} + \frac{3}{4}) \]
\[ = (5 + 2) + (\frac{4}{12} + \frac{9}{12}) \]
\[ = 7 + \frac{13}{12} \]
\[ = 8\frac{1}{12} \]

\[ \frac{9}{4} - 1\frac{2}{3} \]
\[ = 2\frac{1}{4} - 1\frac{2}{3} \]
\[ = (2 - 1) + (\frac{1}{4} - \frac{2}{3}) \]
\[ = (2 - 1) + (\frac{3}{12} - \frac{8}{12}) \]
\[ = 1 - \frac{5}{12} \]
\[ = \frac{7}{12} \]

\[ 4\frac{1}{5} - 1\frac{1}{3} \]
\[ = 4\frac{1}{5} - 3\frac{2}{3} \]
\[ = (4 - 3) + (\frac{1}{5} - \frac{2}{3}) \]
\[ = (4 - 3) + (\frac{3}{15} - \frac{10}{15}) \]
\[ = 1 - \frac{7}{15} \]
\[ = \frac{8}{15} \]

2. \[ 5\frac{2}{6} - 3\frac{1}{3} \]
\[ = (5 - 3) + (\frac{2}{6} - \frac{1}{3}) \]
\[ = (5 - 3) + (\frac{1}{3} - \frac{1}{3}) \]
\[ = 2 \]
3. \( \frac{7}{10} + \frac{5}{10} \)  
   \[ = (3 + 3) + \left( \frac{7}{10} + \frac{5}{10} \right) \]  
   \[ = 6 + \frac{12}{10} \]  
   \[ = 7\frac{1}{5} \]  

4. \( \frac{5\frac{2}{3} + 3\frac{2}{3}}{3} \)  
   \[ = (5 + 3) + \left( \frac{2}{3} + \frac{2}{3} \right) \]  
   \[ = 8 + \frac{4}{3} \]  
   \[ = 9\frac{1}{3} \]  

5. \( \frac{7\frac{2}{8} - 2\frac{3}{8}}{8} \)  
   \[ = (7 - 2) + \left( \frac{2}{8} - \frac{3}{8} \right) \]  
   \[ = 5 - \frac{1}{8} \]  
   \[ = 4\frac{7}{8} \]  

6. \( \frac{7\frac{1}{6} + 5\frac{6}{7}}{7} \)  
   \[ = (7 + 5) + \left( \frac{1}{6} + \frac{6}{7} \right) \]  
   \[ = 12 + \frac{7}{7} \]  
   \[ = 13 \]  

7. \( \frac{2\frac{3}{7} + 1\frac{3}{5}}{5} \)  
   \[ = (2 + 3) + \left( \frac{3}{7} + \frac{3}{5} \right) \]  
   \[ = (2 + 3) + \left( \frac{15}{35} + \frac{21}{35} \right) \]  
   \[ = 5 + \frac{36}{35} \]  
   \[ = 6\frac{1}{35} \]

**Exercise 6**  
1. \( \frac{1}{7} \)  
2. \( \frac{2}{3} \)  
3. \( \frac{1}{3} \)  
4. \( \frac{1}{3} \)  
5. \( \frac{4}{15} \)  
6. \( \frac{2}{3} \)  
7. \( \frac{5}{9} \)  
8. \( \frac{1}{2} \)

**Exercise 7**  
1. a) 14  
   b) 21  
   c) 28  
   d) \( 1\frac{1}{5} \)  
   e) \( 8\frac{1}{3} \)  
   f) 14  
   g) 3  
   h) 25
2. a) \(\frac{3}{14}\)  
   b) \(\frac{7}{6}\)  
   c) \(\frac{10}{13}\)  
   d) \(\frac{3}{10}\) 
3. a) \(\frac{3}{5}\)  
   b) \(\frac{8}{13}\)  
   c) \(\frac{49}{66}\)  
   d) \(\frac{220}{27}\)

**Exercise 8**

1. The correct answer is 4.
2. 9
3. a) \(8\frac{2}{5}\) hours  
   b) 32 hours
4. \(1\frac{19}{20}\) litre, so it is 1 litre 950 ml of paint
5. 1 book

10. **Homework**

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 44 to 52 as Extension exercises. You can also choose any Exercises from pages 44 to 52 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

---

**Sub-strand 4:**
Ratios and proportion

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.1.4.1 Ratio and its relationship to fractions, multiplication and division</td>
</tr>
</tbody>
</table>

1. **Essential for learning**

Learners should have experience of making comparisons of similar units, for example, ml to ml, as well as different units, for example, kg and cedis. Learners should also have experience of common fractions, whole numbers and ratios.
2. **Key words**
Ratio, simplest form, comparisons

3. **Resources used in this chapter**
Learner’s Book, Workbook, fraction charts, boxes

4. **Large class teaching**
Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. **Support for learners with special needs**
As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. **Additional content for the teacher**
Newspaper advertisements showing the prices of articles, YouTube videos, for example, on the relationship between ratio and fractions, directions on how to mix concentrate with water

7. **Teaching methodology**
Use catalogues that state the price of goods to calculate the cost of a unit or more items. Investigate the ratios on concentrate bottles, to calculate the quantity of water to add to juice concentrate, or fabric softener, and so on. Plan a practical activity, where learners can mix various quantities of concentrate and water, and taste which one is stronger. Allow peer-assisted learning or group activities.
8. **Assessment**

Teacher assessment, for example, classwork activity and a short test at the end of the unit.

9. **Answers**

**Exercise 1**

1. a) i) 3 ii) $\frac{1}{3}$ iii) 1 : 3  
   b) i) 4 ii) $\frac{1}{4}$ iii) 1 : 4  
   c) i) No ii) Group in 3s. 1 : 3  
2. a) 1 : 4. There are four sets of set 1 in set 2.  
   b) 7 c) 1 : 7 d) 4 : 7  
3. a) 2 : 7 b) 1 : 1 c) 5 : 9  
   d) 1 : 2 e) 4 : 3  
4. Learners’ own answers  
5. Learners’ own answers  
6. a) For every 1 broiler, there are 2 layers.  
   b) Part to part comparison  
7. a) $12 - 4 = 8$ b) 4 : 12  
   c) Part to whole comparison

**Exercise 2**

1. a) 1 : 3 b) 1 : 3 c) 1 : 5  
   d) 3 : 4 e) 1 : 4  
2. a) 1 apple to 3 apples b) 3 eggs to 5 eggs  
   c) 1 bird to 2 wings d) 1 chicken to 2 legs  
3. a) 2 : 3 b) 2 : 1 c) 1 : 6  
   d) 4 : 5 e) 4 : 7 f) 7 : 9  
   g) 6 : 1 h) 9 : 8 i) 3 : 8  
   j) 1 : 4 k) 3 : 9 l) 1 : 8

**Exercise 3**

1. 5 : 3  
2. a) 5 : 12 b) 5 : 7  
3. a) $\frac{24}{50} = \frac{12}{25}$ b) $8 : 50 = 4 : 25$  
   c) 4 : 3  
4. 3 : 4  
5. 12 : 19  
6. 9 : 4

Strand 1: Number
7. 126 ÷ 7 = 18
18 × 2 = 36
18 × 5 = 90
Cebu will either get GH₵ 36.00 or GH₵ 90.00.

Exercise 4

1. a)  7 : 2 = 14 : 4  b)  4 : 5 = 8 : 10  
c)  6 : 4 = 3 : 2  d)  9 : 7 = 18 : 14  
e)  3 : 5 = 6 : 10  f)  9 : 10 = 18 : 20

2. a)  2 : 3 = 14 : 21  
b)  9 : 4 is not equivalent to 11 : 9  
c)  4 : 5 is not equivalent to \( \frac{2}{3} \)  
d)  \( \frac{7}{4} = \frac{21}{12} \)  
e)  GH₵ 20 for four loaves of bread not equal to GH₵ 24 for six loaves of bread  
f)  Three t-shirts for GH₵ 45 is equal to five t-shirts for GH₵ 75  
g)  \( \frac{42}{7} = \frac{54}{9} \)

3. 16 girls
4. 18
5. 6 pairs of sandals
6. 8 problems uncompleted. 22 homework problems in total.

7. a)  7  b)  2  c)  10  
d)  12  e)  12  f)  32  
g)  36  h)  42  i)  10  
j)  5

8. 100 : 1
9. a)  2 : 3  b)  4 : 3  c)  3 : 2  
d)  7 : 16  e)  2 : 1

10. GH₵ 3,428.57 to one daughter, GH₵ 4,571.43 to the other

10. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 53 to 63 as Extension exercises. You can also choose any Exercises from pages 53 to 63 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
1. **Essential for learning**
Learners should have experience of comparing quantities and expressing them in ratio and rate.

2. **Key words**
Ratio, simplest form

3. **Resources used in this chapter**
Learner’s Book, Workbook, fraction charts, pizza boxes

4. **Large class teaching**
Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

   When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. **Support for learners with special needs**
As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. **Additional content for the teacher**
Modelling and mapping diagrams, especially house plans, as these help learners to understand the ratio between a drawing and the real object.
7. Teaching methodology

Use work sheets from previous lessons to ensure that all learners understand the concepts and difference between ratio and rate. Give examples of ratio from real-life situations. Use peer-assisted learning for learners that battle to express ratios in their simplest forms.

8. Assessment

Teacher assessment, for example, classwork activity and a short test at the end of the unit.

9. Answers

Exercise 5  
1. a) \(2 \times 10 = 20\). \(5 \times 4 = 20\).
   b) \(3 \times 8 = 24\). \(4 \times 6 = 24\).
2. a) Not in proportion  b) In proportion  
   c) Not in proportion  d) Not in proportion  
   e) In proportion  f) Not in proportion

Exercise 6  
1. a) 320 g  b) 800 g  
   c) 960 g  d) 1,600 g  
2. a) 1 hour  b) 1 hour 20 minutes  
   c) 3 hours 20 minutes
3.

10. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 63 to 66 as Extension exercises. You can also choose any Exercises from pages 63 to 66 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
1. **Essential for learning**
Learners should know that geometric patterns are shapes arranged according to a rule. They need to understand that a numeric sequence is a pattern using numbers. The numbers 3, 5, 7, 9 is a pattern of uneven numbers. Each shape or number in a pattern is called a term. Each term has a value. So, we can assign numerical values to a geometric pattern.

2. **Key words**
Geometric patterns, sequence, numerical values, rule, predictions, subsequent element, pattern, relationship

3. **Resources used in this chapter**
Learner’s Book, Workbook, objects for building patterns, for example, beads, match sticks, sticks and straws, tooth picks, ear buds

4. **Large class teaching**
Divide the class into small groups. Allow the learners to work practically, for example, cutting their drinking straws into lengths, counting out specific numbers and building patterns.

5. **Support for learners with special needs**
As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners...
understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. **Additional content for the teacher**

YouTube videos, patterns seen in the environment

7. **Teaching methodology**

Most learners will benefit from building patterns from objects and not merely looking at the drawings in the Learner’s Book. Let them start by first building simple patterns, and gradually moving to more complex patterns.

8. **Assessment**

Self and peer assessment

9. **Answers**

**Exercise 1**

1. a) The pattern develops as follows: 1 square : 4 circles; 2 squares : 5 circles; 3 squares : 7 circles; 4 squares : 10 circles; 5 squares : 14 circles; 6 squares : 19 circles

   b) The pattern develops as follows: 2 dashes : 2 hearts; 3 dashes : 3 hearts; 4 dashes : 4 hearts; 5 dashes : 5 hearts; 6 dashes : 6 hearts

   c) The pattern develops as follows: 3 crosses : 2 lines; 5 crosses : 3 lines; 7 crosses : 4 lines; 9 crosses : 5 lines; 11 crosses : 6 lines

2. a) 2, 5, 8, 11, 14, 17, 20 b) 4, 7, 10, 13, 16, 19

   c) 2, 8, 14, 20, 26, 32 d) 20, 17, 14, 11, 8, 5

   e) 7, 11, 15, 19, 23, 27 f) 18, 13, 8, 3, –2, –7

   g) –1, 4, 9, 14, 19, 24

3. a) [Diagram of triangles]

   b) | Shape | 1 | 2 | 3 | 4 | 5 | 6 |
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of matchsticks</td>
<td>3</td>
<td>6</td>
<td>9</td>
<td>12</td>
<td>15</td>
<td>18</td>
</tr>
</tbody>
</table>
We will use 15 matchsticks to go up to pattern 5, and 18 matchsticks to go up to pattern 6.

4. a) 

b) 10
c) 

\[
\begin{array}{|c|c|c|c|c|}
\hline
\text{Pattern} & 1 & 2 & 3 & 4 \\
\hline
\text{Number of squares} & 1 & 2 & 3 & 4 \\
\hline
\text{Number of sides in the perimeter} & 4 & 6 & 8 & 10 \\
\hline
\end{array}
\]

d) The number of squares \((k)\) is equal to the pattern number \((n)\); \(k = n\)
e) The number of sides in the perimeter \((l)\) is equal to twice the pattern number \((n)\) plus 2; \(l = 2n + 2\)

5. a) 

b) 17
c) 21
d) \(m = 4n + 1\); \(m\) is the number of matchsticks, \(n\) is the pattern number
e) 

6. a) 

b) 24
c) The number of toothpicks used is 4 times the pattern number.

7. a) 

b) 7; 14; 21; 28
c) Learners’ own answers
d) The number of triangles in each figure is equal to seven times the pattern number.
8. a) 

b)

</tbody>
</table>

c) Learners’ own answers
d) The number of horizontal squares is equal to twice the number of vertical squares minus one.
e) The pattern does have a constant rule.
f) The total number of squares is equal to three times the shape number minus two.

Exercise 2  

1. a) Non-linear, pattern changes between adding 2 and 3  
b) Linear, pattern changes between adding 3, 5, and 7. (+2 to each previous addition)  
c) Linear, pattern changes by adding 6 each time.  
d) Linear, pattern changes by adding 3 each time.  
e) Linear, pattern changes by adding 12 each time.  
f) Linear, pattern changes by adding 8 each time.

2. a) Constant difference is 3. No constant value is added. $3 \times n$  
b) Constant difference is 3. Constant value of 4 is added. $3 \times n + 4$  
c) Constant difference is 10. No constant value is added. $10 \times n$  
d) Constant difference is –5. Constant value of 26 is added. $-5 \times n + 26$

3. a) $7(n) – 3$. ($n$ times $7 – 3$)  
b) $4n + 5$. ($n$ times $4 + 5$).  

$c$) $4n + 2$. ($n$ times $4 + 2$).
4. a) $2n + 4$  
    b) $6n - 7$
    c) $8(n + 1) - 2$
    d) $6n + 5$
    e) $3(n - 4) + 2$

Exercise 3  
1. a) $5(2) - 2 = 8$
    b) Yes. $5(3) - 2 = 13$. $5 \times 3 = 15$. $15 - 2 = 13$.

2. a) $2(5) + 4 = 14$
    b) $2(12) + 4 = 28$
    c) $2(25) + 4 = 54$
    d) $128 - 4 = 124$. $124 \div 2 = 62$.

3. a) 
    b) $5(n) + 1$
    c) $5(18) + 1 = 91$
    d) 28 houses.

4. a) Fifteen is added each time. (No additional multiplication)
    b) $60 + 15 = 75$. (GH₵ 75 will be earned)
    c) $120 \div 15 = 8$. (8 tickets were bought)

5. a) 
    b) $6n + 0$
    c) $6(14) + 0 = 84$
    d) 6 : 1

6. a) $3 \times n - 1$
    b) $3 \times n + 4$
    c) $7 \times n - 1$
Exercise 4

1. No

10. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 67 to 71 as Extension exercises. You can also choose any Exercises from pages 67 to 71 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
Sub-strand 2: Algebraic expressions

1. **Essential for learning**

Learners should have been exposed to addition, subtraction, multiplication and division, as well as the concepts of input and output. By now, they should be able to establish a given rule from a given pattern and represent it algebraically, as well as interpreting data from the given tables and formulating the rule.

2. **Key words**

Algebra, predictions, subsequent element, pattern, relationship, expressions, phrases, operators

3. **Resources used in this chapter**

Learner’s Book, Workbook, matchsticks, straws

4. **Large class teaching**

Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. **Support for learners with special needs**

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Go from simple
concepts to more complex ones. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. **Additional content for the teacher**

More exercises on patterns, for example:

5 + 4z – 1 + 2z; 10s – 1 + 3 – 5s and –9c + 7c + 8 – 3c

7. **Teaching methodology**

Introduce the learners to functional relationships by means of diagrams. The input-output diagrams are sometimes called function diagrams. Do plenty of exercises on writing algebraic expressions for the word problems, for example, “the sum of”, “take away”, and so on. Show the learners how to work in a step by step way. Simplify the meanings of new words, for example, “constant” and “unknown”.

8. **Assessment**

Teacher and peer assessment

9. **Answers**

**Exercise 1**

1. \(8p\)
2. \(5x\)
3. \(\frac{1}{3}b\)
4. \(\frac{2}{5}(x + 6x + 6)\)
5. \(3 – y\)
6. \(4p + 3\)
7. \(n – 3\)
8. \(7 + x\)
9. \(m + 9\)
10. \((z \times y) – 5\)
11. \(\frac{x}{24}\)
12. \((6 \times y) + 2\)
13. \(\frac{6}{(3y)}\)
14. \(\left(\frac{11}{8}\right) – 6\)
Exercise 2

1. a) \((5 \times 3) + 9 = 15 + 9 = 24\)
   b) \(\left(\frac{15}{3}\right) + 2 = 5 + 2 = 7\)
   c) \(18 - \left(\frac{15}{3}\right) = 18 - 5 = 13\)
   d) \((7 \times 3) + 4 - 5 = 21 + 4 - 5 = 20\)
   e) \(\left(\frac{16}{4}\right) \times 4 + 2 = 16 + 2 = 18\)
   f) \(\left(\frac{24}{6}\right) + (3 \times 12) = 4 + 36 = 40\)
   g) \(4 \times (8 - 5) = 4 \times 3 = 12\)
   h) \(182 - (24 \times 4) = 182 - 96 = 86\)
   i) \(23 + \left(\frac{636}{6}\right) \times 8 = 23 + (106 \times 8) = 23 + 848 = 871\)
   j) \(654 - (267 + 7) = 654 - 274 = 380\)
   k) \(\left(\frac{750}{15}\right) + \left(\frac{50}{2}\right) = 50 + 25 = 75\)
   l) \(\frac{2}{3}\) of \(12 - 6 = \frac{2}{3} \times 12 - 6 = 8 - 6 = 2\)

2. a) \(3a\)
   b) \(6d\)
   c) \(5p\)
   d) \(6ab\)
   e) \(16p\)
   f) \(5x\)
   g) \(7p\)
   h) \(5x\)
   i) \(7x + 4\)
   j) \(2xy + 9x\)
   k) \(11xy\)
   l) \(10a + 4b + 4\)
   m) \(10a + 8\)
   n) \(7a + 4b\)

Exercise 3

1. a) \(14x + 2\)
   b) \(2x + 14\)
   c) \(9y - 1\)
   d) \(18y\)
   e) \(6x\)

2. a) Shape A perimeter: \(26x + 12\)
    Shape B perimeter: \(20x + 14\)
    Shape C perimeter: \(16x + 12\)
    Shape D perimeter: \(8x + 7\)

Exercise 4

1.

<table>
<thead>
<tr>
<th>Expression</th>
<th>Simplify</th>
<th>Number of terms</th>
<th>Coefficient of x</th>
<th>Evaluate if (x = 3) and (y = 2)</th>

<td>12</td>
<td>36</td>
</tr>
</tbody>
</table>
2.  
   a) \((2 \times 3) + 5 = 6 + 5 = 11\)
   b) \(2(2 \times 3 \times 5) = 2(30) = 60\)
   c) \(3(2) - 2(3) + 2(5) = 6 - 6 + 10 = 10\)
   d) \(\frac{3(3) + 5}{2} = \frac{14}{2} = 7\)
   e) \((2 + 3)(2 + 3) = 5 \times 5 = 25\)
   f) \(3(2 + 3 + 5) = 3(10) = 30\)

3.  
   a) \(3 + 6 + 2 = 11\)
   b) \(3(3) + 5(2) = 9 + 10 = 19\)
   c) \(2(6) + 4(3 \times 2) = 12 + 4(6) = 12 + 24 = 36\)
   d) \(\frac{2(3) + 6}{2(2)} = \frac{12}{4} = 3\)

10. Homework
Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 72 to 77 as extension exercises. You can also choose any Exercises from pages 72 to 77 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

Exercise 3  
LB page 144
1. GH₵ 45 - GH₵ 19 = GH₵ 26  
2. GH₵ 14 \times 3 = GH₵ 42. The pizza costs GH₵ 42.  
3. \( 42 \div 6 = 7 \). Each chocolate costs GH₵ 7.  
4. a) \( 226 - 56 = 170 \). He needs GH₵ 170 more.  
    b) \( 170 \div 12 = 14.16 \). He would have to save for 15 weeks.  
5. \( 9 + 2 = 11 \). Mawusi practices for 11 hours.  
6. \( 96 \div 32 = 3 \). Granny is able to buy 3 bags of rice.  
7. \( 148 \div 4 = 37 \). Each waiter earns GH₵ 37.  
8. Learners’ own answers  

10. Homework
Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 78 to 84 as Extension exercises. You can also choose any Exercises from pages 78 to 84 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
Sub-strand 1: 2D shapes and 3D shapes

Content standard

| B6.3.1.1 | Understand prisms |

1. **Essential for learning**

Learners should be able to recognise and name 3D objects / shapes so that they can move on to describing and comparing various shapes. Learners should be able to distinguish pyramids from prisms. Learners should also be able to measure objects of different shapes.

2. **Key words**

Construct, prisms, angles, equilateral, net, examine

3. **Resources used in this chapter**

Learner’s Book, Workbook, cardboard, glue, clay, scissors, rulers, crayons, paper, graph sheets, multi-base blocks, number cards, plastic straws

4. **Large class teaching**

Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.
5. Support for learners with special needs
You, as teacher, should facilitate and teach holistically through the use of visual aids, such as televisions and projectors.

6. Additional content for the teacher
YouTube videos on 3D shapes

7. Teaching methodology
Ask learners to bring 3D objects to school. Divide the class into small groups, and then ask them to sort their 3D objects. Ask the learners to record the number of shapes in their books. Allow learners to play games, for example, opening and closing boxes, counting shapes, faces and identifying shapes.

8. Assessment
Peer or self-assessment. Also include puzzles and a description will help, as well as games such as “Mastermind”.

9. Answers

Exercise 1  
1. a) Square  b) Five  
c) Eight  d) Five  
2. a) Square  b) Edges  
c) Vertices  d) Cube  
3. a) Rectangle  b) Five  
c) Edges  d) Six  
4. a) Flat  b) One  
5. a) Curved  b) Three faces and two edges

Exercise 2

10. **Homework**

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 85 to 89 as Extension exercises. You can also choose any Exercises from pages 85 to 89 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
Sub-strand 2: Measurements

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.3.2.1 Construct rectangular and triangular prisms from their nets</td>
</tr>
</tbody>
</table>

1. **Essential for learning**

Learners should have been exposed to properties of a rectangular prism (having 6 faces, 8 vertices, and 12 edges) and a triangular prism (5 faces, with a triangular base). Learners should be able to recognise and name 3D objects.

2. **Key words**

Construct, prisms, angles, equilateral, net, examine

3. **Resources used in this chapter**

Learner’s Book, Workbook, cardboard, glue, clay, scissors, ruler, crayons, sheets of papers, graph paper

4. **Large class teaching**

Plan your activities for an inclusive class. Determine your learners’ point of entry. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. **Support for learners with special needs**

Allow learners who are comfortable with the visualisation of the nets, explain this to their peers.
6. **Additional content for the teacher**

YouTube videos on nets of 3D shapes

7. **Teaching methodology**

This part of the curriculum is best done “hands on”. It is very difficult to visualise a net if it is only a drawing on a page. Learners have to cut out the shapes and assemble their own nets.

8. **Assessment**

Work sheet and tests, homework, assignments projects and end of term/year examinations

9. **Answers**

**Exercise 3**  
LB page 155

1. Learners’ own answers

2. a) Rectangular prism  
   b) Hexagonal prism  
   c) Square-based pyramid  
   d) Rectangular pyramid  
   e) Cylinder

3. a)
4. Learners’ own answers

10. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 90 to 92 as Extension exercises. You can also choose any Exercises from pages 90 to 92 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

Sub-strand 3: Geometric reasoning

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.3.3.1</td>
</tr>
<tr>
<td>Describe the position and motion of objects in space using the cardinal points</td>
</tr>
</tbody>
</table>

1. Essential for learning

Learners should know the four basic cardinal points (north, east, west, and south) and describe positions using these points.
2. **Key words**
Compass, cardinal points, origin

3. **Resources used for this chapter**
Learner’s Book, Workbook, compass, grid paper, pencils, rulers

4. **Large class teaching**
Plan your activities for an inclusive class. Determine your learners’ point of entry. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. **Support for learners with special needs**
As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the positioning of whole numbers in relationship with other whole numbers.

6. **Additional content for the teacher**
YouTube videos on plotting points

7. **Teaching methodology**
Give the learners graph paper and give them instructions to move in various directions from a central point on the paper. The learners can also play games, encouraging them to move in response to instructions.
8. **Assessments**
Teacher assessments as the learners do the activities

9. **Answers**

**Exercise 4**

1.1 a) A is north-east of C, but C is south of D  
b) D is north-west of X, but X is south-east of H

1.2 a) A is north-west to M  
b) B is south-east of which of the ‘G’s  
c) G is north of E  
d) E is south of G  
e) M is south-east of H  
f) E is south-west of A  
g) A is east of D  
h) G is south-west of H

2. Possible answers

3. a) SE  
b) SW  
c) SE  
d) NW  
f) Learners’ own answers

4. a) From swim area, go north-east to camping area  
b) From welcome centre, go north-east to forest  
c) From welcome centre, go north to camp area  
d) From camping area, go south-east to boats
Exercise 5

1. b) McDonald’s
d) Lake
e) Library
f) Ice-cream parlour
g) Move 5 squares east and 3 squares south
h) Move 4 squares east and 5 squares south

2. a) 5 squares east, 2 squares north
b) South-west
c) 3 squares south, 3 squares east
d) 2 squares south, 3 squares west
e) 3 squares south, 2 squares east
f) No, the police station is to the north-east

10. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 93 to 96 as extension exercises. You can also choose any Exercises from pages 93 to 96 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.3.3.5 Perform a single transformation on a 2D shape</td>
</tr>
</tbody>
</table>

1. **Essential for learning**

Learners should have prior experience of plotting x and y on a coordinate plane.

2. **Key words**

Line of symmetry, reflection, properties, vector and translation, compass, origin

3. **Resources used for this chapter**

Learner’s Book, Workbook, graph sheets, pencils, rulers, hand mirrors
4. **Large class teaching**

Plan your activities for an inclusive class. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies. Also integrate your work in the Mathematics class with other subjects.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. **Support for learners with special needs**

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. Explore the vocabulary in word problems first in order to ensure that the learners understand the language and vocabulary used. The learners should be able to explain their skills in determining the place value of whole numbers in relationship with the other.

6. **Additional content for the teacher**

YouTube videos on reflection and translation, lines of reflection

7. **Teaching methodology**

Some learners struggle to imagine shapes being translated or reflected. Allow them to cut out shapes, and then physically move them across graph paper. Learners who struggle to grasp the concept of reflection, may benefit from using mirrors to see how shapes are reflected. Once again, it may help them to cut out shapes and physically flip them over on graph paper.

8. **Assessment**

Teacher assessments as the learners do the activities. Self or peer assessment of homework
9. Answers

Exercise 6

1. a) 

b) 

c) 

d) 

e) 

f)

10. Homework

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 97 to 108 as Extension exercises. You can also choose any Exercises from pages 97 to 108 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
Content standard

B6.4.1.1 Create, label and interpret line graphs

1. Essential for learning

Learners should have prior knowledge of data being a collection of information. They need to understand that there are many reasons for collecting data. Learners will be aware that the methods of data collection can vary. Therefore, they have to find suitable ways to represent the collected information, so they can make conclusions or predictions. They will learn how to use simple questionnaires and draw types of graphs.

2. Key words

Collection, organise, predict, presentation, interpretation and analyse, discrete data, continuous data, increase

3. Resources used in this chapter

Learner’s Book, Workbook, scale, measuring tape, a chart, calendar, tables, graph paper, line graph, series of separate points, frequency distribution table

4. Large class teaching

Plan your activities for an inclusive class. Determine your learners’ point of entry. Determine your learners’ point of entry. Activities should also be learner-centred, so that learners are in control of their learning. Learners should be able to try a variety of strategies.
Divide the class into smaller groups, with learners of different abilities. Provide them with clear instructions, so they know what to do.

When assessing, give learners recognition of Logistical reasoning. Credit them for the strategies they use, even if there is a mechanical error that might give rise to a wrong answer.

5. Support for learners with special needs

As teacher, your role is to facilitate learning and to keep content relevant to all learners. Break down content into small, manageable and logical steps. The activities should be practical and hands-on. Limit distractions.

6. Additional content for the teacher

You can represent the data of a given situation in multiple ways, for example, a line graph or a series of separate points. Ask learners to look for graphs in newspapers, and explain these to the class.

7. Teaching methodology

Start from known concepts, then moving to unknown concepts. Give them problems that relate to their immediate environment. Let them complete tables from flow diagrams, and draw graphs.

8. Assessment

Work sheet and tests, homework, assignments projects and end of term / year examinations.

9. Answers

Exercise 1

1. a) | Time passed in minutes |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>0  1  2  3  4  5</td>
<td></td>
</tr>
</tbody>
</table>

Distance travelled in metres
2. a) Between 4 and 5 mins (20 m difference).

\[
\begin{array}{|c|}
\hline
\text{Time in hours} & \text{Temperature in degrees Celsius} \\
\hline
09:00 & 35 \\
12:00 & 30 \\
15:00 & 20 \\
\hline
\end{array}
\]

b) 35 °C
c) 13:00 (1 p.m.)

3. a) The puppy reached 20 kg at 6 months.

b) After the age of 0 months (4 kg difference)

c) At birth he weighed 5 kg

4. a) During the fifth week (3 mm growth)
5. a) [Graph showing height climbed in metres against time passed in hours]

b) During the first hour (100 m)

c) It is the point where he began his climb.

Exercise 2

1. a) Discrete. Points on a graph. Year on y-axis and profit earned on x-axis
   b) Discrete. Points on a graph. Weight on y-axis and age on x-axis.
   c) Discrete. Points on a graph. Year on x-axis and number of games won on y-axis.

2. Learners’ own answers

Exercise 3

1. a) 0; 70
   b) 1 bar is 2 kg
   c) The third month
   d) 35 kg
   e) The tiger’s weight shows an exponential increase.

2. a)
3. a) Vertical axis: 1 bar is 4 pages. Horizontal axis: 1 bar is 15 minutes.
b) A: 30 pages; B: 25 pages
c) 60 pages
d) Learner A
e) Linear
f) A: 2 pages per 5 minutes. B: 1 page per 3 minutes.

4. a)

![Graph of submarine depth](image)

b) Approximately 280 m
c) The submarine depth decreased to 260 m, then increased to 300 m.
d) The submarine will be 320 m below sea level.

10. **Homework**

Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 109 to 116 as Extension exercises. You can also choose any Exercises from pages 109 to 116 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
1. **Essential for learning**
Learners should have been involved in question and answer scenarios, whether formally or informally, for example, interviews. They should have been exposed to recording observations, for example, in Natural Science classes.

2. **Key words**
Data, database, justify, questionnaires, interview, observation, experiments, databases, electronic media

3. **Resources used in this chapter**
Learner’s Book, Workbook, surveys, interviews, observations, tally sheets and questionnaires

4. **Large class teaching**
Divide the class into groups, each group not being more than 10% of the class size. Include learners of different abilities. Each member in the group must be assigned a specific task that they should complete for the group assignment.

Also delegate some ‘teacher tasks’ to your learners, such as distributing handouts, collecting homework and arranging groups.

5. **Support for learners with special needs**
Ensure that the learners understand the vocabulary of data collection. Also ensure that they understand the drawing of graphs (how axes should be labelled), and so on.

6. **Additional content for the teacher**
Integrate to other subject and educate learners on what graphs are best for what data. Give more information on how graphs help us to interpret data. Expose the learners to more hands-on activities and more exercises. You may also integrate the subject into other learning areas, such as English, using the data collection vocabulary as a spelling activity.
7. **Teaching methodology**

Use examples from the learners’ direct environment. Allow them to design questionnaires for their peers. Let the learners report back to the class and explain how they reached their conclusions.

8. **Assessment**

Give the learners an assignment, so that you can see whether they are able to apply the concepts they have learnt.

9. **Answers**

Exercise 4  
Learners’ own answers

Exercise 5  
LB page 207

1. a)  

<table>
<thead>
<tr>
<th>Favourite sport</th>
<th>Tally</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soccer</td>
<td>llll</td>
<td>4</td>
</tr>
<tr>
<td>Tennis</td>
<td>lllll</td>
<td>5</td>
</tr>
<tr>
<td>Hockey</td>
<td>lllll</td>
<td>5</td>
</tr>
<tr>
<td>Boxing</td>
<td>llll</td>
<td>3</td>
</tr>
<tr>
<td>No sport</td>
<td>lll</td>
<td>3</td>
</tr>
</tbody>
</table>

b) Both hockey and tennis (5)

c) \( \frac{3}{20} = 0.15 = 15\% \)

d) \( \frac{5}{20} = 0.25 = 25\% \)

e) Learners’ winter sports participation

![Bar chart showing learners' winter sports participation](chart.png)
2. a) Table: Favourite drink Tally Frequency

<table>
<thead>
<tr>
<th>Favourite drink</th>
<th>Tally</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tea</td>
<td>########</td>
<td>8</td>
</tr>
<tr>
<td>Juice</td>
<td>####</td>
<td>5</td>
</tr>
<tr>
<td>Water</td>
<td>#######</td>
<td>7</td>
</tr>
<tr>
<td>Coffee</td>
<td>#######</td>
<td>10</td>
</tr>
</tbody>
</table>

b) Bar chart: Teachers' favourite drinks

- Tea: 8 teachers
- Juice: 5 teachers
- Water: 7 teachers
- Coffee: 10 teachers

c) Coffee is the favourite drink amongst the teachers \( \frac{10}{30} \)
d) \( \frac{7}{30} \) 7 teachers drank water.
e) \( \frac{8}{30} = 0.26666 = 26.67\% \)
f) 10 Coffees : 8 Teas. Ratio: 5:4
g) \( \frac{5}{30} = 1:6 \)

3. Learners’ own answers
Sub-strand 2:  
Chance or probability

<table>
<thead>
<tr>
<th>Content standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>B6.4.2.2  Understand probability</td>
</tr>
</tbody>
</table>

1. **Essential for learning**

Learners should have been exposed to the concept of probability in games, for example, “tossing of coin”, “you win or draw or lose”, or cards. They should be able to perform simple repeated and list possible outcomes for events, such as tossing a coin and rolling dice. They should be able to count and compare the frequency of actual outcomes for a series of trials.

2. **Key words**

Predict, probability, approach, outcome, results, chance

3. **Resources used in this chapter**

Learner’s Book, Workbook, die, coins, deck of playing cards

4. **Large class teaching**

Divide the class into groups, each group not being more than 10% of the class size. Each member in the group must be assigned a specific task that they should complete for the group assignment.

5. **Support for learners with special needs**

Ask two learners to play, while one learner records the outcome. Then, allow them to swap.

6. **Teaching methodology**

Allow the learners to play games that will help them understand the concept of probability, for example, cards. Give them a problem that relates to their immediate environment. Encourage peer-assisted learning, or the concept of a “flipped” classroom.
7. **Assessment**

Formative assessment (when they have been exposed to the topic), for example, test and exams

8. **Answers**

**Exercise 6**

1. a) Very probable  
   b) Probable (depending on weather)  
   c) Probable  
   d) Probable to very probable  
   e) Very probable  
   f) Highly unlikely  
   g) Very probable

2. a) 0.13  
   b) 0.12  
   c) 0.1  
   d) 0

3. a) 0.19  
   b) 0.15  
   c) Theoretical: \( \frac{1}{6} \), Experimental: \( \frac{1}{10} \)  
   d) 0.48  
   e) 0.5  
   f) The die slightly favoured the odd sides in the experiment.

4. Learners’ own answers. Theoretical probability = 50%

5. Learners’ own answers. Theoretical probability = 50%

6. Learners’ own answers

7. (a) to (e) Learners’ own answers  
   d) 0.5  
   e) The experimental probability will approach the theoretical probability.  
   f) Learners’ own answers

**Exercise 7**

1. Learners’ own answers

2. a) 50%  
   b) 66.6% chance of getting tails  
   c) The coin was only tossed six times. If the experiment is repeated, the experimental value will approach the theoretical value.
d) Three heads (false)
   Almost two tails (false)
   Exactly two heads (true)
   An even number of tails (true)

3. a) Red ball; white ball; blue ball and green ball
    b) \( \frac{1}{3} \); 33.33%
    c) Learners’ own answers
    d) \( \frac{1}{4} \); 25%
    e) White and green balls

4. a) \( \frac{1}{52} \)
    b) \( \frac{1}{4} \)
    c) \( \frac{1}{13} \)
    d) 0

9. **Homework**

   Ask learners to complete any exercises that they could not complete during class time as Homework. If there are learners in your class who complete the assigned work quickly, select questions from Workbook pages 119 to 123 as Extension exercises. You can also choose any Exercises from pages 119 to 123 of the Workbook and assign these as Homework. Once back in class, allow time for learners to provide feedback and allow them to correct any mistakes they may have made.
Revision answers

Strand 1: Number

1. Check that learners have used different colours to show the following:
   a) \(8 \times 1,000\) blocks; \(1 \times 100\) blocks; \(4 \times 10\) blocks, 5 blocks
   b) \(3 \times 10,000\); \(4 \times 1,000\); 8 blocks
   c) \(1 \times 100,000\); \(3 \times 1,000\); \(4 \times 100\); \(5 \times 10\); 6 blocks
   d) \(1 \times 10,000\); \(9 \times 10\); 9 blocks

2. a) thirty-nine million four hundred and five thousand one hundred and nineteen
   b) nine million four hundred and forty-five thousand and one
   c) four billion nine hundred and eighty million one hundred and fifteen thousand and ninety-eight

3. a) 20,000  b) 10,000,000  c) 1,000,000,000
d) 900,000,000  e) 8,000,000  f) 20,000,000

4. a) \(190,809,888 = 100,000,000 + 90,000,000 + 800,000 + 9,000 + 800 + 88\)
b) \(45,610,098 = 40,000,000 + 5,000,000 + 600,000 + 10,000 + 90 + 8\)
c) \(780,770,880 = 700,000,000 + 80,000,000 + 700,000 + 70,000 + 800 + 80\)

5. a) 23,198,731,645  b) 47,310,747,419

         2
          6
           3
           2

    c) 12 = 12
        3
         4
          2
          2

    d)  
        64
        2
         32
          16
          8
           4
           2
           2

17. a) 2 × 2 × 2 × 3       b) 2 × 3 × 3 × 3
    c) 2 × 3 × 7       d) 2 × 2 × 2 × 5
    e) 3 × 3 × 3 × 3

18. a) 12       b) 5     c) 9

19. 5 groups of 3 boys and 5 girls each

20. a) 36       b) 40     c) 48
21. a) 

\[ \begin{array}{c}
18 \\
9 \\
3 \\
3 \\
3 \\
15 \\
3 \\
5 \\
\end{array} \]

HCF = 3
LCM = 2 \times 3 \times 3 \times 5 = 90

b) 

\[ \begin{array}{c}
16 \\
8 \\
2 \\
2 \\
2 \\
4 \\
2 \\
2 \\
\end{array} \]

HCF = 2 \times 2 \times 2 \times 2 = 16
LCM = 2 \times 2 \times 2 \times 2 \times 2 = 32

\[ \begin{array}{c}
32 \\
16 \\
8 \\
4 \\
2 \\
2 \\
2 \\
\end{array} \]

HCF = 2 \times 2 \times 2 \times 2 = 16
LCM = 2 \times 2 \times 2 \times 2 \times 2 = 32

HCF = 3
LCM = 2 \times 3 \times 3 \times 5 = 90

22. a) 

\begin{array}{c|c|c|c|c|c}
& 7 & 21 & 49 & \text{HCF} = & \\
\hline
\end{array}

\begin{array}{c|c|c|c|c|c}
& 2 & 21 & 49 & \text{LCM} = & \\
\hline
\end{array}

b) 

\begin{array}{c|c|c|c|c|c}
2 & 7 & 21 & 49 & \text{HCF} = & \\
\hline
2 & 5 & 10 & 35 & \text{LCM} = 2 \times 2 \times 5 \times 7 = 140 & \\
5 & 5 & 5 & 35 \\
7 & 1 & 1 & 7 \\
\hline
1 & 1 & 1 & \\
\end{array}
23. a) 20   b) 72   c) 30   d) 40
    e) 27   f) 49   g) 44   h) 63
    i) 42   j) 24   k) 60   l) 48

24. a) 10,000   b) 328   c) 440   d) 1,000
    e) 7,740   f) 23,900   c) 530,000   d) 77,000
    e) 71,000   f) 52,200

26. There are 2,200 books.

27. a) 110   b) 184   c) 112   d) 198

28. a) 2,886

51. There are 8 boys altogether. 6 litres \( \div \) 8 boys = \( \frac{3}{4} \) litre per boy
52. \( \frac{45}{8} + \frac{33}{4} = \frac{83}{8} \)
53. a) 12  b) 25  c) 4  d) 40
54. a) \( \frac{3}{14} \)  \hspace{1cm} b) \( \frac{5}{18} \)  \hspace{1cm} c) \( \frac{12}{55} \)  \hspace{1cm} d) \( \frac{7}{30} \)  

55. a) \( \frac{22}{5} \)  \hspace{1cm} b) \( 12 \frac{5}{12} \)  \hspace{1cm} c) \( 10 \frac{3}{20} \)  

56. a) 9  \hspace{1cm} b) 3 : 12  \hspace{1cm} c) 3 : 9 or 1 : 3  

57. a) 1 : 2  \hspace{1cm} b) 1 : 4  \hspace{1cm} c) 1 : 4  
   d) 1 : 2  \hspace{1cm} e) 2 : 3  

58. 35 : 50 or 7 : 10  

59. 32 : 64 or 1 : 2  

60. Examples as follows (accept all correct answers):  
   a) 1 : 2  \hspace{1cm} b) 1 : 3  
   c) 4 : 1  \hspace{1cm} d) 18 : 20  
   e) 10 : 4  

61. 8 burgers  

62. She is running at 4 km/h.  
   a) 1 h 15 min  \hspace{1cm} b) 2 \frac{1}{2} h or 2 h 30 min  
   c) 3 \frac{3}{4} h or 3 h 45 min  

63. Week 1 = GH¢ 15 \times 6 = GH¢ 90  
   Week 2 = GH¢ 15 \times 11 = GH¢ 165  
   GH¢ 255 in total  

Strand 2: Algebra  

1. ♠♠♠♠♣♣♣♣♣♣♣♣;  
   ♠♠♠♠♠♣♣♣♣♣♣♣♣♣♣;  
   ♠♠♠♠♠♠♣♣♣♣♣♣♣♣♣♣♣♣  

2. a) increasing by 5  \hspace{1cm} b) decreasing by 11  

3. a) 
   b) 20 grey and 16 white tiles  
   c) 24 grey tiles and 25 white tiles  
   d) 

<table>
<thead>
<tr>
<th>Pattern</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grey tiles</td>
<td>8</td>
<td>12</td>

<td>20</td>
<td>24</td>
</tr>
<tr>
<td>White tiles</td>
<td>1</td>
<td>4</td>
<td>9</td>
<td>16</td>
<td>25</td>
</tr>
</tbody>
</table>

   e) The grey tiles increase by 4 each time. The white tiles is the pattern number multiplied by itself e.g. pattern 2 is \( 2 \times 2 = 4 \).  
   f) 44 grey tiles and 100 white tiles
4. a) The input × 4 is the output or 4n
   b) The input × 5 – 2 is the output or 5n – 2
5.

<table>
<thead>
<tr>
<th>Input</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>10</th>
<th>25</th>
<th>40</th>
</tr>
</thead>
<tbody>
<tr>
<td>Output</td>
<td>7</td>
<td>10</td>
<td>13</td>
<td>16</td>
<td>34</td>
<td>79</td>
<td>124</td>
</tr>
</tbody>
</table>

Rule: 3n + 4

6. a) 

<table>
<thead>
<tr>
<th>1</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>17</td>
</tr>
<tr>
<td>3</td>
<td>27</td>
</tr>
<tr>
<td>5</td>
<td>47</td>
</tr>
<tr>
<td>10</td>
<td>97</td>
</tr>
</tbody>
</table>

b) 

<table>
<thead>
<tr>
<th>4</th>
<th>16</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>22</td>
</tr>
<tr>
<td>10</td>
<td>28</td>
</tr>
<tr>
<td>13</td>
<td>34</td>
</tr>
<tr>
<td>20</td>
<td>48</td>
</tr>
</tbody>
</table>

7. a) 3z b) 25x c) \( \frac{c}{8} \) d) \( \frac{5}{8}y + 4y + 2 \)

7. e) 11 – x f) \( ab - 6 \)

g) \( \frac{m}{8} + 5 \)

8. a) 10x b) 7y + (-11y) = -4y
c) \( 5a - 3a + 4c - 4c + c + 2 + 4 = 2a + c + 6 \)

9. a) \( 3(3) + 3(4) = 9 + 12 = 21 \)
b) \( 2(2) - 2(4) = 4 - 8 = -4 \)
c) \( \frac{6}{12} = \frac{1}{2} \)
d) \( 3a + 5a - 4b + 2b - c + 2c = 8a - 2b + c = 8(3) - 2(2) + 4 = 24 - 4 + 4 = 24 \)

10. a) \( a = 2 \) because \( 2 + 14 = 16 \).
b) \( b = -4 \), because \( -4 + 14 = 10 \).
c) \( x = 17 \) because \( 17 - 2 = 15 \).

11. a) \( p = 3 \) because \( 8 \times 3 = 24 \).
b) \( 16 - 10 = 6 \) so \( 2b = 16 \).

\( 2b \div 2 = b \quad 16 \div 2 = 8 \)

So \( b = 8 \).
c) \[3 + 2 = 5\] so \[\frac{1}{4}b = 3.\]
\[\frac{1}{4}b \times 4 = b\]
\[3 \times 4 = 12\]
So \(b = 12.\)

d) \[3g - 1 = 8\]
\[9 - 1 = 8\] so \(3g = 9\)
\[3g \div 3 = g \quad 9 \div 3 = 3\]
So \(g = 3\)

12. 11 hours
13. 4 bottles
14. a) \[312 - 72 = GH\$ 240\]
b) \[240 \div 15 = 16\] weeks
15. GH\$ 76

**Strand 3: Geometry and measurement**

1. a) 5 faces and 9 edges  
   b) cone  
   c) 6 faces in a square shape  
   d) rectangle  
   e) triangle  
   f) square  
   g) rectangle
2. a) triangle-based pyramid  
   b) hexagon-based prism  
   c) rectangular prism  
   d) triangular prism
3. a) north-west  
   b) south  
   c) Bolgatana  
   d) Accra
4. a) black arrow  
   b) red star  
   c) yellow star  
   d) There are several possible answers. One suggestion is: Move 4 squares east. Move 6 squares north. Move 1 square east.
5. a) reflection  
   b) rotation  
   c) translation
6. Check learners’ drawings
7. a) \(\left(\begin{array}{c}
\frac{11}{3}
\end{array}\right)\)
   b) \(\left(\begin{array}{c}
\frac{0}{-10}
\end{array}\right)\)
   c) \(\left(\begin{array}{c}
\frac{-5}{11}
\end{array}\right)\)
   d) \(\left(\begin{array}{c}
\frac{-4}{-8}
\end{array}\right)\)

**Strand 4: Data**

1. Discrete data can be counted and takes on an integer value, for example, the number of people who bought cars in a year. It is drawn as points on a graph.
Continuous data is not restricted to a whole number (defined value) and can take on any value in a range of values, for example, temperature over a given time period. It is drawn as a line joining points on a graph.
2. a) Day 4  
   b) 150 books  
   c) 5 more books  
   d) Days 2, 3 and 4
e) Day 5  

f) 10 books

g) Yao  

h) Yes, on Day 4

i) 5 books

j)  

<table>
<thead>
<tr>

B6.1.1.3
Factors, multiples and prime numbers from 1 to 100

Exercise 1

1. a) \[ 28 = 2 \times 2 \times 7 \]

   b) \[ 75 = 3 \times 5 \times 5 \]

2. a) \[ 2 \times 17 \]

   b) \[ 2 \times 2 \times 2 \times 2 \times 2 \times 2 \]

   c) \[ 2 \times 23 \]

   d) \[ 2 \times 3 \times 39 \]
Exercise 2  

1. a)  
\[ 32 = 2 \times 2 \times 2 \times 2 \times 2 \]
\[ 40 = 2 \times 2 \times 2 \times 5 \]
HCF = \(2 \times 2 \times 2 = 8\)

b)  
\[ 16 = 2 \times 2 \times 2 \times 2 \]
\[ 64 = 2 \times 2 \times 2 \times 2 \times 2 \times 2 \]
HCF = \(2 \times 2 \times 2 \times 2 = 16\)

2. a)  
\[ 9 = 3 \times 3 \]
\[ 12 = 2 \times 2 \times 3 \]
LCM = \(2 \times 2 \times 3 \times 3 = 36\)

b)  
\[ 8 = 2 \times 2 \times 2 \]
\[ 14 = 2 \times 7 \]
LCM = \(2 \times 2 \times 2 \times 7 = 56\)

c)  
\[ 12 = 2 \times 2 \times 3 \]
\[ 26 = 2 \times 13 \]
LCM = \(2 \times 2 \times 3 \times 13 = 156\)

3. a)  
\[ 9 = 3 \times 3 \]
\[ 15 = 3 \times 5 \]
HCF = 3; LCM = \(3 \times 3 \times 5 = 45\)

b)  
\[ 15 = 3 \times 5 \]
\[ 18 = 2 \times 3 \times 3 \]
HCF = 3; LCM = \(2 \times 3 \times 5 = 30\)

c)  
\[ 30 = 2 \times 3 \times 5 \]
\[ 24 = 2 \times 2 \times 2 \times 3 \]
HCF = \(2 \times 3 = 6\); LCM = \(2 \times 2 \times 2 \times 3 \times 5 = 120\)

d)  
\[ 9 = 3 \times 3 \]
\[ 27 = 3 \times 3 \times 3 \]
HCF = \(3 \times 3 = 9\); LCM = \(3 \times 3 \times 3 = 27\)

4. a)  
\[ \begin{array}{c}
2 \\
3 \\
3 \\
5 \\
\end{array} \]
\[ \begin{array}{c}
2 \\
2 \\
3 \\
5 \\
\end{array} \]
HCF of 36 and 45 = \(3 \times 3 = 9\)
LCM of 36 and 45 = \(2 \times 2 \times 3 \times 3 \times 5 = 180\)

b)  
\[ \begin{array}{c}
2 \\
2 \\
2 \\
3 \\
\end{array} \]
\[ \begin{array}{c}
2 \\
2 \\
3 \\
5 \\
\end{array} \]
HCF of 24 and 60 = \(2 \times 2 \times 3 = 12\)
LCM of 24 and 60 = $2 \times 2 \times 2 \times 3 \times 5 = 120$

c)  

\[
\begin{array}{c}
\text{48} \\
\text{2} \\
\text{2} \\
\text{2} \\
\text{3} \\
\text{72} \\
\text{3}
\end{array}
\]

HCF of 48 and 72 = $2 \times 2 \times 2 \times 3 = 24$
LCM of 48 and 72 = $2 \times 2 \times 2 \times 2 \times 3 \times 3 = 288$

d)  

\[
\begin{array}{c}
\text{36} \\
\text{2} \\
\text{3} \\
\text{63} \\
\text{3} \\
\text{7}
\end{array}
\]

HCF of 36 and 63 = $3 \times 3 = 9$
LCM of 36 and 63 = $2 \times 2 \times 3 \times 3 \times 7 = 252$

**Exercise 3**

1. a)  

\[15 = 3 \times 5\]
\[35 = 5 \times 7\]
\[40 = 2 \times 2 \times 2 \times 5\]
HCF = 5; LCM = $2 \times 2 \times 2 \times 3 \times 5 \times 7 = 840$

b)  

\[16 = 2 \times 2 \times 2 \times 2\]
\[24 = 2 \times 2 \times 2 \times 3\]
\[48 = 2 \times 2 \times 2 \times 2 \times 3\]
HCF = $2 \times 2 \times 2 = 8$; LCM = $2 \times 2 \times 2 \times 2 \times 3 = 48$

c)  

\[12 = 2 \times 2 \times 3\]
\[32 = 2 \times 2 \times 2 \times 2 \times 2\]
\[40 = 2 \times 2 \times 2 \times 5\]
HCF = $2 \times 2 = 4$;
LCM = $2 \times 2 \times 2 \times 2 \times 3 \times 3 = 480$

d)  

\[12 = 2 \times 2 \times 3\]
\[36 = 2 \times 2 \times 3 \times 3\]
\[48 = 2 \times 2 \times 2 \times 2 \times 3\]
HCF = $2 \times 2 \times 3 = 12$;
LCM = $2 \times 2 \times 2 \times 2 \times 3 \times 3 = 144$

e)  

\[42 = 2 \times 3 \times 7\]
\[48 = 2 \times 2 \times 2 \times 2 \times 3\]
\[54 = 2 \times 3 \times 3 \times 3\]
HCF = $2 \times 3 = 6$;
LCM = $2 \times 2 \times 2 \times 2 \times 3 \times 3 \times 3 \times 7 = 3,024$
B6.1.2.1
Apply mental mathematics strategies and number properties for multiplication and division

Exercise 1

1.  a)  

<table>
<thead>
<tr>
<th>x</th>
<th>3</th>
<th>0</th>
<th>5</th>
<th>7</th>
<th>9</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>

<tr>
<td>4</td>
<td>8</td>
<td>4</td>
<td>24</td>
<td>26</td>
<td>44</td>
</tr>
<tr>
<td>5</td>
<td>10</td>
<td>5</td>
<td>30</td>
<td>45</td>
<td>55</td>
</tr>
<tr>
<td>7</td>
<td>14</td>
<td>7</td>
<td>42</td>
<td>63</td>
<td>77</td>
</tr>
<tr>
<td>9</td>
<td>18</td>
<td>9</td>
<td>54</td>
<td>81</td>
<td>99</td>
</tr>
</tbody>
</table>

2.  a)  12 + 12 = 24
     b)  48 ÷ 2 = 24
     c)  30; 30 + 30 = 60
     d)  28; 28 + 28 = 56
     e)  30; 30 + 30 = 60

3.  a)  4 × 9 = (40 – 4) = 36 ← 4 × 10 = 40 → 4 × 11 = (40 + 4) = 44
     b)  8 × 9 = (80 – 8) = 72 ← 8 × 10 = 80 → 8 × 11 = (80 + 8) = 88
     c)  6 × 9 = (60 – 9) = 54 ← 6 × 10 = 60 → 6 × 11 = (60 + 6) = 66
     d)  7 × 9 = (70 – 9) = 63 ← 7 × 10 = 70 → 7 × 11 = (70 + 7) = 77
     e)  3 × 9 = (30 – 3) = 27 ← 3 × 10 = 30 → 3 × 11 = (30 + 3) = 33
Exercise 2

1. a) \(35 \times 10 = 350 \rightarrow 350 \times 100 = 35,000\)  
\(\rightarrow 35,000 \times 1,000 = 35,000,000\)

b) \(15 \times 10 = 150 \rightarrow 150 \times 10 = 1,500 \rightarrow 1,500 \times 10 = 15,000\)

c) \(2 \times 100 = 200 \rightarrow 200 \times 10 = 2,000 \rightarrow 2,000 \times 100 = 200,000\)

d) \(36 \times 10 = 360 \rightarrow 360 \times 1,000 = 360,000\)  
\(\rightarrow 360,000 \times 10 = 3,600,000\)

2. a) \(4 \times (10 + 5) = (4 \times 10) + (4 \times 5) = 40 + 20 = 60\)

b) \(5 \times (20 + 4) = (5 \times 20) + (5 \times 4) = 100 + 20 = 120\)

c) \(6 \times (20 + 6) = (6 \times 20) + (6 \times 6) = 120 + 36 = 156\)

d) \(7 \times (30 + 2) = (7 \times 30) + (7 \times 2) = 210 + 14 = 254\)

B6.1.2.2

Multiply multi-digit numbers

Exercise 1

1. a) \(164 + 40 = 200\)

<table>
<thead>
<tr>
<th>(\times)</th>
<th>20</th>

B6.1.2.3
Multiply numbers given division facts

Exercise 1

1. a) multiplication × ÷ division

   72
   9 8

b) multiplication × ÷ division

   30
   6
   6 × 5 = 30

2. a) × ÷

   63
   7 9

b) × ÷

   48
   6 8

3. a) the last digit is an even number or zero
b) the sum of the digits is divisible by 3
c) the last 2 digits divisible by 4
d) No, not always
e) If the last digit is 5 or zero
4.

B6.1.2.4
Divide 2- or 3-digit numbers by 1- or 2-digit numbers

**Exercise 1**

1. a) $117 \div 5 = 23 \text{ remainder } 2$
   
   $\begin{array}{c}
   5 \overline{)586} \\
   - 5 \\
   \hline
   8 \\
   - 5 \\
   \hline
   36 \\
   - 35 \\
   \hline
   1 
\end{array}$

   $586 \div 5 = 117 \text{ remainder } 1$

b) $39 \div 24 = 1 \text{ remainder } 15$

   $\begin{array}{c}
   24 \overline{)936} \\
   - 72 \\
   \hline
   216 \\
   - 216 \\
   \hline
   0 
\end{array}$

   $936 \div 24 = 39$

c) $20 \div 12 = 1 \text{ remainder } 8$

   $\begin{array}{c}
   12 \overline{)250} \\
   - 24 \\
   \hline
   10 
\end{array}$

   $250 \div 12 = 20 \text{ remainder } 10$

d) $75 \div 14 = 5 \text{ remainder } 5$

   $\begin{array}{c}
   14 \overline{)1050} \\
   - 98 \\
   \hline
   70 \\
   - 70 \\
   \hline
   0 
\end{array}$

   $1,050 \div 14 = 75$
e) \[
\begin{array}{c|c}
\hline
15 & 432 \\
\hline
& 30 \\
\hline
& 132 \\
\hline
& 120 \\
\hline
\end{array}
\]
\[
432 \div 15 = 28 \text{ remainder } 12
\]

2. a) \[
\begin{array}{c|c}
\hline
40 & 850 \\
\hline
& 80 \\
\hline
& 50 \\
\hline
& 40 \\
\hline
& 10 \\
\hline
\end{array}
\]
\[
850 \div 40 = 21 \text{ remainder } 10
\]

b) \[
\begin{array}{c|c}
\hline
29 & 493 \\
\hline
& 29 \\
\hline
& 203 \\
\hline
& 203 \\
\hline
& 0 \\
\hline
\end{array}
\]
\[
493 \div 29 = 17
\]

c) \[
\begin{array}{c|c}
\hline
18 & 535 \\
\hline
& 36 \\
\hline
& 175 \\
\hline
& 162 \\
\hline
& 13 \\
\hline
\end{array}
\]
\[
535 \div 18 = 29 \text{ remainder } 13
\]

d) \[
\begin{array}{c|c}
\hline
27 & 1377 \\
\hline
& 135 \\
\hline
& 27 \\
\hline
& 27 \\
\hline
& 0 \\
\hline
\end{array}
\]
\[
1,377 \div 27 = 51
\]

e) \[
\begin{array}{c|c}
\hline
15 & 4,815 \\
\hline
& 45 \\
\hline
& 31 \\
\hline
& 30 \\
\hline
& 15 \\
\hline
& 15 \\
\hline
& 0 \\
\hline
\end{array}
\]
\[
4,815 \div 15 = 321
\]
B6.1.2.5

Translate word problems into mathematical sentences and solve

Exercise 1

1. Total number of cakes = $4 \times 12 = 48$
   
   $48 \div 24 = 2$
   
   So, each learner will receive 2 cakes.

2. $(12 + 12) \times 4 = 96$ kg of food needed for 24 animals.
   
   $4,896 \div 96 = 51$
   
   So, the farmer will be able to feed the animals for 59 days.

3. $(15 \times 2) + (6 \times 2) + (3 \times 2) = 30 + 12 + 6 = 48$
   
   Fifi’s purchase will cost GH₵ 48. No, he will not have enough money.

4. a) $1,944 \div 12 = 162$. One payment = GH₵ 162.
   
   $162 \times 5 = GH₵ 810$
   
   So, she has paid off GH₵ 810 after 5 months.

   b) $1,944 – 810 = 1,134$
   
   Her balance after 5 months is GH₵ 1,134.

B6.1.2.6

Understand integers

Exercise 1

1. a) $+2; -2$
   
   b) $+5; -5$

   c) The sum of the same digit with opposite signs equals zero.

   d) $-10 + 10 = 0$

2.

3. a) $>$  b) $<$  c) $>$  d) $>$
Exercise 2

1. a) $D = 0$
   b) $G = 15$
   
   \[
   G - D = 15 - 0 = 15
   \]
   
   c) $\text{–}15$
   d) $F = 9$
   
   \[
   G = 15
   \]
   
   So, $F < G$
   e) $F = 9$
   
   \[
   9 > \text{–}9
   \]
   
   So, $F > \text{–}9$
   f) On the number line above, the distance from $B$ to $6$ is 4 units.
   
   \[
   1 \text{ unit} = 3 \text{ values}
   \]
   
   So, $4 \text{ units} = 4 \times 3 = 12$.
   g) On the number line above, the distance from $D$ to $A$ is 4 units.
   
   \[
   1 \text{ unit} = 3 \text{ values}
   \]
   
   So, $4 \text{ units} = 4 \times 3 = 12$.
   h) On the number line above, the distance from $\text{–}15$ to $G$ is 30 units.
   
   \[
   1 \text{ unit} = 3 \text{ values}
   \]
   
   So, $30 \text{ units} = 10 \times 3 = 30$

2. a) $A = \text{–}25$
   b) $B = \text{–}20$
   c) $C = \text{–}10$
   d) $D = \text{–}5$
   e) $E = 5$
   f) $F = 15$
   g) $G = 20$
   h) $H = 25$
   i) $B = \text{–}20$
   j) $D = \text{–}5$
   
   \[
   \text{So, } D - B = \text{–}5 - \text{–}20 = 15
   \]
   
   c) $D = \text{–}5$
   d) $G = 20$
   
   \[
   \text{So, } G - D = 20 - \text{–}5 = 25
   \]
   
   d) $E = 5$
   e) $B = \text{–}20$
   
   \[
   \text{So, } B - E = \text{–}20 - 5 = \text{–}25
   \]
3. a) \(-10\)  b) \(1\)  c) \(-6\)  d) \(7\)
   e) \(-7\)  f) \(-8\)  g) \(0\)  h) \(-1\)
   i) \(-11\)  j) \(11\)

**Exercise 3**  
1. a) \(1\)  b) \(10\)  c) \(9\)  d) \(-12\)
   e) \(-1\)  f) \(-9; -7\)  g) smaller; \(-7\)
   h) \(0\)

2. a) <  b) <  c) >  d) <
   e) <  f) >  g) >  h) >
   i) <  j) >  k) >

**Exercise 4**  
1. a)
   ![Number Line]
   
   \(-7; -3, 0; 2; 6\)

   b)
   ![Number Line]
   
   \(-9; -4; 3; 7; 8\)

   c)
   ![Number Line]
   
   \(-10; -6; 0; 2; 8\)

   d)
   ![Number Line]
   
   \(-10; -7; -5; 0; 2; 6\)

   e)
   ![Number Line]
   
   \(-16; -4; -2; 0; 8; 14\)
2. a) $8; 7; 0; -1; -4; -9$

b) $4; 2; 0; -4; -8$

c) $4; 0; -2; -6; -10$

d) $6; 4; 3; 0; -4; -7$

e) $4; 2; 0; -1; -3; -5; -9$

Exercise 5  
WB page 35

1. a) $-8; -3; -2; 7; 4; 7$

b) $-5; -1; 0; 4; 8; 10$

c) $-9; -5; -3; -1; 2; 4; 5$

d) $-8; -7; -2; 0; 3; 6; 9$

e) $-12; -8; -5; -1; 3; 6; 12$

2. a) $8; 3; 2; 1; -4; -5; -6; -8$

b) $12; 9; 5; 4; 0; -6; -18$

c) $20; 15; 4; -1; -8; -9; -13$

d) $17; 10; 6; 3; -2; -3; -11; -12$

e) $13; 6; 5; 2; -2; -5; -6; -13$

Exercise 6  
WB page 36

1. a) $-5^\circ$

c) $-25$ litre

e) $+7$ cm

g) $-\text{GH}\$ 200

b) $-10$ m

d) $-12$ m

f) $-\text{GH}\$ 100

h) $-10^\circ$

i) $+20$ km/h

j) $-6\%$
2. a) \(-2; -3; -1; 0; -2\)  
    b) \(5; 4; 6; 7; 5\)  
    c) \(-1; -2; 0; 1; -1\)  
    d) \(16; 15; 17; 18; 16\)  
    e) \(-8; -9; -7; -6; -8\)  
    f) \(-11; -12; -10; -9; -11\)

Exercise 7  
WB page 37  

1. a) \(-4\)

\[\]

b) \(2\)

\[\]

c) \(-8\)

\[\]

d) \(12\)

\[\]

e) \(2\)

\[\]

f) \(4\)

\[\]

2. a) \(-3\)

\[\]

b) \(-11\)

\[\]
c) −3

![Number line diagram]

d) 0

![Number line diagram]

e) −7

![Number line diagram]

f) −1

![Number line diagram]

Exercise 8

WB page 39

1. a) 5  b) −5  c) 21
d) −5  e) −11  f) 7
g) −5  h) −12  i) −7
j) 0

2. a) $13 - 8 = 5$
The new temperature is 5 °C.
b) $5 - 7 = -2$
The temperature is −2 °C.
c) $-2 + 10 = 8$
The new temperature is 8 °C.

3. a) 11  b) 7  c) 10
d) 5  e) 9  f) −4
g) −13  h) 5

Exercise 9

WB page 40

1. a) −15

![Number line diagram]

The product is −15.
b) 12

The product is 12.

c) 12

The product is 12.

d) –12

The product is –12.

e) –12

The product is –12.

f) –12

The product is –12.

g) 32

The product is 32.

Exercise 10

WB page 41

1. a) –20    b) –18    c) 24
    d) –15    e) 28    f) –28
    g) –30    h) –24    i) –45
    j) 42    k) –48    l) –36
2. a) If \(-2 \times 3 = -6\), then \(-2 \times 6 = -6 + (-6) = -12\)

b) If \(-4 \times 8 = -32\), then \(-4 \times 4 = -32 \div 2 = -16\)

c) If \(-3 \times 10 = -30\), then \(-3 \times 9 = (-30 - (-3)) = -27\)

d) If \(-5 \times 10 = -50\), then \(-5 \times 11 = (-50 + (-5)) = -55\)

e) \(-4 \times 16 = (-4 \times 10) + (-4 \times 6)\)
\[= -40 + (-24) = -64\]

f) \(-6 \times 14 = (-6 \times 10) + (-6 \times 4)\)
\[= -60 + (-24) = -84\]

Exercise 11

1. a) \(3 \times 6 = 18\)
   Kwaku baked 18 cookies

b) \(-11\)

c) \(18 - 11 = 7\)

d) 7 cookies remained

e) \(18 - (+11) = 7\)

f) Learners’ own answers

2. a) 1 hour = 60 min; \((60 \times 3) \div 20 = 9\)
   The lawnmower will have used 9 litres of petrol after 1 hour.

c) \(3 \times 3 = 3 + 3 + 3 = 9\) litres of petrol

d) \(15 - 9 = 6\)
   So, 6 litres of petrol is left after an hour.

e) \(6 - 9 = -3\)
   No, the lawnmower will not have enough petrol for 2 hours.

3. \((6 \times 3) + (3 \times 2) = 18 + 6 = 24\)
   Junior bought 24 toffees and pieces of chewing gum.

4. \(3 \times 10 = 30; 2 \times 10 = 20\)
   There are 30 pencils and 20 erasers in 10 boxes.

5. \(3 \times 9 = 27\)
   Sally buys 27 packets of peanuts for nine trips.

**Exercise 2**

**WB page 45**

1. a) \(>\) \(b) \(<\) \(c) \(>\) \(d) \(=\) \(e) \(<\)

2. a) \(=\) \(\frac{20}{28} = \frac{18}{28} = \frac{14}{28} = \frac{5}{28} \approx \frac{1.42}{28} \approx \frac{0.5}{28}\)

b) \(=\) \(\frac{25}{30} = \frac{12}{30} = \frac{15}{30} \approx \frac{0.5}{30} \approx \frac{0.5}{30}\)

c) \(=\) \(\frac{8}{24} = \frac{12}{24} = \frac{15}{24} \approx \frac{0.62}{24} \approx \frac{0.62}{24}\)

d) \(=\) \(\frac{12}{18} = \frac{4}{6} = \frac{13}{18} \approx \frac{0.67}{18} \approx \frac{0.67}{18}\)

3. a) \(=\) \(\frac{3}{4} \approx \frac{0.75}{4} \approx \frac{0.75}{4}\)

**Exercise 3**

**WB page 46**

1. a) \(\frac{6}{10} = 0.6\)

b) 0.44

c) \(\frac{1}{3} = 0.33\ldots\)

d) 0.625

e) 0.66\ldots

f) \(\frac{1}{5} = \frac{2}{10} = 0.2\)
2. a) \( \frac{40}{100} = 40\% \)
   
   b) \( \frac{25}{100} = 25\% \)
   
   c) \( \frac{15}{100} = 15\% \)
   
   d) \( \frac{755}{1,000} = 75.5\% \)
   
   e) \( 25\% \)
   
   f) \( \frac{125}{1,000} = \frac{12.5}{100} = 12.5\% \)

3. a) \( \frac{44}{100} = 44\% \)

   b) \( 6 \frac{5}{10} = \frac{65}{10} = \frac{650}{100} = 650\% \)

   c) \( \frac{875}{1,000} = \frac{87.5}{100} = 87.5\% \)

   d) \( \frac{7}{10} = \frac{70}{100} = 70\% \)

   e) \( \frac{66}{100} = 66\% \)

   f) \( \frac{125}{1,000} = \frac{12.5}{100} = 12.5\% \)

Exercise 4

<table>
<thead>
<tr>
<th>Fraction</th>

<td>g) ( \frac{9}{12} = \frac{3}{4} = \frac{75}{100} )</td>
<td>0.75</td>
<td>75%</td>
</tr>
<tr>
<td>h) ( \frac{2}{100} = \frac{1}{50} )</td>
<td>0.02</td>
<td>2%</td>
</tr>
<tr>
<td>i) ( \frac{11}{25} = \frac{44}{100} )</td>
<td>0.44</td>
<td>44%</td>
</tr>
</tbody>
</table>
Exercise 5

1. a) >   b) >   c) >
   d) =   e) <   f) =

2. a) = 0.82; 0.8; 0.85; 0.67; 0.875
   b) = 0.7; 0.75; 0.6; 0.3
   c) = 0.4; 0.46; 0.35; 0.57

3. a) = 0.6; 0.47; 0.8; 0.2
   b) = 0.4; 0.38; 0.65; 0.125; 0.666
   c) = 0.04; 0.02; 0.06; 0.25
4. \[ 75\% = \frac{75}{100} = \frac{3}{4} \]
\[ \frac{8}{10} = \frac{4}{5} \]
\[ \frac{9}{12} = \frac{3}{4} \]
\[ 0.75 = \frac{75}{100} = \frac{3}{4} \]
66.6\% = \frac{66}{10} = \frac{3}{4}
\[ \frac{6}{8} = \frac{2}{4} \]

So, \( \frac{8}{10} \) and 66.6\% are not equal to \( \frac{3}{4} \).

Exercise 6

WB page 49

1. a) \( \frac{12}{5} \)  
    b) \( \frac{15}{4} \)  
    c) \( \frac{14}{3} \)

    d) \( \frac{45}{7} \)  
    e) \( \frac{64}{11} \)

2. a) 1\( \frac{2}{3} \)  
    b) 2\( \frac{2}{7} \)  
    c) 1\( \frac{6}{15} = 1\frac{2}{5} \)

    d) 4  
    e) \( \frac{13}{3} = 4\frac{1}{3} \)  
    f) 3\( \frac{1}{11} \)

Exercise 7

WB page 50

1. a) \( \frac{7}{5} = 1\frac{2}{5} \)

    b) \( 3 - 3\frac{3}{9} \)

    \[ = -\frac{3}{9} \]

    \[ = -\frac{1}{3} \]

    c) \( \frac{93}{7} - \frac{54}{7} \)

    \[ = \frac{39}{7} \]

    \[ = 5\frac{4}{7} \]

    d) 10\( \frac{5}{6} \)

    e) \( \frac{18}{12} \)

    \[ = 1\frac{6}{12} \]

    \[ = 1\frac{1}{2} \]

    f) 2\( \frac{7}{8} \)
g) \[ 6 \frac{8}{20} + 3 \frac{15}{20} \]
\[ = 9 \frac{23}{20} \]
\[ = 10 \frac{3}{20} \]

h) \[ 4 \frac{7}{10} + 6 \frac{5}{10} \]
\[ = 10 \frac{12}{10} \]
\[ = 11 \frac{2}{10} \]
\[ = 11 \frac{1}{5} \]

i) \[ 5 \frac{16}{56} - 2 \frac{21}{56} \]
\[ = 4 \frac{72}{56} - 2 \frac{21}{56} \]
\[ = 2 \frac{51}{56} \]

j) \[ \frac{9}{16} - \frac{6}{16} \]
\[ = \frac{3}{16} \]

k) \[ 4 \frac{21}{30} + 7 \frac{20}{30} \]
\[ = 11 \frac{41}{30} \]
\[ = 12 \frac{11}{30} \]

Exercise 8

1. \[ 4 \frac{2}{3} - 3 \frac{1}{2} \]
\[ = 4 \frac{4}{6} - 3 \frac{3}{6} \]
\[ = 1 \frac{1}{6} \]

Kojo walked 1 \( \frac{1}{6} \) kilometres more.

2. \[ 7 \frac{3}{8} - 4 \frac{2}{8} = 3 \frac{1}{8} \]

Abena has 3 \( \frac{1}{8} \) m fabric left.
Exercise 9

1. a) $\frac{1}{6}$

b) $\frac{1}{2} \times \frac{2}{3} = \frac{2}{6}$

c) $\frac{5}{16}$

d) $\frac{8}{25}$

Exercise 10

1. a) $\frac{15}{42} = \frac{5}{14}$ or $\frac{5}{6} \times \frac{3}{7} = \frac{5}{2} \times \frac{1}{7} = \frac{5}{14}$

b) $\frac{14}{45}$

c) $\frac{12}{42} = \frac{2}{7}$ or $\frac{4}{7} \times \frac{3}{6} = \frac{2}{7} \times \frac{3}{3} = \frac{2}{7} \times 1 = \frac{2}{7}$

d) $\frac{16}{40} = \frac{2}{5}$ or $\frac{4}{8} \times \frac{4}{5} = \frac{1}{2} \times \frac{4}{5} = \frac{2}{5} \times \frac{2}{5} = \frac{2}{5}$

2. a) $\frac{4}{1} \times \frac{11}{2}$

   $= 2 \times 11 = 22$
b) \( \frac{11}{4} \times \frac{17}{3} = \frac{187}{12} = 15\frac{7}{12} \)

e) \( \frac{7}{3} \times \frac{7}{3} = \frac{49}{9} = 5\frac{4}{9} \)

d) \( \frac{25}{4} \times \frac{38}{5} = \frac{5}{2} \times \frac{19}{1} = \frac{95}{2} = 47\frac{1}{2} \)

B6.1.4.1

Ratios and its relationship to fractions, multiplication and division

Exercise 1

WB page 53

1. a) 6 : 8
   b) 5 : 10
   c) 6 : 3

2. a) 2 of shape A can fit into shape B
   b) Shape A is \( \frac{1}{2} \) of shape B
   c) 1 : 2
   d) 3
   e) \( \frac{1}{3} \)
   f) 1 : 3
   g) No
   h) 8 : 12

Exercise 2

WB page 54

1. a)

   b) 12 photos in one group and 21 photos in the other group
c) 9 marbles in one group and 12 marbles in the other group

Part to whole ratio

Exercise 3

1. a) \( \frac{7}{9} \)
   b) \( \frac{12}{36} = \frac{1}{3} \)
   c) \( \frac{3}{24} = \frac{1}{8} \)

2. a) 1 : 5
   b) 
   c) 
   d) 

3. a) 2 : 3
Exercise 4

<table>
<thead>
<tr>
<th>Ratio</th>
<th>Calculation</th>
<th>Simplest form</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. $\frac{14}{56}$</td>
<td>$\frac{14}{14} \div \frac{56}{14} = \frac{1}{4}$</td>
<td>$\frac{1}{4}$</td>

<td>$12 \div 18$ $12 \div 6 : 18 \div 6 = 2 : 3$</td>
<td>$2 : 3$</td>
</tr>
<tr>
<td>10. $70 : 49$</td>
<td>$70 \div 7 = 10$ $49 \div 7 = 7$</td>
<td>$10 : 7$</td>
</tr>
<tr>
<td>11. $9 : 15$</td>
<td>$9 \div 3 = 3$ $15 \div 3 = 5$</td>
<td>$3 : 5$</td>
</tr>
<tr>
<td>12. 15 cookies to 40 cakes</td>
<td>$15 \div 5$ $40 \div 5 = 3 : 8$</td>
<td>$3 : 8$</td>
</tr>
</tbody>
</table>
**Exercise 5**

1. a) \( 6 : 4 = 3 : 2 \)
   
   b) \( \frac{2}{5} \) white paint
   
   c) \( \frac{2}{5} \) of 30 = 12 litres of white paint
   
   \( \frac{3}{5} \) of 30 = 18 litres of green paint

2. a) \( \frac{5}{12} \times 36 = 15 \) girls in the class
   
   b) \( \frac{5}{12} = \frac{7}{12} \)
      
      \( \frac{7}{12} \times 36 \)
      
      = 21 boys in the class
   
   c) boys : girls = 21 : 15
      
      = 7 : 5

3. a) hockey : soccer = 12 : 8
      
      = 3 : 2

   b) hockey : total number of cards = 12 : 42
      
      = 2 : 7

   c) cricket : total = 7 : 42
      
      = 1 : 6

   d) hockey : basketball = 12 : 15
      
      = 4 : 5

4. a) Kukua receives \( \frac{4}{9} \) of GH₵ 252 = \( \frac{4}{9} \times \frac{252}{1} \)
       
       = 4 \times 28 = GH₵ 112

   Yaw receives \( \frac{5}{9} \) of GH₵ 252 = \( \frac{5}{9} \times \frac{252}{1} \) = 5 \times 28
       
       = GH₵ 140

   b) 112 : 252
       
       = 4 : 9

5. a) Total number of ice cream sold = 24
      
      strawberry : total = 3 : 24 = 1 : 8

   b) chocolate : mint = 8 : 6
      
      = 4 : 3

   c) 240 ÷ 24 = 10
      
      So, one ice cream costs GH₵ 10.

   d) 8 \times 10 = GH₵ 80
      
      Chocolate ice cream earned GH₵ 80.
Exercise 6

1. \( \frac{2}{4} \) and \( \frac{2}{8} \)

\( \frac{2}{4} = \frac{1}{2} \)

And \( \frac{2}{8} = \frac{1}{4} \)

The ratios are not equivalent.

2.

<table>
<thead>
<tr>
<th>Ratio</th>
<th>First equivalent ratio</th>
<th>Second equivalent ratio</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) 2 : 3</td>
<td>8 : 12</td>
<td>10 : 15</td>
</tr>
<tr>
<td>b) ( \frac{1}{8} )</td>
<td>( \frac{2}{16} )</td>
<td>( \frac{4}{32} )</td>
</tr>
<tr>
<td>c) 13 : 20</td>
<td>26 : 40</td>
<td>39 : 60</td>
</tr>
<tr>
<td>d) 3 : 5</td>
<td>12 : 20</td>
<td>18 : 30</td>
</tr>
<tr>
<td>e) ( \frac{4}{10} )</td>
<td>( \frac{2}{5} )</td>
<td>( \frac{12}{30} )</td>
</tr>
<tr>
<td>f) 4 : 7</td>
<td>12 : 21</td>
<td>16 : 28</td>
</tr>
</tbody>
</table>

3. \( 60 \div 3 = 20 : 1 \)

And \( 90 : 6 = 15 : 1 \)

No, the ratio of pages read is not equivalent.

4. \( 30 : 60 = 1 : 2 \)

And \( 45 : 85 = 9 : 17 \)

No, the ratios are not equivalent.

5. a) Ama: 10 : 5 = 2 : 1 and Awo: 12 : 6 = 2 : 1

b) Yes, the ratios are equivalent forms of each other.

c) bracelets : friends = 2 : 1

\( 2 : 1 = x : 8 \)

\( \therefore x = 16 \)

So, Alena has to make 16 bracelets.

Exercise 7

1.

<table>
<thead>
<tr>
<th>Water (ℓ)</th>
<th>10</th>
<th>20</th>
<th>25</th>
<th>35</th>
<th>40</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orange juice (ℓ)</td>
<td>30</td>
<td>60</td>
<td>75</td>
<td>105</td>
<td>120</td>
</tr>
</tbody>
</table>

2. apples : tarts = 20 : 5 = \( x : 20 \)

\( \therefore x = 80 \)

So, Mom would need 80 apples to make 20 tarts.

3. dogs : bag of food = 8 : 1

\( 8 : 1 = 32 : x \)

\( \therefore x = 4 \)

So, the shelter needs 4 bags of dog food to feed 32 dogs.
4. flour : pancakes = 3 : 12 = 1 : 4
   1 : 4 = 9 : x
   \[\therefore x = 36\]
   So, you can make 36 pancakes with 9 cups of flour.

5. completed : not complete = 6 : 3 = 24 : 12
   24 : 12 = 8 : x
   \[\therefore x = 4\]
   So, Kacely had \(8 + 4 + 12\) homework problems in total.

6. text : calls = 3 : 4; 3 : 4 = 18 : x
   \[\therefore x = 24\]
   So, Adwana made 24 calls.

B6.1.4.2

Proportion and its relationship to ratio and rates

Exercise 1

1. Means = 5 and 6
   Extremes = 3 and 10

2. a) Not in proportion
   b) In proportion
   c) In proportion
   d) Not in proportion

3. a) \(2 : 5 = x : 10\)
   \[5x = 20; x = 4\]
   So, \(2 : 5 = 4 : 10\)
   b) \(4 : 12 = x : 6\)
   \[12x = 24\]
   \[\therefore x = 2\]
   So, \(4 : 12 = 2 : 6\)

4. \(1 : 7 = x : 35\)
   \[7x = 35\]
   \[\therefore x = 2\]
   So, 5 pages would hold 35 photos.

Exercise 2

1. \(\frac{20}{2} = 10\text{ words in a minute}; 10 \times 10 = 100.\)
   So, Sibidoo will be able to type 100 words in 10 minutes.

2. a) \(\frac{45}{5} = 9\)
   The workers can pick 9 oranges in one minute.
Strand 1: Number

b) 1 hour = 60 min; $60 \times 9 = 540$
   So, the workers can pick 540 oranges in 1 hour.

3. $\frac{124}{6} = 20.66…$
   The price of one bag of rice is GH₵ 20.67.

4. Shop 1: $\frac{10}{6} = 1.66$; the price of one box of juice is
   GH₵ 1.67.
   Shop 2: $\frac{9}{14} = 2.25$; the price of one box of juice is
   GH₵ 2.25.
   So, she could buy six boxes of juice for GH₵ 10.

5. $\frac{1}{20} = 0.5$; the price of one can of cola is GH₵ 0.50.
   $15 \times 0.5 = 7.50$
   So, the cost of 15 cans of cola is GH₵ 7.50.

6. $\frac{8}{2} = 4$; Keku’s granny uses 4 balls of wool to knit a jersey.
   $4 \times 3 = 12$
   So, she would need 12 balls of wool to knit 3 jerseys.

Exercise 3  
WB page 66

1. a) $15,000 \times 15 = 225,000$
   So the length of the river is $225,000 \div 100 = 2,250$ m
   b) $2,250 \div 1,000 = 2,250$ km
   c) $150 \times 100,000 = 15,000,000$ cm
      $15,000,000 \div 5 = 3,000,000$
      So the scale is 1 : 3,000,000.

2. $5.5 \times 100 = 550$
   So, the actual length of the bedroom is 550 cm.
   $550 \div 100 = 5.5$
   The actual length is 5.5 m.

3. $125$ m = $12,500$ cm
   $\frac{12,500}{500} = 25$ cm
   So, the model will be 25 cm tall.
Strand 2: Algebra

B6 2.1.1
Determine the pattern rule to make predictions

Exercise 1

1. a)  

2. a) Row 1: □
Row 2: □□□□□
Row 3: □□□□□□□□□
Row 4: □□□□□□□□□□□□
Row 5: □□□□□□□□□□□□□□□□
Row 6: □□□□□□□□□□□□□□□□□□□

b) Five blocks are added each time to the previous row.
c)

<table>
<thead>
<tr>
<th>Row</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
</tr>
</thead>
<tbody>
<tr>
<td>No. of blocks</td>
<td>1</td>
<td>6</td>
<td>11</td>
<td>16</td>
<td>21</td>
<td>26</td>
<td>31</td>
<td>36</td>
<td>41</td>
</tr>
</tbody>
</table>

So, row 9 will contain 41 blocks.

3. a)

b) Pattern \(\frac{3}{8}\): 16 matchsticks; Pattern 5: 26 matchsticks
Pattern 4: 21 matchsticks; Pattern 6: 31 matchsticks
c) Five matchsticks are added each time to the previous pattern (shape).

Exercise 2

1. a)

<table>
<thead>
<tr>
<th>Row number</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of seats</td>
<td>5</td>
<td>7</td>
<td>9</td>
<td>11</td>
<td>13</td>
<td>15</td>
</tr>
</tbody>
</table>

b) The number of seats in a row is twice the row number plus 3.
c) Number of seats in row 6: \((2 \times 6) + 3 = 15\)
Number of seats in the whole classroom:
\(5 + 7 + 9 + 11 + 13 + 15 = 60\) seats

2. b) 2; 4; 6; 8; 10; 12
Proof: 4 + 2 = 6
Next terms: 6 + 2 = 8; 8 + 2 = 10; 10 + 2 = 12
c) 45; 36; 27; 18; 9
Rule: Start at 45, subtract 9 from the previous number.
Proof: 45 – 9 = 36
Next terms: 39 – 9 = 27; 27 – 9 = 18; 18 – 9 = 9
d) 6; 14; 22; 30; 38; 46
Rule: Start at 6, add 8 to the previous number.
Proof: 6 + 8 = 14
Next terms: 22 + 8 = 30; 30 + 8 = 38; 38 + 8 = 46
e) 2; 5; 10; 17; 26; 37
Rule: The first two terms are 2 and 5. Find the next terms by adding 2 plus the difference between the previous two terms.
Proof: $5 + 2 + 3 = 10$
Next terms: $10 + 2 + 5 = 17; 17 + 2 + 7 = 26; 26 + 2 + 9 = 37$
OR: Square the term number and add 1 to determine the numbers (terms) in the pattern.

Proof:

<table>
<thead>
<tr>
<th>Term no:</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number</td>
<td>1</td>
<td>5</td>
<td>10</td>
<td>17</td>
<td>26</td>
<td>37</td>
</tr>
</tbody>
</table>

3.

<table>
<thead>
<tr>
<th>Column A</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Add 7</td>
<td>2; 9; 16; 23; 30</td>
</tr>
<tr>
<td>Subtract 4</td>
<td>20; 24; 20; 16; 12</td>
</tr>
<tr>
<td>Subtract 3 (remember the rules for integers)</td>
<td>8; 5; 2; –1; –4</td>
</tr>
</tbody>
</table>

Exercise 3  
WB page 71

1.

<table>
<thead>
<tr>
<th>Column A</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) 2; 5; 8; 11</td>
<td>$3n + 3$</td>
</tr>
<tr>
<td>b) 6; 9; 12; 15</td>
<td>$3$ times $n + 1$</td>
</tr>
<tr>
<td>c) 0; 4; 8; 12</td>
<td>1 less than 3 times $n$</td>
</tr>
<tr>
<td>d) 4; 7; 10</td>
<td>$4(n – 1)$</td>
</tr>
</tbody>
</table>

2.

<table>
<thead>
<tr>
<th>Pattern</th>
<th>Rule in words</th>
<th>Algebraic rule</th>

<tr>
<td>b) 1; 4; 7; 9; …</td>
<td>Difference is 3. Rule: Multiply the term number by 3 and then subtract 2.</td>
<td>$3n – 2$</td>
</tr>
<tr>
<td>c) 5; 8; 11; 14; …</td>
<td>Difference is 3. Rule: Multiply the term number by 3 and then add 2.</td>
<td>$3n + 2$</td>
</tr>
</tbody>
</table>

(Note: term number = input)
3.

<table>
<thead>
<tr>
<th>Rule</th>
<th>Term 2 ((n = 2))</th>
<th>Term 5</th>
<th>Term 11</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) (2n - 3)</td>
<td>((2)(2) - 3) = 1</td>
<td>((2)(5) - 3) = 7</td>
<td>((2)(11) - 3) = 19</td>
</tr>
<tr>
<td>b) (7n + 4)</td>
<td>((7)(2) + 4) = 18</td>
<td>((7)(5) + 4) = 39</td>
<td>((7)(11) + 4) = 81</td>
</tr>
<tr>
<td>c) (5n - 2)</td>
<td>((5)(2) - 2) = 8</td>
<td>((5)(5) - 2) = 23</td>
<td>((5)(11) - 2) = 53</td>
</tr>
</tbody>
</table>

**B6.2.2.1**

**Understand algebraic expressions**

**Exercise 1**  
WB page 72

1. In a linear relationship, any change in an input value will result in a corresponding change in the output.
2. In a proportional relationship, one value increases/decreases as the other value increases/decreases. The ratio always stays the same.
3. a) 

<table>
<thead>
<tr>
<th>Adult</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Children</td>
<td>6</td>
<td>12</td>
<td>18</td>
<td>24</td>
</tr>
</tbody>
</table>

b) Variable: \(n\)

c) Six times the input \((n)\)

d) \(6n\)

e) \(6 \times 7 = 42\). So, 42 learners are going to the zoo, if seven adults are to accompany them.

4. a) 

<table>
<thead>
<tr>
<th>Number of sheets</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost (GH₵)</td>
<td>1</td>
<td>3</td>
<td>5</td>
<td>7</td>
<td>9</td>
</tr>
</tbody>
</table>

b) Multiply the input value by 2 and then subtract 1.

c) \(2n - 1\)

d) \((2 \times 8) - 1 = 15\). So, it would cost GH₵ 15 to print 8 A4 sheets.

e) It is a proportional relationship. As the number of A4 colour sheets increases, the cost increases.

f) Yes
Exercise 2

1.

<table>
<thead>
<tr>
<th>Expression</th>

<tr>
<td>b) $m; n; p$</td>
<td>-4</td>
<td>5; -2; 4</td>
<td>$5m - 2n + 4p - 4$</td>
</tr>
<tr>
<td>c) $s; t$</td>
<td>6</td>
<td>8; 6; 10</td>
<td>$8s + 6t + 10t + 6$</td>
</tr>
</tbody>
</table>

Exercise 3

1. a) $x - 5$
   b) $\frac{x}{6}$
   c) $11 - a$
   d) $y + 8$
   e) $3x - 5$
   f) $2m + 6$
   g) $\frac{12}{3p}$
   h) $(p + q) - 7$

2. a) $3a + 2$
   b) $\frac{2y - 3}{7}$
   c) $\frac{5x}{2} + 8$

3. a) $a \times 2 \rightarrow + 2a$
   b) $2 \rightarrow x(y + 3)$

   = $2 \rightarrow xy \rightarrow + \rightarrow 2 \rightarrow \times 3$
   c) $x \rightarrow + 7 \rightarrow \div 2$

Exercise 4

1. a) $P = (2x + 1 + 4)$
   $A = 4(2x + 1)$
   b) $P = 2(4x + 2 + 2y)$
   $A = (4x + 2)(2y)$
2. a) \[ P = 3(2y) = 6y \]
So, \( P = 6y \)
\[ A = \frac{1}{2} \times 2y \times 3x \]
b) \[ P = 2y + 2y + (3y + 1) \]
\[ = 4y + 3y + 1 \]
\[ = 7y + 1 \]
So, \( P = 7y + 1 \)
\[ A = \frac{1}{2} \times 2y \times 2 = 2y \]
So, \( A = 2y \)

3. a) 

\[
\begin{array}{c}
2x \\
8 \\
4 + 2x \\
3x \\
8 - 3x \\
4 \\
2x
\end{array}
\]

Perimeter of figure
\[ = 2x + (8 - 3x) + 4 + 3x + (4 + 2x) + 8 \]
\[ = 2x + 8 - 3x + 4 + 3x + 4 + 2x + 8 \]
\[ = 4x + 24 \]

b) 

\[
\begin{array}{c}
4y \\
3 \\
8 \\
3x \\
3 \\
2y \\
3 \\
3x \\
4y \\
2y
\end{array}
\]
Perimeter of figure
\[= 4y + 3 + 3x + 3 + 2y + 8 + 2v + 3 + 3x + 3 + 4y + 3 + 2 + 3\]
\[= 6x + 12y + 28\]

B6.2.3.1
Solve problems with a single variable and a whole number coefficient

Exercise 1
WB page 78

1. a) \(x + 2y\)
   b) \(7 + 4 - 2g\)
      \[= 11 - 2g\]
   c) \(9x + 4xy\)
   d) \(2a + 6a + 4 = 7\)
      \[= 8a - 3\]
   e) \(3x + 15 - 2x\)
      \[= 3x - 2x + 15\]
      \[= x + 15\]
   f) \(30 - 18c\)
   g) \(7x + 3x - 4x + 2y - 4y + y\)
      \[= 6x - y\]
   h) \(4mn - 9mn + 6m - 3m + 4n - 5n\)
      \[= -5mn + 3m - n\]
   i) \(2p - 3p + 3x - 3x + 5xy - 8xy\)
      \[= -p - 3xy\]

Exercise 2
WB page 79

1. a) \(3(4) + 7\)
   \[= 12 + 7 = 19\]
   b) \(4(4) + 2 - (3)(4)\)
   \[= 18 - 12 = 6\]
   c) \(\frac{(2)(4)}{6} + 5 - 4\)
   \[= \frac{8}{6} + 5 - 4\]
   \[= 8 + 30 - 24\]
   \[= 14\]

2. a) \(4(2) + 3(4)\)
   \[= 8 + 12\]
   \[= 20\]
b) \[3(2)(2) + 5(4) = 3(4 + 20) = 12 + 60 = 72\]

c) \[\frac{4(4)}{2(2)} + 3(4) - 6 = 4 + 12 - 6 = 10\]

**Exercise 3**  
WB page 80

1. \[x + 3 = 9\]
   \[x + 3 - 3 = 9 - 3\]
   \[x = 6\]

2. \[8p = 72\]
   \[\frac{8p}{8} = \frac{72}{8}\]
   \[p = 9\]

3. \[\frac{y}{7} = 4\]
   \[\frac{y}{7} \times \frac{7}{1} = 4 \times 7\]
   \[y = 28\]

4. \[25 - n = 14\]
   \[26 - n + n = 14 + n\]
   \[25 = 14 + n\]
   \[25 - 14 = 14n - 14\]
   \[n = 11\]

5. \[m - 5 = 11\]
   \[m - 5 + 5 = 11 + 5\]
   \[m = 16\]

6. \[3m = 27\]
   \[\frac{3m}{3} = \frac{27}{3}\]
   \[m = 9\]

7. \[\frac{p}{4} = q\]
   \[\frac{p}{4} \times \frac{4}{1} = q \times 4\]
   \[p = 4q\]
8. \( x - 7 = 19 \)
   \[ x - 7 + 7 = 19 + 7 \]
   \[ x = 26 \]

9. \( \frac{14}{x} = 2 \)
   \[ \frac{14}{x} \times \frac{x}{1} = 2 \times x \]
   \[ 14 = 2x \]
   \[ \frac{14}{2} = \frac{2x}{2} \]
   \[ x = 7 \]

10. \( 5 = z - 7 \)
    \[ 5 + 7 = z - 7 + 7 \]
    \[ 12 = z \]
    \[ z = 12 \]

11. \( 19 + y = 23 \)
    \[ 19 + y - 19 = 23 - 19 \]
    \[ y = 4 \]

12. \( y + 7 = 18 \)
    \[ y + 7 - 7 = 18 - 7 \]
    \[ y = 9 \]

**Exercise 4**

1. a) \( x + 4 = 17 \)
   \[ x = 13 \]

   b) \( \frac{x}{3} = 8 \)
   \[ x = 24 \]

   c) \( x - 6 = 13 \)
   \[ x = 19 \]

2. a) \( \frac{48}{6} = x \)
   \[ x = 8 \]
   The cost of each can of cat food is GH₵ 8.

3. \( 4 \times 75 = 300 \).
   So, Araba earned GH₵ 300 during the holiday.

4. \( x + 14 = 25 \)
   \[ x = 11 \]
   So, Aba volunteered 11 hours in the second week.

5. \( 33 - 8 = x \) or \( 8 + y = 33 \)
   \[ x = 25 \quad y = 25 \]
   So, Eba’s distance was 25 cm.
6.  \[12 + y = 25\]
\[y = 13\]
So, Kamla’s friend has 13 cards.

7.  \[\frac{1}{3y} = 15\]
\[y = 45\]
So, the length of the pool is 45 m.

Exercise 5  

WB page 84

1.  
   a) There are 23 books in total on two shelves. There are 5 books on one shelf. How many books are on the second shelf?
   
   b) A number minus 7 = 18. What is the number?

2.  
   a)  
   \[
   \begin{align*}
   \text{\textcolor{red}{\square}} + \text{\textcolor{gray}{\bigcirc}} - \text{\textcolor{blue}{\triangle}} &= 5.725 \\
   \text{\textcolor{red}{\square}} &= 2.725, \quad \text{\textcolor{gray}{\bigcirc}} &= 5.275 \text{ and } \text{\textcolor{blue}{\triangle}} &= 2.275
   \end{align*}
   \]

   b)  
   \[
   \begin{align*}
   5 + 5 + 5 &= 15 \\
   1 - 5 + 7 &= 11 \\
   1 + 5 + 7 &= 13 \\
   \text{\textcolor{red}{\triangle}} &= 1, \quad \text{\textcolor{blue}{\square}} = 5, \quad \text{\textcolor{green}{\bigcirc}} = 7
   \end{align*}
   \]
Strand 3: Geometry and measurement

B6 3.1.1
Understand prisms

Exercise 1  
1. 

2.  
   a) cylinder  
   b) pyramid

3. From left to right: triangular pyramid; rectangular prism; hexagonal prism; rectangular prism

Exercise 2  
1.

<table>
<thead>
<tr>
<th>Type of solid</th>

**Exercise 5**  
WB page 92
1. Learners own work
2. Learners’ own work
3. Learners’ own work
B6.3.3.1

Describe the position of objects in space, using the cardinal points

Exercise 1  
WB page 93

1. First row, from left to right: North; South; East; West  
   Second row, from left to right: North-east; North-west;  
   South-east; South-west

2. a) South-west  
   b) South-east  
   c) North-east  
   d) South-east  
   e) North-west  
   f) North-east  
   g) South-west  
   h) South

3. a) East  
   South-west  
   b) South-west  
   East  
   c) South  
   North-west  
   d) East  
   South-west

4. a) North-east  
   b) North  
   c) South-east  
   d) South-west  
   e) South-east  
   f) South  
   g) North-east

Exercise 2  
WB page 96

1. a) From the courtyard (H), go south-east to the school office (F).  
   b) From the boys’ toilet (E), go south-west to the Grade 4–6 area (B).  
   c) From the parking area (I), go south-east to the Grade 7 area (C).  
   d) From the Grade 7 area (C), go south-west to the sports field (G).  
   e) From the Grade 6 area (B), go east to the Grade 7 area (C).
B6.3.3.5
Perform a single translation on a 2D shape

**Exercise 1**

1. a) Horizontal line of reflection
   b) Vertical line of reflection
   c) Horizontal line of reflection
   d) Diagonal line of reflection

2. [Images of diagrams showing translations]
Exercise 2

1. a) 
   \[ (-\frac{2}{3}) \]

b) 
   \[ (\frac{4}{2}) \]
2. a) \((-\frac{2}{6})\)  
   b) \((0 \ -13)\)

Exercise 3

1. a) 

Strand 3: Geometry and measurement
b) \[ x = 2 \]

c) \[ x = y \]
2. a) $y = \frac{x - 2}{2} = 0$

b) $y = \frac{x - 1}{-1} = 0$
3.  
   a) \( a: y = -1 \)  
   b) \( b: y = 3 \)  
   c) \( c: x = -5 \)  
   d) \( d: y = x \)
4. a) 

b) 

c) 

d) 

5. a) $x = 1$
b) $y = x$

**Exercise 4**

1. a) 6 units to the left and 3 units up
b) 4 units to the right and 2 units down
2. a) 

\[ \begin{array}{c}
  \text{y} \\
  \text{x}
\end{array} \]

b) 

\[ \begin{array}{c}
  \text{y} \\
  \text{x}
\end{array} \]

c) 

\[ \begin{array}{c}
  \text{y} \\
  \text{x}
\end{array} \]

d) 

\[ \begin{array}{c}
  \text{y} \\
  \text{x}
\end{array} \]

3. a) \( \begin{pmatrix} 10 \\ 0 \end{pmatrix} \)

b) \( \begin{pmatrix} 9 \\ 7 \end{pmatrix} \)

c) \( \begin{pmatrix} -4 \\ -5 \end{pmatrix} \)

d) \( \begin{pmatrix} 11 \\ 3 \end{pmatrix} \)

e) \( \begin{pmatrix} 0 \\ 16 \end{pmatrix} \)

f) \( \begin{pmatrix} 1 \\ -13 \end{pmatrix} \)
4. a) 

\[
y = 1 \quad y = -2
\]

(b) 

(c) 

(d) \( \left( \frac{3}{2} \right) \)
Strand 4: Data

B6 4.1.1
Create, label and interpret line graphs

Exercise 1

1. a) Distance (km) | 18 | 25 | 35 | 46 | 51
   Week           | 1  | 2  | 3  | 4  | 5  

b) y-axis

Jojo’s training for the Berlin marathon

Distance (km) | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 | 55 | 60 | 65 |
- axis

x-axis

Distance (km)

0 1 2 3 4 5 6

1

Week 4
2. a) Time it takes for the oven to heat up

<table>
<thead>
<tr>
<th>x-axis</th>
<th>y-axis</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>200</td>
</tr>
<tr>
<td>1</td>
<td>180</td>
</tr>
<tr>
<td>2</td>
<td>160</td>

<tr>
<td>3</td>
<td>20</td>
</tr>
<tr>
<td>4</td>
<td>0</td>
</tr>
</tbody>
</table>

b) 5 minutes
c) Between 2 and 3 minutes
d) Yes, up to the point (temperature) of the oven’s temperature capacity.

Exercise 2

1. a) Continuous data can take any value in the range of values, so it is represented using a line graph.
b) Discrete data can be counted. Discrete data is represented by using a series of points on a graph.

2. Line graph: mass of new-born puppies
   Points: number of learners in the school

3.

<table>
<thead>
<tr>
<th>Data</th>
<th>Continuous or discrete</th>
<th>How to represent data</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Number of soccer games won in the season</td>
<td>Discrete</td>
<td>Series of points</td>
</tr>
<tr>
<td>b) Growth of a plant in a year</td>
<td>Continuous</td>
<td>Line graph</td>
</tr>
<tr>
<td>c) Number of sneaker sold at a shoe store</td>
<td>Discrete</td>
<td>Series of points</td>
</tr>
<tr>
<td>d) Distance travelled in car</td>
<td>Continuous</td>
<td>Line graph</td>
</tr>
</tbody>
</table>
4. a) Discrete data. The data values are whole numbers.
   b)

<table>
<thead>
<tr>
<th>Data</th>
<th>Continuous or discrete</th>
<th>How to represent data</th>
</tr>
</thead>
<tbody>
<tr>
<td>e)</td>
<td>Depth of deep-sea diver below sea level</td>
<td>Continuous</td>
</tr>
<tr>
<td>f)</td>
<td>Time spend on social media per week</td>
<td>Continuous</td>
</tr>
</tbody>
</table>

Exercise 3

1. a) 38 people
   b) 10 people
   c) The number of adults decreased as the weeks go by.
   d) Between 4 and 6 people

2. a) 6:00 p.m.
   b) 2.75 mm
   c) Approximately 5.25 mm
   d) Approximately 3 mm

3. a) He travelled 45 km from home.
   b) He stopped to rest and drink water.
   c) He travelled back home.
   d) During the first hour and then again between the 6th and 7th hour and the 7th and 8th hour.
   e) 10 km
   f) 110 km
   g) He became tired; he had to cycle uphill for certain distances; etc.
B6.4.1.2
Select, justify and use appropriate methods of collecting data

Exercise 1  

1. a) 

<table>
<thead>

b) A4 Sheets  
c) Plastic wrap  
d) 77 items  
e)  

**Items sold at a stationery store in one weekend**
B6.4.2.2
Understand probability

Exercise 1

1.

<table>
<thead>
<tr>
<th>Impossible</th>
<th>Very unlikely</th>
<th>Unlikely</th>
<th>Even chance</th>
<th>Likely</th>
<th>Very likely</th>
<th>100% Certain</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>0</td>
<td>0</td>
<td></td>
<td>0</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

2. a) Certain
   b) Impossible
   c) Likely
   d) Likely
   (Answers to (c) and (d) will depend on learner’s own perception and experiences.)
   e) Likely

Exercise 2

1. a) (i) \( \frac{2}{12} = \frac{1}{6} \)
   (ii) \( \frac{5}{12} \)
   b) \( \frac{1}{8} \)
   c) \( \frac{0}{21} = 0 \)
   d) Theoretical probability = \( \frac{1}{8} \);
      experimental probability = 0

2. a)–b) Learners’ own work
   c) (i) \( \frac{2}{6} = \frac{1}{3} \)
      (ii) Learners’ own answers
      (iii) Theoretical probability: \( \frac{1}{6} + \frac{1}{6} = \frac{2}{6} = \frac{1}{3} \)
      (iv) \( \frac{2}{6} = \frac{1}{3} \)

3. a) \( \frac{10}{50} = \frac{1}{5} \)
   b) \( \frac{1}{6} \)
   c) \( \frac{40}{50} = \frac{4}{5} \)
d) $\frac{5}{6}$

\[ \frac{28}{50} = \frac{14}{25} \]

f) $\frac{3}{6} = \frac{1}{2}$

4. a) $\frac{1}{2}$

b) $\frac{1}{2}$

5. a) $\frac{12}{50} = \frac{6}{25}$

b) $\frac{12}{50} + \frac{18}{50} = \frac{30}{50} = \frac{3}{5}$

c) $\frac{20}{50} = \frac{2}{5}$

6. a) (i) $\frac{15}{100} = \frac{3}{20}$

(ii) $\frac{20}{100} = \frac{1}{5}$

b) (i) 50 people

(ii) 80 people
