Introduction

God is the creator of all things around us. Some of them are living things and other non-living things. Mankind uses some of the things created by God to make life meaningful and comfortable.

Points to note
An attribute is a quality or characteristic given to a person, group, or some other thing.

1. God Is Infinite – He is Self-Existing, Without Origin.
2. God is Immutable – He never changes.
3. God is Self-Sufficient – He has no needs.
4. God is Omnipotent – He is all powerful.
5. God is Omniscient – He is all knowing.
6. God is Omnipresent – He is always everywhere.
7. God is Wise – He is full of perfect, unchanging wisdom.
8. God is Faithful – He is infinitely, unchangingly true.
9. God is Good – He is infinitely, unchangeably kind and full of good will.
10. God is Just – He is infinitely, unchangeably just.
11. God is Merciful – He is infinitely, unchangeably compassionate and kind.
12. God is Gracious – God is infinitely inclined to spare the guilty.
13. God is Loving – God infinitely, unchangeably loves us.
14. God is Holy – He is infinitely, unchangeably perfect.
15. God is Glorious – He is infinitely beautiful and great.
In groups, ask learners to mention the attributes of God that make Him a sustainer of life.

Some of the attributes of God as sustainer of life include:

● God provides air in abundance for all living things.
God is the creator of all things around us. Some of them are living things and other non-living things. Mankind uses some of the things created by God to make life meaningful and comfortable.

Indicators indicate the specific things that learners need to know and be able to demonstrate in order to achieve the content standards. Modules (lessons) are generated from these indicators.

Core Competencies
The universal core competencies as stated under each sub-strand in the curriculum are outlined here.

Subject Specific Practices
This is the specific methods or practices which are used to teach a particular lesson under the sub-strand.

Other Useful Materials
This states additional resources that the facilitator will need to help teach.

Introduction
This gives the teacher an overview of what the particular sub-strand entails. Some have introductory activities prior to a lesson.
Activities to support learners
This section offers the facilitator extra activities to do with learners after the main activities under each sub-strand. Role-play activities are also captured here.

Activities to support learners
1. Using pictures assist learners to identify man-made and natural things in their environment
2. Guide learners to draw school boy and girl sweeping the school compound
3. Ask learners to tell the things they do to keep the environment clean
4. Assist learners to draw and colour a clean environment.
5. Guide learners to draw a police officer on duty in the community
7. Ask learners to identify four ways of protecting the land.

Evaluation Exercise

Expected Answers
(Refer to Learners Book 2, pages 46 and 49 for exercises and Activities)

Exercise 1
Q1. Tree, fish, sun flower, air
Q2. Bus, chairs, books, ships, spoon.

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

Suggested Homework
In every sub-strand, an exploration of the concepts learned in the classroom is further extended to the home. The series suggests relevant home activities that help learners to augment and consolidate what has been learnt in the classroom and its real life application where necessary.

Suggested homework
1. Draw two man-made things and two natural things found in your school compound.

Answers
Expected answers are provided for all exercises under every sub-strand. Where answers are to vary from one learner to the other, it is mentioned.

Reflections
After every lesson, the facilitator is expected to engage learners to reflect on 3 key outcomes. This will help the teacher plan well for the next lesson.
The user-friendly Learner’s Book tackles the new standard-based Mathematics curriculum features and criteria with a clear and logical structure that incorporates the following features.

### Strand starter
There are five “strands” in the Learner's Book – one for each of the Our World Our People curriculum. This precedes the beginning of contents under each strand.

### Header labels
- **Strand:** This feature indicates the particular strand from which the lessons are developed.
- **Sub-strand:** These are larger groups of related topics to be studied under each strand.
- **Indicator:** This feature specifies the indicator that the lessons were developed from.

### Key words
- build subject-specific vocabulary gradually, giving learners the confidence to understand it clearly and apply it in context and through different exercises.

### ICT boxes
- include research activities
- emphasise the core competencies

### Exercise
- learners practice and consolidate what they have been taught. This provides an opportunity for all learners to strengthen their newly acquired knowledge.

### ICT
Watch videos and pictures on different weather conditions on the internet.

---

**Exercise 1**

1. Your father and mother are your ...
   a. pastors
   b. leaders
   c. parents
   d. friends

2. Our siblings are our brothers and ...
   a. uncles
Activities and exercise
• incorporate accurate and current individual, pair and group work activities that help learners to explore and practise what they have learnt
• incorporate exercises that allow learners to answer questions about what they have learnt and consolidate learning
• address the syllabus content standards and core competencies
• are representative of the indicators and exemplars
• have instructions and text that are consistent and clearly presented to learners
• promote problem-solving and subject understanding

Text and content
• use language that is appropriate to the level, age, knowledge and background of the learners
• are representative of Ghana’s diversity
• have a good gender balance and portray no gender stereotypes

Illustrations and photos
• are high-quality and representative of Ghana’s diversity
• balance the text on every page and add to learners’ understanding of the content
• have captions and labels that are simple, relevant, appropriate, and clear
• reflect a variety of learners (including learners with special needs)
• show no gender stereotypes

Homework
• Another opportunity is provided for learners to practice and consolidate what they have been taught. This provides an opportunity for all learners to relate the knowledge acquired to their environment.

Activity 2
1. Guide learners to role-play the functions of the various members in the family example. Learners play the role of a father, mother, etc.

2. Teacher encourages learners to undertake their routine responsibilities without being commanded or prompted.

As you go about the school compound or town, look closely at, (observe) the shapes of houses, chapels and school buildings in the community. Sketch any two of what you see in your notebooks. Present your work to your teacher.
INTRODUCTION

The **Our World and Our People (OWOP)** is an integrated subject that brings together facts, ideas and concepts or generalization from interrelated subjects of the Social Sciences. The discipline, Our World and Our People, aims at producing a morally upright Ghanaian, who is responsible and capable of maintaining a healthy lifestyle and preserving their environment for sustainable development.

The subject being the first of its kind in the history of Ghana's education seeks to explore social, cultural/religious, geographical, and the technological space to develop the cognitive, affective and psychomotor domains of the learner.

The subject was specifically designed to focus on standards-based assessment of the learner that applies learner-centered approach to provide opportunity for the learner to develop their knowledge and skills in the 4Rs of **Reading, cR eativity, wR iting and aRithmetic**.

The objective of this Teacher’s Guide is to make teaching and learning more interactive, practical, useful and to bring out the ingenuity of teacher professionalism in the teacher to produce well equipped learners for national development.

**Philosophy of Teaching Our World and Our People**

OWOP provides opportunity for teachers to adopt thematic and creative pedagogic approaches such as talk for learning, project-based learning, games, modelling, questioning, songs, storytelling and role-play necessary for achieving conducive learning environment and developing learners into creative, honest and responsible citizens. The OWOP classrooms should be learning-centred where the teacher, acting as a facilitator, introduces the topics for the day and assists learners to describe and analyse issues raised. In addition, the teacher helps learners to interact and share ideas among themselves based on their knowledge of Ghana and the world. The class will be encouraged to explore topics through **enquiry-based questions**. The OWOP curriculum is underpinned by five themes broken into specific learning areas. The teacher should emphasise these important areas in the day-to-day learning as they are aimed at promoting higher order thinking among learners.

**Philosophy of Learning Our World and Our People**

Through the learning of Our World and Our People learners will specifically acquire:

1. **Critical thinking and problem-solving skills** to be able to compare and contrast, analyse, evaluate and apply geographical knowledge with little or no supervision
2. **Creative thinking skills** to be able to reconstruct important information confidently
3. **Digital literacy skills** to be able to use IT tools and resources efficiently for investigations and project works
4. **Effective communication skills** to be able to share information at various levels of interaction
5. **Values** to live as global citizens capable of learning about other peoples and cultures of the world.

**General Aim**

The curriculum, Our World and Our People, aims at producing a morally upright Ghanaian, who is responsible and capable of maintaining a healthy lifestyle and preserving their environment for sustainability.

**Subject Specific Aims**

The aims of the Our World and Our People curriculum are to enable learners to:

1. Develop awareness of their creator and the purpose of their very existence.
2. Appreciate themselves as unique individuals.
3. Exhibit sense of belonging to the family and community.
4. Demonstrate responsible citizenship.
5. Explore and show appreciation of the interaction between plants, animals and their physical environment;
6. Show love and care for the environment.
7. Develop attitudes for a healthy and peaceful lifestyle.
8. Appreciate use ICT as a tool for learning.
Instructional Expectations

Our World and Our People provides opportunity for teachers to:

• adopt thematic and creative pedagogic approaches such as talk for learning, project-based learning, games, modelling, questioning, songs, storytelling and role-play necessary for achieving learner-centred classrooms;

• nurture and develop learners into creative, honest and responsible citizens;

• provide opportunity for learners to develop their skills in the 4Rs of Reading, cReativity, wRiting and aRithmetic through thematic and creative approaches to learning. Learning and learning progression are central to the OWOP curriculum;

• adopt collaborative approaches to lesson preparation within and across disciplines and grade levels to develop communities of OWOP learners;

• use multiple methods to systematically gather data about learners’ understanding and ability in order to guide the teaching and learning of OWOP;

• put necessary arrangements in place to provide feedback to both learners and parents.

Content Standards indicate what all learners should know, understand and be able to do. Indicators are clear statements of specific things learners should know and be able to do within each content standard. Exemplars refer to support and guidance, which clearly explain the expected outcomes of an indicator and suggest what teaching and learning activities could take to support the facilitators/teachers in the delivery of the curriculum.

The curriculum for Basic 2 is organised under five strands with twenty sub-strands:

Strand 1: ALL ABOUT US
Sub-strand 1: Nature of God
Sub-strand 2: Myself
Sub-strand 3: My Family and the Community
Sub-strand 4: Home and School

Strand 2: ALL AROUND US
Sub-strand 1: The Environment and the Weather
Sub-strand 2: Plants and Animals
Sub-strand 3: Map Making and Land Marks
Sub-strand 4: Population and Settlement

Strand 3: OUR BELIEFS AND VALUES
Sub-strand 1: Worship
Sub-strand 2: Festivals
Sub-strand 3: Basic Human Rights
Sub-strand 4: Being a Leader

Strand 4: OUR NATION GHANA
Sub-strand 1: Being a Citizen
Sub-strand 2: Authority and Power
Sub-strand 3: Responsible use of Resources
Sub-strand 4: Farming in Ghana

Strand 5: MY GLOBAL COMMUNITY
Sub-strand 1: Our Neighbouring Countries
Sub-strand 2: Introduction to Computing
Sub-strand 3: Sources of Information
Sub-strand 4: Technology in Communication

Time allocation

For effective learning to take place within specified timeframe, 30 minutes as on time table be adhered to for lesson for the day. Remember that other lessons will be taught the same day with OWOP. Two periods of 60 minutes could be allocated for practical lessons, revision and demonstrations where needed due to time consuming factor during class activity lessons. If
possible, there should be internal arrangements for more time for activities outside the classroom such as excursions and other educational visits. This will make learners have enough time for practical lessons.

Class management

Most teachers in Ghana teach large classes. Such classes are in the range of 40 to 100 learners or more. The teachers, based on their professional experience over the years have developed skills in classroom methodology. Here are a few reminders about whole class, group, pair and individual work that could be helpful with large classes.

Whole class teaching

Much of your teaching, especially when your class is large, will involve you standing at the front of the class explaining and listening to your learners. You can set out facts and concepts which everyone can understand. However, your class will vary in ability. More able learners should be given additional tasks to stretch their capabilities while those who find understanding more difficult should be given the time and attention they need.

When you introduce a topic make sure you use learners’ existing knowledge and build upon it. The basic information for your lesson is in the text. If you are going to ask learners to read for themselves (at home or in class or to read out loud), work out during your lesson planning which words will be difficult for them to understand and explain these first. Make sure that all your learners have understood your explanation and give time to those having difficulty as well as talking and listening you will find other activities can be very valuable during whole-class teaching, for example:

Group work

Class teaching is large group work but sometimes there are advantages in working in pairs or groups of four to six learners: some children make more progress when working in a group of the same ability. On other occasions more able learners can help those who are not quite so quick at understanding. Groups of friends and groups working on different topics are other possible divisions that you could make.

For group work to be successful some thought must be given to the organization of class furniture. In most of our classrooms we still see rows of desks with several children to each desk. The classrooms are also often crowded so that it not easy to move the desks around. Whatever the situation some kind of group can be organized. At its most basic the group will have to be learners at one desk. It might be possible for those at one desk to turn around to face those at the desk behind.

There are many advantages in allowing a number of children to consider a topic, work jointly and bring their findings back to the whole class: each group will think in a slightly different way and have different experiences to share. Sometimes learners are better able to discuss sensitive areas in same-sex groups. Such work encourages co-operation and mutual support. Individual groups can study a picture together, or write a poem or discuss a topic like pollution in their village. You need to ensure that there is follow-up to group work so that work is not done in isolation but is instead considered by the class as a whole.

Pair work

Learners are often instructed to work in pairs – either with their desk mate, or with a partner. This is an ideal opportunity for learners to assist each other, and for them to assess each other. Working with a desk mate offers the least classroom disturbance. The learners are already seated side-by-side. They ask and answer questions during Picture talk, and they discuss the readings before they write comprehension answers individually.

Working with a partner that you have allocated to the learner means that you can pair a slower learner with a faster learner, so that they can help one another. You may also choose to pair learners of similar abilities together, so that they can proceed more quickly with the work, while you assist the slower pairs.

Learner self-study

There will be times when you want the class to work as individuals to allow them to become familiar with material you have given them and to allow you to work with Learners of different abilities. It is worth bearing in mind that while there is a need for Learners to learn how to read and study on their own; there are also dangers
in this approach. It is essential that the material they read is understandable to them, and that your attention is still focused on the class to ensure that all learners are using the time to read and not misbehave. Use additional material at different levels to ensure that some learners do not finish more quickly than others.

Teaching tip
One of the most important skills in classroom management is the ability to ensure your learners are occupied for the whole lesson. If a group has finished its task and has nothing else to do it is likely to become disruptive. Break up your lesson and make sure it has several different parts:
- full class work
- individual work
- practical activities

Learning domains (expected learning behaviours)

In order to achieve Standards-based Assessment, teaching and learning should be measured in line with three integrated learning domains. These are discussed in the following text.

Knowledge, Understanding and Application
Under this domain, learners acquire knowledge through learning experiences. They may also show understanding of concepts by comparing, summarising, re-writing etc. in their own words and constructing meaning from instruction. The learner may also apply the knowledge acquired in some new context. At a higher level of learning behaviour, the learner may be required to analyse an issue or a problem. At a much higher level, the learner may be required to synthesise knowledge by integrating a number of ideas to formulate a plan, solve a problem, compose a story, or a piece of music. Further, the learner may be required to evaluate, estimate and interpret a concept. At the last level, which is the highest, learners may be required to create, invent, compose, design and construct. These learning behaviours “knowledge”, “application” “understanding”, “analysis”, “synthesis”, ‘evaluation’ and ‘creation’, fall under the integral domain “Knowledge, Understanding and Application”.

In this curriculum, the learning indicators are stated with action verbs to show what the learner should know and be able to do. For example, ‘The learner will be able to describe something’. Being able to “describe” something after teaching and learning has been completed means that the learner has acquired “knowledge”. Being able to explain, summarise, and give examples etc. means that the learner has understood the concept taught.

Similarly, being able to develop, defend, etc. means that the learner can “apply” the knowledge acquired in some new context. You will note that each of the indicators in the curriculum contains an “action verb” that describes the behaviour the learner will be able to demonstrate after teaching and learning has taken place. “Knowledge, Understanding and application” is a domain that should be the prime focus of teaching and learning in schools. Teaching in most cases tends to stress knowledge acquisition to the detriment of other higher-level behaviours such as application, analysis etc.

Each action verb in any indicator indicates the underlying expected outcome. Read each indicator carefully to know the learning domain towards which you have to teach. The focus of the new form of teaching and learning, as indicated in this curriculum, is to move teaching and learning from the didactic acquisition of “knowledge” where there is memorisation, heavy reliance on formulae, remembering facts without critiquing them or relating them to real world — surface learning — to a new position called — deep learning. Learners are expected to deepen their knowledge through activities that involve critical thinking to generate creative ideas to solve real life problems in their school lives and later in their adult lives. This is the position where learning becomes beneficial to the learner.

The explanation and key words involved in each of the learning domains are as follows:

Knowing: This is the ability to remember, recall, identify, define, describe, list, name, match, state principles, facts and concepts. Knowledge is the ability to remember or recall material already learnt and this constitutes the lowest level of learning.
Introduction

Understanding: The ability to explain, summarise, translate, rewrite, paraphrase, give examples, generalise, estimate or predict consequences based upon a trend. Understanding is generally the ability to grasp the meaning of some concept that may be verbal, pictorial or symbolic.

Applying: This dimension is also referred to as “Use of Knowledge”. The ability to use knowledge or apply knowledge, apply rules, methods, principles, theories, etc. to situations that are new and unfamiliar. It also involves the ability to produce, solve, plan, demonstrate, and discover among others.

Skills and processes
These are specific activities or tasks that indicate performance or proficiency in a given learning area. These skills and processes include Observing, Classifying, Comparing, Communicating/Reporting, Predicting, Analysing, Generating possibilities, Evaluating, Designing, Interpreting, Recording, Generalising.

Attitudes
To be effective, competent and reflective citizens, who will be willing and capable of solving personal and societal problems, learners should be exposed to situations that challenge them to raise questions and attempt to solve problems. Learners therefore need to acquire positive attitudes, values and psychosocial skills that will enable them participate in debates and take a stand on issues affecting them and others. The Our World and Our People curriculum thus focuses on the development of these attitudes, values and skills:

Commitment: the determination to contribute to national development
Tolerance: the willingness to respect the views of others
Patriotism: the readiness to defend the nation.
Flexibility in ideas: the willingness to change opinion in the face of more plausible evidence.
Respect for evidence: the willingness to collect and use data on one’s investigation and also have respect for data collected by others.
Reflection: the habit of critically reviewing ways in which an investigation or observation has been carried out to see possible faults and other ways in which the investigation or observation can be improved upon.
Comportment: the ability to conform to acceptable societal norms.

Co-operation: the ability to work effectively with others.
Responsibility: the ability to act independently and make decisions; morally accountable for one’s action; capable of rational conduct.
Environmental Awareness: the ability to be conscious of one’s physical and socio-economic surroundings.

Respect for the Rule of Law: the ability to obey the rules and regulations of the land.

Values
At the heart of this curriculum is the belief in nurturing honest, creative and responsible citizens. As such, every part of this curriculum, including the related pedagogy should be consistent with the following set of values.

Respect: This includes respect for the nation of Ghana, its institutions, laws, the culture and respect among its citizens and friends of Ghana.
Diversity: Ghana is a multicultural society in which every citizen enjoys fundamental rights and responsibilities. Learners must be taught to respect the views of all persons and to see national diversity as a powerful force for nation development. The curriculum promotes social cohesion.
Equity: The socio-economic development across the country is uneven. Consequently, it is necessary to ensure an equitable distribution of resources based on the unique needs of learners and schools. Ghana’s learners are from diverse backgrounds, which require the provision of equal opportunities to all, and that all strive to care for each other both personally and professionally.

Commitment to achieving excellence: Learners must be taught to appreciate the opportunities provided through the curriculum and persist in doing their best in whatever field of endeavour as global citizens. The curriculum encourages innovativeness through creative and critical thinking and the use of contemporary technology.

Teamwork/Collaboration: Learners are encouraged to become committed to team-oriented working and learning environments. This also means that learners should have an attitude of tolerance to be able to live peacefully with all persons.

Truth and Integrity: The curriculum aims to develop learners into individuals who will consistently tell the truth irrespective of the consequences. In addition, it aims to make
Introduction

them become morally upright with the attitude of doing the right thing even when no one is watching be true to themselves and be willing to live the values of honesty and compassion. Equally important, the ethos or culture of the work place, including integrity and perseverance must underpin the learning processes to allow learners to see and apply skills and competencies in the world of work.

Pedagogical Approaches

These include the approaches, methods, strategies, appropriate relevant teaching and learning resources for ensuring that every learner benefits from teaching and learning process.

The curriculum emphasises the: creation of learning-centred classrooms through the use of creative approaches to ensure learner empowerment and independent learning; positioning of inclusion and equity at the centre of quality teaching and learning; use of differentiation and scaffolding as teaching and learning strategies for ensuring that no learner is left behind; use of Information Communications Technology (ICT) as a pedagogical tool; identification of subject specific instructional expectations needed for making learning in the subject relevant to learners; integration of assessment as learning, for learning and of learning into the teaching and learning processes and as an accountability strategy; and questioning techniques that promote deep learning.

Learning-Centered Pedagogy

The learner is at the centre of learning. At the heart of the national curriculum for change and sustainable development is the learning progression and improvement of learning outcomes for Ghana’s young people with a focus on the 4Rs – Reading, Writing, Arithmetic and Creativity. It is expected that at each curriculum phase, learners would be offered the essential learning experiences to progress seamlessly to the next phase. Where there are indications that a learner is not sufficiently ready for the next phase, a compensatory provision through differentiation should be provided to ensure that such a learner is ready to progress with his/her cohort. At the primary school, the progression phases are B1 to B2 and B1 to B6.

The Curriculum encourages the creation of a learning centered classroom with the opportunity for learners to engage in meaningful “hands-on” activities that bring home to the learner what they are learning in school and what they know from outside of school. The learning centered classroom is a place for the learners to discuss ideas through the inspiration of the teacher. The learners then become actively engaged in looking for answers, working in groups to solve problems. They also research for information, analyse and evaluate information. The aim of the learning-centered classroom is to enable learners to take ownership of their learning. It provides the opportunity for deep and profound learning to take place.

The teacher as a facilitator needs to create a learning environment that:
• makes learners feel safe and accepted;
• helps learners to interact with varied sources of information in a variety of ways;
• helps learners to identify a problem suitable for investigation through project work;
• connects the problem with the context of the learners’ world so that it presents realistic opportunities for learning;
• organises the subject matter around the problem, not the subject;
• gives learners responsibility for defining their learning experience and planning to solve the problem;
• encourages learners to collaborate in learning; and
• expects all learners to demonstrate the results of their learning through a product or performance.

It is more productive for learners to find answers to their own questions rather than teachers providing the answers and their opinions in a learning-centered classroom.

The content with reference to learner’s activities in class and outside classroom focusses on learner-centered pedagogy, which emphasizes active participation in class activities, making teaching and learning more practical and toward achieving positive learning outcomes that largely benefit the learner.

Effective teaching and learning in Our World and Our People depends upon the use of actively participatory methods including the following:
• Discussion
• Drama, role play and simulation
• Song and dance
• Case studies and interviews
• Research
• Mimic
• e-Learning
• Group work
• Question and answer
• Games.

Inclusion
Inclusion is ensuring access and learning for all learners especially those disadvantaged. All learners are entitled to a broad and balanced curriculum in every school in Ghana. The daily learning activities to which learners are exposed should ensure that the learners' right to equal access and accessibility to quality education is met. The Curriculum suggests a variety of approaches that address learners’ diversity and their special needs in the learning process. When these approaches are effectively used in lessons, they will contribute to the full development of the learning potential of every learner. Learners have individual needs and learning experiences and different levels of motivation for learning. Planning, delivery and reflection on daily learning experiences should take these differences into consideration.

The curriculum therefore promotes: learning that is linked to the learner’s background and to their prior experiences, interests, potential and capacities learning that is meaningful because it aligns with learners’ ability (e.g. learning that is oriented towards developing general capabilities and solving the practical problems of everyday life); and the active involvement of the learners in the selection and organisation of learning experiences, making them aware of their importance and also enabling them to assess their own learning outcomes.

Differentiation and scaffolding
This curriculum is to be delivered through the use of creative approaches. Differentiation and scaffolding are pedagogical approaches to be used within the context of the creative approaches:

Differentiation is a process by which differences (learning styles, interest and readiness to learn) between learners are accommodated so that all learners in a group have the best possible chance of learning. Differentiation could be by task, support and outcome. Differentiation as a way of ensuring each learner benefits adequately from the delivery of the curriculum can be achieved in the classroom through:

i) task
ii) support from the Guidance and Counselling Unit and
iii) learning outcomes.

Differentiation by task involves teachers setting different tasks for learners of different abilities. Example in sketching the plan and shape of their classroom some learners could be made to sketch with free hand while others would be made to trace the outline of the plan.

Differentiation by support involves the teacher giving the needed support and referring weak learners to the Guidance and Counselling Unit for academic support.

Differentiation by outcome involves the teacher allowing learners to respond at different levels. Weaker learners are allowed more time for complicated tasks.

Scaffolding in education refers to the use of variety of instructional techniques aimed at moving learners progressively towards stronger understanding and ultimately greater independence in the learning process. It involves breaking up the learning task, experience or concepts into smaller parts and then providing learners with the support they need to learn each part. The process may require a teacher assigning an excerpt of a longer text to learners to read and engaging them to discuss the excerpt to improve comprehension. The teacher goes ahead to guide them through the key words/vocabulary to ensure learners have developed a thorough understanding of the text before engaging them to read the full text.

Common scaffolding strategies available to the teacher are:
• giving learners a simplified version of a lesson, assignment, or reading, and then gradually increases the complexity, difficulty, or sophistication over time;
• describing or illustrating a concept, problem, or process in multiple ways to ensure understanding;
• giving learners an exemplar or a model of an assignment, they will be asked to complete;
• giving learners a vocabulary lesson before they read a difficult text;
• describing the purpose of a learning activity clearly and the learning goals they are expected to achieve; and
• describing explicitly how the new lesson builds on the knowledge and skills learners were taught in a previous lesson.

Core competencies

Through the pedagogy and learning areas envisaged for our OWOP as a body of knowledge in the school curriculum, it is expected that as is the case for other subjects in the school curriculum learners will demonstrate the following universal and core competencies:

**Critical thinking and problem solving (CP)**
Develop learners' cognitive and reasoning abilities to enable them to analyse issues and situations, leading to the resolution of problems. This skill enables learners to draw on and demonstrate what they have learned and from their own experiences analyse situations and choose the most appropriate out of a number of possible solutions. It requires that learners embrace the problem at hand, persevere and take responsibility for their own learning.

**Creativity and Innovation (CI)**
Learners acquire entrepreneurial skills through their ability to think about new ways of solving problems and developing technologies for addressing the problem at hand. It requires ingenuity of ideas, arts, technology and enterprise. Learners that possess this competency are also able to think independently and creatively.

**Communication and collaboration (CC)**
This competency aims to promote in learners the ability to make use of languages, symbols and texts to exchange information about themselves and their live experiences. Learners actively participate in sharing their ideas and engage in dialogue with others by listening to and learning from others in ways that respect and value the multiple perspectives of all persons involved.

**Cultural identity and global citizenship (CG)**
This competency aims to develop learners who put country and service as foremost through an understanding of what it means to be active citizens, by inculcating in them a strong sense of environmental, and economic awareness. Learners make use of the knowledge, skills, attitudes acquired to contribute meaningfully towards the socio-economic development of the country. They build skills to critically analyse cultural trends, identify and contribute to the global community.

**Personal development and leadership (PL)**
This means improving self-awareness, self-knowledge, skills and health; building and renewing self-esteem; identifying and developing talents, fulfilling dreams and aspirations and developing other people or meeting other people’s needs. It involves recognising the importance of values such as honesty and empathy; seeking the well-being of others; distinguishing between right and wrong; fostering perseverance, resilience and self-confidence; exploring leadership, self-regulation and responsibility, and developing a love for lifelong learning.

**Digital literacy (DL)**
It involves developing learners to discover, acquire skills in, and communicate through ICT to support their learning and using digital media responsibly.

Teaching instructions

The teaching instructions provide guidelines or suggestions for each of three phases (Phase 1, Phase 2 and Phase 3) in the lesson plan as to how the teacher should go about handling the lesson of the day. They indicate what to teach, how to teach, when to teach, where to teach as well as responses from learners to a particular strand or by extension, sub-strand taught in the class or outside the classroom. Several suggestions are provided for each phase, so that there are sufficient options to cover all of the required lesson plan for the relevant exemplar(s) in that section of content.

Learner activities

The types of activities used to ensure on-level, age-appropriate and multi-ability learning include:

- true or false activities
- cloze activities
- role play
- songs and games
- crosswords and word searches
Introduction

• matching activities
• case studies (for the higher grades) and interviews
• diary entries, newspaper articles, brochures, posters and timelines.

Activities included in the text are intended to serve several purposes:
• They break up the lesson to aid concentration and increase learner participation.
• They extend the knowledge gained from the text.
• They develop academic skills such as reading with understanding, writing, presenting and organising information, map drawing and map reading, interpreting pictures and diagrams, problem solving.
• Some activities will develop communication skills: discussing, co-operating, and reporting.

In later primary years the activities should also help learners to look beyond the material easily available to them by encouraging them to ask other adults, visit libraries (if there are any) and use the internet if it is available.

The Learners’ Book aims to use a variety of approaches in order to offer as many ways of learning as possible. No one way suits every learner. As an example, there are many ways to teach reading. The best teachers use every method they know so as to suit each individual in their class. Some people learn quickly by reading with understanding. Others need to learn through practical experience. You will have all types of learners in your class.

Each theme in the Learner’s Book contains activities that will help your learners achieve the objectives of that theme. They are designed to develop a range of skills and you can adapt individual tasks to the needs of each learner. You will need additional activities to broaden the learning experience, some tailored to the needs of more or less able learners and others to add variety and depth to various topics.

Practical activities
When we talk about practical activities we tend to think of working with our hands but in this context the term covers all activities which include a practical skill. The obvious ones are writing and drawing related to the factual material of the lesson but an equally valuable practical activity might be the making of a model of some aspect of the learners’ surroundings, such as a house or the local market. Another might be the writing and performing of a play based upon a traditional story.

All practical activities need careful organization but they can add a good deal of fun to the learning process. Learning needs to be made enjoyable if children are to grow up wishing to carry on developing their knowledge and skills. Playing team games, reading stories to each other and making up and acting simple plays can all contribute to the promotion of learning.

Practicing skills
Acquisition of study skills and knowledge has been through practical lessons. Oral lesson cannot necessarily and abundantly give the learner the required skills and knowledge. Learners need to practice:

Reading: Learners need to be able to read easily. In Ghana, as we grow older, we need to be able to speak and read in English and our Ghanaian languages to develop our studies further.

Writing: Learners need to develop writing skills through activity-based lessons so their writings will look legible to themselves and others for correct interpretation of what they have written.

Listening: Learners need to know how to listen carefully, especially when someone is not speaking clearly. This is a matter of practising concentration.

Research skills are important too. You can encourage learners to go beyond the Learner’s Book in these later years of their primary schooling to look for additional materials, and to store only those facts which will be of long-term use and lifelong learning.

Use of ICT

Some schools in urban areas have access to computers in school or in libraries. Rural areas will become linked in the future. You should learn how to use a computer as soon as you are able. They open up the world as your resource. The internet can provide as much additional material as you will ever need. Once your learners have the chance to use a computer they too will have access to a world of information. This can be done through effective use of the following ICT tools:
• Laptop or desktop computers
Introduction

ICTs are a useful communication technology that can by and large be used to enhance the quality of teaching and learning in schools. Internet systems have made the world a globalized one. It is for this that Professor Ali Mazrui describes globalization as “the villagization of the world” hence, the world being a “global village” (Marshall McLuhan and Quentin Fiore, 1968). This means all parts of the world are being brought together by the internet and other electronic communication interconnections. That is more information has become accessible anywhere in the world by way of interconnectedness and interdependency. You can communicate to anybody anywhere in the world from the comfort of your room, car and many more places. In working towards the rationale of the OWOP curriculum, there is the urgent need for the teacher to display professionalism through effective use of ICTs in teaching and learning.

The teacher should try as much as possible use whatever technological resources available such as any of those stated above to assist in teaching and learning. The use of ICTs in teaching and learning activities promotes a paradigm shift to learner-centered environment. Here are some useful ideas on how to go about this:

- Integrate ICT’s in the learning process, as a key competence and contributing to the acquisition of skills and knowledge;
- Use ICT’s in the classroom to work on information processing, authentic communication, and on the learner autonomy, as the builder of his or her own learning process;
- Give ICT’s a role to help young people be able to arrange, evaluate, synthesize, analyze and decide on the information that comes to them;
- Challenge students with different types of supports and formats and, therefore, a great variety of activities in which they pass from receivers to makers;
- Attend to the diversity or learning needs of students, using the copious offer of interactive exercises available on the web.

Assessment

Making sure that learners have actually absorbed the lessons taught and not just had fun through the entire lesson is equally important. There are assessments at the end of each lesson in the Learner’s Book that are useful tools for reinforcement of lessons taught. You can also adopt other forms of assessment during the lessons to ensure learners are on the same level of understanding. Some of these assessments include the following:

Diagnostic assessment
This examines learners’ prior knowledge and is used to establish links to the new lesson: Test learners’ prior knowledge by asking them to respond to key words, names and dates related to the next topic
Ask learners to define key words and terms

Formative assessment
Formative assessment is the methods that teachers use to evaluate and assess a learner’s ability to understand and apply what they have learnt during a lesson. This also gives teachers the opportunity to continually assess learners and to use this assessment to address their learning needs, the progress they have made, and to address any barriers to learning or learning difficulties that they may have.

Formative assessment in the form of teacher observations and assessments, as well as self-assessment and peer-assessment done by the learners, will help to identify areas of difficulty so that these areas can be targeted and any problems addressed immediately before moving on to the next section of work.

Formative assessment is an important step in the teaching and learning process. It allows you as the teacher to observe your learners in a wide variety of learning situations and to collect, record and use this information, which you can then use to inform further teaching and learning.

You should use different types of formative
assessment to address the different learning abilities of the learners in your class. These assessments could take the form of formal and informal observations during whole class and individual, pair and group work activities, through the assessing of written work, projects, tasks and tests.

You can record your assessments as short notes in a record book or as a simple checklist on a class list of learners’ names.

**Summative assessment**

Summative assessment is used to test whether the learners have achieved the objectives of the whole unit or series of topics, or a whole semester, term or year’s work.

To guarantee adequate time for the course coverage and assessment, lessons must be planned in advance for the week or the month. The best advice is to be well informed about the lesson content and teach with passion. The facilitator is always the best determinant of the time frame to adapt and diverge lessons based on the capability of the class. Irrespective of the time frame, each lesson should be as interactive and enjoyable as possible to ensure attentiveness and involvement of every learner.

Be positive, confident about the subject matter and explicit in your directions on what learners need to do. Remember: Your attitude in delivering the lessons will definitely determine the attitude of the learners towards the lesson!

**Methods of assessment**

Some type of assessment is going on all the time during a lesson. Throughout every lesson a good teacher is always watching his or her class for their reactions. Are they bored or restive? Is it because the work is too difficult, is it because I’m speaking too quietly? If the learners are giving you their full attention the lesson is going well and the learners are learning.

At the end of every lesson some form of assessment is necessary. It could be a question and answer session; it could be a class quiz or a short test. You need to know if the learners have achieved the lesson’s indicators.

Written tests marked after the class is over are useful tools but be wary of over testing and never put the results in a class order. Slower learners should not be made to feel failures, but helped to catch up.

**Reflection and self-evaluation**

Reflective thinking is the ability to look at the past and develop understanding and insights about what happened and using this information to develop a deeper understanding or to choose a course of action. It provides teachers and learners with the skills to mentally process learning experiences, identify what they learned, modify their understanding based on new information and experiences, and transfer their learning to other situations. Never be too critical of yourself; teaching large classes with limited resources is a difficult task. No lesson is perfect but given a little time you can learn from every one of them.

1. What went well?
2. What went badly?
3. What would you improve next time?

When you mark your tests (oral or written) you need to assess the results quite formally:

What proportion of the learners showed real understanding of the themes and has achieved the specific indicators?

For those who you think need extra help you must find time by giving others some extra reading or research work to allow you time with the less successful. When there are so many lessons in a day it is difficult to reflect on every one of them. If you can think about the best and the worst in order to compare them, you might gain some insight into how you are doing. Do not be afraid to share your thoughts with colleagues. If you work in a caring school, you should be helping each other.

When considering a particular lesson, you might ask yourself these questions:

- Did the learners understand what I was trying to explain?
- Did they pay attention?
- Was there a quiet, hardworking atmosphere or was it too noisy?
- Did my learners enjoy my lesson, did we work well together?
- Were there smiles and some fun?
- Did the lesson achieve its indicators?

Evaluation of your lessons should help you to work out which parts of your course need to be repeated in some form.
Reinforcement and revision
Sometimes you will need to revise parts of the theme with the whole class. You will certainly need to start the next lesson by asking learners what they remember of the last one. Children need reinforcement. A few revision notes on the board to cover earlier work will be a very valuable start to every lesson.

Marking work
When you have a large class the marking of learners’ work can become a burden. If it is postponed the burden can become unbearable. Learners need to have their work marked and returned promptly with constructive criticism and as much encouragement as you can give them.

Teaching tips
Some marking of work can be done by learners themselves, swapping papers so that there is a check. You can mark work in class while you are going round supervising and encouraging the learners as they work. This has the advantage of offering instant praise and correction. Do not let your marking pile up from one day or one week to another.

It is important to create an atmosphere of trust in which learners feel confident enough to ask you questions without feeling embarrassed.

Learners should never be allowed to make fun of a learner who asks a question to which other learners already know the answer. Make it clear that such a response is not acceptable.

Using resources effectively
In order to help learners, gain the most benefit from this Our World Our People course you will need to draw on as many resources as possible and use them imaginatively. This section contains some suggestions on how best to use the resources in the Learner’s Book and how to make use of other resources that may be available. The factual material in the Learner’s Book is useful but it should be used alongside other information that the learners find out for themselves. It is important that learners learn techniques for finding out additional information.

Education is not just about learning facts; it is about learning how and where to find information. Learners may forget individual facts but they will remember how to find the information when they need it again. By following this course, therefore, they will be helped to develop skills and attitudes benefiting themselves, community and the nation when they are adult.

The Learner’s Book
Within each theme/strand and sub-strand of the Learner’s Book there are different types of text, illustrations and activities. These are designed to be used in a variety of ways to make lessons interesting, to increase learners’ knowledge and motivation and to encourage them to be inquisitive, skilled, confident and mutually supportive.

Other resources
You can use a variety of resources in your lessons. Below are some of them.

Equipment: weather stations, gardening tools, craft tools, and computers
Buildings: churches, workshops, shops, houses, memorials
Sound resources: radio, audio tape, musical instruments
Places to visit: farms, offices, forest and woodland, rivers, factories, museums, national parks, game reserves
Living resources: plants, seedlings, animals, local people
Personal treasures: photos, diaries, possessions, memories
Print resources: magazines and newspapers, books, atlases, workbooks
Pictures: photographs, maps, drawings, diagrams, cartoons, illustrations

Using the local environment
The study of Our World Our People is about the whole of your learners’ physical, social and cultural surroundings. Your resources lie all around you, in the classroom and outside. Do not just rely on the written word or pictures; use your own knowledge, and that of your learners, of the world around you.

Go outside and look with new eyes at your surroundings. Take the learners out into their environment (farms, rivers, lakes, the sea shore, offices, workshops, factories) and encourage them to do the same.

Bring people into the school to talk about their roles in the community (farmers, nurses, engineers, councilors)
**Introduction**

Make the most of local examples. You could look outside when it is raining to see how miniature streams are created, for example. Learn about the different types of cloud and what they might indicate about future weather by encouraging learners to look into the sky when they are in the playground. Learn about the economics of running a business from the local shop owner or from local market traders.

**Scheme of learning**

Never go into a class unprepared even if you have taught a lesson many times before. Have your ideas, plans and materials ready. You should make sure you are confident with your material. Classes are easier to manage and behaviour is better when a lesson is tightly organized.

You might want to develop a regular pattern such as:

- A brief period of revision. What did we do last time?
- The introduction of new material given in the form of a class lesson.
- Activities, undertaken in pairs, groups or singly.
- Whole class discussion of what everyone has done.

When Learners are used to being occupied for the whole time they tend to be more co-operative and to value the lesson more.

**Points to remember in preparing scheme of learning**

Here are some points to remember when developing a scheme of learning:

Know your syllabus.

Make a preliminary plan based on the time you think you will need to cover each unit.

Be prepared to change that plan as you learn how much time each theme really takes.

Take into account school events which take up time (example, examinations and special occasions). Leave some spare time in your planning. Very few timetables work out absolutely perfectly. Learners, especially at the higher levels, can be very critical if they think a syllabus has not been covered or if it is rushed and they cannot keep up.

Remember all the time that facts are only part of education. Keep in your mind the skills you wish to develop, particularly those of easy communication, of co-operation and the development of mutual tolerance and respect. Make sure you have all the materials ready at hand for each lesson. If classes are sharing resources make sure the ones you want are available when you want them. Before you start on any theme, check on your aims and work out how you can find out if you have achieved them. This is called **evaluation**.

When preparing materials and activities, take into account the different abilities of your Learners. Try to organise additional activities for the quicker learners to give you time to help those who are finding the lesson difficult. This Teacher’s Resource Pack will help you to plan further activities.

**Sample scheme of learning for Year 1**

The aim of this section is to set out in a simple form the way you might look at each theme comprising strands and sub-strands as a progression, from an introduction to a finale. Remember as you read the Teacher’s Resource Pack that it is not telling you what you must do. It is making suggestions which you might find useful. Your teaching style is individual. There is no ‘best’ way to teach any topic. You will work out your own way.

In the new curriculum, teachers are expected to make connections across standards within a given strand, and that is why in the Scheme of Learning (SOL) related standards are “clustered” (i.e. grouped together) under a key idea. The use of clustered standards for planning and delivery of lessons allows teachers to quickly recognize the different related understandings or skills learners need to develop in order to achieve full understanding of a key idea. Teachers are therefore required to carefully read the standards they plan developing in their learners each week and identify the group of indicators the learners have to demonstrate for achieving these standards. It is also important for teachers to note that the strands themselves, and the standards for a given strand, are not necessarily organized sequentially. For example, just because standard A comes before standard B does not mean that standard A should be addressed before standard B. Teachers might want to address standard B before standard A or address the two standards at the same time.

Learning planning
Planning lessons within a theme/strand
Once you have allocated the time available for each part of the term’s strands and sub-strands you can begin on that lesson planning. Work out how many lessons each theme/strand needs and then plan individual lessons.

You can use a table like the one below as a planning format:

**SAMPLE WEEKLY LEARNING PLAN FOR P2 OWOP, WEEK 1**

<table>
<thead>
<tr>
<th>Learning Indicator (s) (Ref. No.)</th>
<th>B2.1.1.1.1</th>
</tr>
</thead>
<tbody>

**Phase 3:** Plenary/Reflections (Learner and teacher) 10 minutes

Ask the learners the following questions to review their understanding of the lesson:
1. What have we learnt today?
2. Have learners read the key words written on the board
3. What did you find difficult in the lesson?

**End of the lesson**

*Source: NaCCA, Teacher Resource Pack - 2019*
Planning an individual lesson
The two most important steps in your planning are as follows:

Choose your topic
Know your objectives

What factual knowledge do you want to pass on, and what skills do you want to develop? What attitudes and values do you want to emphasize? Read through the material in the Learner’s Book and make sure you know the facts and understand that material and any other material which you are planning to introduce. A good maxim is ‘Teach from knowledge.’

There are certain general rules to keep in mind when planning your lesson. **Check the reading level of the material you are using.** The language levels in each of the six books are carefully chosen but your learners will have different levels of reading ability. Check first for words which might pose difficulties for some of your learners and decide how you will help those who might have problems of understanding.

Decide on the methods you will use. Plan your lesson in such a way that your Learners can learn the factual material while developing skills like participation, co-operation and communication. Content and skills are equally important. We tend to concentrate on facts but we need to keep the skills content of a lesson in our minds all the time. Decide how you will measure whether the lesson has been successful or not (evaluation). This can be by class discussion, marking work or giving tests.

Remember the following four elements when planning your lesson:
Knowing
Understanding
Applying
Values and attitudes
Strand: All about us
God is the creator of all things around us. Some of them are living things and other non-living things. Mankind uses some of the things created by God to make life meaningful and comfortable.

Points to note
An attribute is a quality or characteristic given to a person, group, or some other thing.

1. **God Is Infinite** – He is Self-Existing, Without Origin.
2. **God is Immutable** – He never changes.
3. **God is Self-Sufficient** – He has no needs.
4. **God is Omnipotent** – He is all powerful.
5. **God is Omniscient** – He is all-knowing.
6. **God is Omnipresent** – He is always everywhere.
7. **God is Wise** – He is full of perfect, unchanging wisdom.
8. **God is Faithful** – He is infinitely, unchangeably true.
9. **God is Good** – He is infinitely, unchangeably kind and full of good will.
10. **God is Just** – He is infinitely, unchangeably
11. **God is Merciful** – He is infinitely, unchangeably compassionate and kind.
12. **God is Gracious** – God Is infinitely inclined to spare the guilty.
13. **God is Loving** – God infinitely, unchangingly loves us.
14. **God is Holy** – He is infinitely, unchangingly perfect.
15. **God is Glorious** – He is infinitely beautiful and great.

In groups, ask learners to mention the attributes of God that make Him a sustainer of life.

Some of the attributes of God as sustainer of life include:

- God provides air in abundance for all living things
God the protector of life
God the giver of light
God the giver of food for all living things
He provides water for all living things
God protects us from all evils
He holds us together right and perfect in all He does.

Discussion with learners to understand that God per the things He created and the life He put in all living things, humans, plants and animals, is the sustainer of life on earth.

Mention the attributes of God as sustainer of life

Assist learners to understand the meaning of attribute and sustenance. Let them know that it also means features or characteristics and sustenance also means keeping one for a long time. Learners should be aware that God has attributes that reveal or show His nature as sustainer or keeper of life of every living thing on earth. Some of these attributes of God in sustaining our lives are:

The Giver of rain, sunshine and light from the moon and stars.
The One who makes plants grow.
The One who makes animals to grow
The One who makes humankind to grow
The Giver of air
The Giver of the land
The Giver of water

Besides the above, God shows the following attributes to humankind:

Love: Let learners know that the greatest love comes from God and that if He did not love us He would not have created humankind. His love is expressed on earth through humankind to another humankind and other living and non-living things. Learners should understand that we should love one another as we love ourselves. They should also know that they are at peace with one another, their communities are at peace and the whole world is at peace because of love.

Love therefore, promotes peaceful co-existence and development among people.

God is good: Our God is a good God who gives good gifts to His children. When we look for His goodness in the world around us, we will find it. These include the skies, rains, sunshine, moon light, the land and air among others. Let learners know that His goodness is appreciated in our lives by accepting His creation and protecting them forever.

Friend: God loves us so much and He wants to be in relationship with us. He wants to be our friend, walking closely with us every day of our lives. We should therefore, constantly be in friendship with one another to give meaning to how God wants us to be on this earth. Let them understand that being in friendship pays a lot as needs of friends are easily provided by the one who has.

Learners should know that it is only God, who sustains our lives until He calls us back into His kingdom.

Mention these attributes of God in their local languages.

Assist learners to demonstrate the attributes of God in humankind in their local languages so they can understand better. Facilitator may employ the services of another Facilitator, who teaches Ghanaian language of the locality or can speak other languages relevant to the lesson.

Discuss the attributes of God relevant to their daily lives.

Guide learners to understand that it is not all the attributes of God that is in humankind that humankind can exhibit, however, it does not mean that they are not relevant to humankind. Some of them are that God is Holy, Everlasting, and Spirit among others. The others that can be seen in humankind example, love, forgiving, merciful, kind, and sympathetic among others must be shown by humankind towards his or her fellow man. Encourage learners to show as much as possible the attributes of God that are relevant to their daily lives and God will be happy with them.
Guide learners to demonstrate how each of the things listed above portray God as a sustainer of life. These should be done first by the teacher.

Examples of activities that could be demonstrated in the class include feeding, cleaning the environment, showing the importance of sunlight to living things, the use of rains for plants to grow, the role air plays in living things.

Other ways to sustain life.

i. To get enough rest.
ii. To exercise the body.
iii. Keeping our environment clean.
iv. Washing of clothes regularly and iron them.
v. Attend hospital for treatment when sick.
vi. Keep our bodies clean.

Activities to support learners

1. Ask learners to describe three attributes of God as a sustainer of life.
2. Through whole class discussions, state these attributes of God in their local languages.
3. Guide learners to tell short stories about God’s creation and His attributes
4. Assist the learners to draw and colour the sun as a source of light using pictures as guide
5. Assist learner to brainstorm what will happen to living things in general when there is no sunlight, air or rain.
6. Guide the learners to tell the importance of keeping the environment clean.
7. Ask learners to state and explain any of the attributes of God in their own local languages.
8. Through class discussion guide the learners to come out with a rhyme or simple song. Songs about God’s creation and His attributes.

Suggested homework

i. Write three attributes of God as sustainer of life.

Answer:

1. a. God is a giver of life.
   b. God is the giver of rain
   c. He is the giver of sunshine
   d. He is the giver of air
2. Draw and colour the sun as a source of light
   Learners answer
3. Draw and colour the moon as a source of light
   Learners answer
4. Compose and write a rhyme or song about God’s attributes as sustainer of life.
   Learners answer

Evaluation Exercise 1
Expected Answers

(Refer to Learners Book 2, pages 9 to 11 for exercises and Activities)

Exercise 1

Q1.
   a. God the giver of air
   b. God the provider of food
   c. God the protector

Q2. We should thank God because He gives us

Q3. Air is important to our lives. It makes us breathe well. Without it, we will die. We also need air to dry clothing, food crops. Our animals also need air to breathe. It is needed on our body so we cannot sweat. Plants also need air to grow. Our machines also need air to work.

Q4.
   a. fetch water into cup to brush your teeth and not brush under running water.
b. wash all clothing at the same time and not differently on different days.

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
• What went well?
• What went badly?
• What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to perform the following by way of reflecting deep on the lesson:
1. Narrate brief what you learned during the lesson
2. In a few sentences tell the class how you will apply the knowledge you acquire during the lesson in your daily life
3. Which part of the lesson did you find interesting
4. Which aspect of the lesson did you not understand?
Introduction

There are over seven billion people living on the surface of the planet earth. All these human beings look differently from one another. No two persons are found to be the same. Everybody is different from the other, even identical twins are different in many ways.

The differences among the people demonstrate that every human being is an individual. Being an individual simply means everyone has unique identity that makes him or her special. In your family you look different from your siblings and your parents, in your school and in the community you are different from all other people.

Some of the things that make us unique individual are both physical and abstract. The physical on one hand includes name, size, height, complexion etc. The abstract which is internal and cannot be easily noticed also includes talents, weaknesses, strengths, likes and dislikes.

Knowing more about myself

Learners think-pair-share on how to know the ‘self’.

Knowing yourself means understanding your strengths and weaknesses, your passions and fears, your desires and dreams. It means being aware of your likes and dislikes, and your tolerance and limitations. Knowing yourself means knowing your purpose in life.

1. Learn to be honest with yourself. Knowing yourself means recognizing different parts of your identity, personality, and being
2. Ask yourself thoughtful questions
3. Pay attention to your inner voice
4. Write in a journal every day
5. Incorporate mindfulness into your day
6. Identify your body image.
The Benefits of Self-Knowledge

Learners discuss in pairs why they must know themselves. Guide learners to do presentations.

Maybe it’s obvious, but here are a few reasons why learners might want to know your own nature:

- **Happiness.** You will be happier when you can express who you are. Expressing your desires will make it more likely that you get what you want.
- **Less inner conflict.** When your outside actions are in line with your inside feelings and values, you will experience less inner conflict.
- **Better decision-making.** When you know yourself, you are able to make better choices about everything, from small decisions like which shirt you will buy to big decisions like knowing yourself means knowing your purpose in life.

**Resistance to social pressure:** When you apply your values and preferences, you are less likely to say “yes” when you want to say “no.”

**Tolerance and understanding of others:** Your awareness of your own weaknesses and strengths and struggles can help you empathize with others.

**Vitality and pleasure:** Being who you truly are helps you feel more alive and makes your experience of life richer, larger, and more exciting.

The fact remains that we are unique individuals; it is therefore paramount to know ourselves. Knowing ourselves enables us take good decisions about our lives that is what we are capable of doing and our weaknesses.

Things needed to do to develop a sense of self-worth.

For learners to develop sense of self identity they must accept who they are and not to be like others.

Learners to talk about themselves individually and appreciate the way God created them. Things to consider to show self-identity:

- Name of the individual
- Complexion of the individual
- Favourite subject
- Taste for goods and services
- Strength and weaknesses of the individual
  Other examples are likes and dislikes, talents of the individual etc.

**Discuss and appreciate how God created them**

Guide learners in discussion/brainstorming to discover how unique or different they are from others in class and elsewhere in the world. Let them know or understand that no two or more people are the same even twins or triplets, who may look the same are different on the basis of their thumbprints. God has unique way of identifying us on earth. Let them know that on the basis of our uniqueness created by God that says, when one commits crime another cannot be arrested for the person’s crime because they may look alike is one thing we must appreciate God for. Let learners be encouraged and all the time appreciate God by accepting how He created them and should not under any compelling circumstance attempt to change their God-giving nature or body or skin. God hates that.

**Role-play scenario about importance of developing strong self-identity.**

Assist learners to role-play the importance of developing strong self-identity. Let learners understand what is meant by self-identity: the perception or recognition of one’s characteristics as a particular individual, especially in relation to social context. It is also understanding a person has of themselves. Self-Identity is composed of relatively permanent self-assessments, such as personality attributes, knowledge of one’s skills and abilities, one’s occupation and hobbies, and awareness of one’s physical attributes.
Importance of developing strong self-identity includes

i. Confident in showing our knowledge and skills God gave to us.

ii. We feel proud about the talents we have and how we develop them through education.

iii. Our self-identity motivates us to work hard to do well in school.

iv. We also feel special, more worthy and valued among people in our communities.

v. And in life, we feel good because we know our future is very bright.

vi. A positive sense of identity is good for the development of self-esteem and confidence.

vii. Self-identity also helps children to be more open to people and feel happy about themselves.

Parents and Facilitators can help children develop a strong sense of self by encouragement.

**Develop self confidence in them**

Guide learners to understand what is meant by self-confidence: Self-confidence is a feeling of trust in one’s abilities, qualities, and the way he or she thinks. Let learners understand that self-confidence must be developed in oneself so you can always be proud of yourself. Let them know that it goes with what you are capable of doing and that they must learn hard to justify the knowledge and skills they are getting in school. Encourage learners to learn hard so they can be proud of themselves anywhere they go.

---

  a. it makes us confident.
  b. we feel proud about our talent
  c. it makes us work hard
  d. it makes us feel special and valued.
  i. Learning from others.
  ii. Through further education

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.
Introduction

Every man or woman born of a woman belongs to a particular family. A family is the basic unit of the society. We have two main types of family systems in Ghana: Nuclear family and Extended family.

Every member in the family plays certain roles to maintain the family as a whole. Nuclear family consists of the father, mother and the siblings. The parents have the responsibility to provide shelter, food, pay school fees, medical bills of their children.

The children also perform certain responsibilities assigned them. For example, the children are supposed to run errands for their parents, help them in cooking, sweep the compound, take care of the young siblings etc. In a home where there is discipline the children perform their duties without being told or commanded. It is a routine work and must be observed as such.

The roles played by members of the family in both nuclear and extended family, family members have certain roles to play and ensure survival of the group. Group learners to talk about the roles of their parents in the family.

Roles played by parents and children in the home.

Parents:
1. Provide shelter.
2. Provide food.
3. Provide training in moral values.
4. Pay school fees and other bills.
5. Provide security and education.
Special Roles of the father

Fathers must:
1. spend time with your child
2. discipline with love and positive parenting
3. be your child’s role model
4. earn the right to be heard
5. be your child’s teacher
6. eat together as a family
7. read to your child
8. respect the other parent of your child
9. listen to their children
10. be interested in their children’s interests. ...
11. show they care deeply
12. help their kids find the answers to their questions. ...
13. let their children’s imagination thrive. ...
14. read, and read to their children.
15. handle the dirty work

Group learners to talk about the roles of their parents in the family.

Roles played by parents and children in their in the home.

Special roles of mothers

A good mother is obligated to care for her family and put them before any other thing. The ideal living environment that a mother can provide for her children is a warm caring home. The mother plays the most vital role in a child’s life because she is the most important role model for the child.

1. Chef: A mother cooks 2-3 meals a day
2. Housekeeper: As a mother you will have the opportunity to clean all kinds of mess
3. Resolve conflict: Children have conflict with friends, siblings, and even their parents.
4. Event Planner: Mothers schedule. What else can I say? From play dates to doctor’s appointments to school events to after school activities to vacations to any number of other events.
5. Teacher: Mothers teach their children everything
6. When cooking they not only teach their children how to cook, but some basic math. They teach their children about relationships, problem resolution, and dating skills.
6. Chauffeur: Mothers take their children to school, the doctor, and the dentist. They take their children to sporting activities, dance, gymnastics, and music lessons.
8. Laundry: Mothers do laundry. They get out the stains and keep the bright colors. Life needs a clean start!
9. Counselor: Children come to their mothers when they fail a test and when their heart is broken. Mothers comfort and advise.
10. Finance Manager: Mothers often help to manage the finances, teaching their children to do so as well.
10. Health Care Provider: As previously noted, mother’s kiss skinned knees. They also check their children’s fevers, cook them chicken noodle soup, make them comfortable, and many other “doctoring” duties.
12. Activities Director: When children are bored, mothers come up with ideas. They encourage their children to play. They teach their children nursery rhymes, games, and fun activities like cooking.

Roles of Children in the family

Children are to:
1. run errands
2. perform house chores
3. show respect to parents
4. do their homework
5. pick up unused toys and put at appropriate place
6. put books and magazines at the right place
7. sweep the floor or rooms
8. wash plates and silverware after use
9. clean up what they drop after eating
10. clear dining table
11. give a choice of two foods for breakfast
12. toilet training
13. practice simple hygiene - brush teeth, wash and dry hands and brush hair.

Learners role play the functions of the various members in the family. Learners to show the following in the role play:

- Provision of security
- Shelter
- Food
- Payment of fees and utility bills
- Training of children in moral values
- Cook food for the family

Guide learners to demonstrate roles played by parents in the family. Examples of activities to role play by learners in class are provision of shelter, food, security, payment of fees and cooking for the family.

Other roles play by parents in the family
1. Showing love for the children
2. Conduct themselves well for the children to follow
3. Bath children
4. Take children to school
5. Teach children how to do some house chores
6. Nurture the children when they are babies

Activities to support learners
1. Guide learners to draw a parent giving money to his child for school.
2. Learners to mention three things their parents do for them.
3. Using pictures, show learners a man shopping with his children.
4. Guide the learners to tell the importance of performing chores as members of a family.

6. Through role play learners demonstrate the functions of the various members in the family
7. Explain why members of a family should undertake their routine responsibilities without being commanded

Evaluation Exercise

Expected Answers
(Refer to Learners Book 2, pages 19 and 29 for exercises and Activities)

Exercise 1
Q1. Parents.
Q2. Providing our basic needs
Q3. Good children.
Q4. Respect them.
Q5. Prepares food for the children.
Q6. Running errands for them.

Exercise 2

1. Guide learners to draw a parent giving money to his child for school.
2. Learners to mention three things their parents do for them.
3. Using pictures, show learners a man shopping with his children.
4. Guide the learners to tell the importance of performing chores as members of a family.

<table>

a. support parents at home.
b. go on errands for parents.
c. do their homework on time.
**Suggested homework**

1. Draw a man paying utility bills at the bank or any sales outlet
   Learners answer
2. Draw a man with the children shopping in a busy market
   Learners answer
3. Explain why every member of the family should do his or her duties without being told.
   a. it makes you responsible
   b. parents are happy with kids
   c. you become a role model
4. Mention five responsibilities each child performed in the family
   a. run errands for parents
   b. show respect to parents and others
   c. do homework
   d. do house chores.

**Reflections**

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
- What went well?
- What went badly?

- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:
- Tell the class what you learnt during the lesson.
- Tell the class how you would use the knowledge you acquired during the lesson.
- Which aspect of the lesson did you not understand?
Introduction

Every home, school and community in Ghana has rules that govern the people to maintain peace. When members observe rules and regulations at home or in school it ensures peace and accelerates development. Ask learners some of the rules they observe at home and in school.

Rules at home

Through group work, guide learners to talk about rules in the home. The rules may include the following:
- Treat other people and their property with respect. ...
- Knock on closed doors before entering. ...
- Electronics curfew
- Make amends when you hurt someone
- Tell the truth
- Apologize for the wrong doing
- Cleaning your teeth every morning and bathing everyday
- No video games past 9pm
- No drawing or painting in the bedroom/lounge
- No talking with your mouth full
- No shoes on the sofa
- Always flush the toilet
- Put clothes in the wash basket
- Turn out the lights when you are not using a room
- Turn off the TV when you are not watching it
- Put your shoes away when you take them off
- Always lock the door when you leave
- No slamming doors
- Don’t eat messy food on the sofa
- Last one out locks the door
• No looking at phones at the dinner table
• Placing keys back in their designated spot/ hook
• Always put something back where you found it
• Complete homework before playing
• No shouting
• All food eaten at the table/ no food in living room
• No going to bed angry with each other
• No leaving dishes ‘to soak’ overnight because you’re too lazy to wash
• No running in the house

Rules in School
1. Through group work, guide learners to talk about rules in school. The rules may include the following:
2. Being kind and polite
3. Keep the classroom clean
4. Raise your hand before you speak
5. Be on task
6. No eating in class
7. Keep your hands and feet to yourself
8. Be respectful to other students
9. No talking when the teacher is talking
10. All assignments must be done on time
11. Get to school on time
12. No running around in class or compound
13. Pay attention

Things needed to maintain peace.
• Obedience to the rules
• Show respect for others
• Perform our duties as required
• Show honesty
• Care for one another

Rules in the community
• As members of a community, we must:
  Group learners to demonstrate how to make rules for a community using the fish bowl discussion method.
• Take part in communal labour
• Take part in activities that protect the environment
• Not to throw rubbish into gutters or rivers
• Not to be jealous of what other family members have
• Use common sense
• Communicate often and clearly
• Keep language and rules simple
• Practice moderation
• Conduct a regular rule review
• Be careful of anonymous complaints
• Be fair when enforcing violations
• Know that there will be exceptions

Guide learners in groups, to tell how to maintain rules and regulations at home, school and community. Examples of activities that are helpful to maintain rules are observances of rules, care for one another, perform our assigned duties and obedience to rules.

Other ways to keep or be obedient to rules
• Show honesty
• Show love
• Support for one another
• To be patriotic and hardworking

Activities to support learners
1. Guide learners in groups to talk about their roles and of their parents.
2. Ask learners to give importance of obeying rules.
5. Draw children cleaning their classroom to keep the place neat.
Suggested homework
1. Draw a child doing homework
Learners answer
2. Draw people in a family meeting
Learners answer
3. Compose and write a rhyme to educate the society about importance of obeying rules
Learners answer
4. Explain why they should obey rules at home, school and community.
   a. It shows respect
   b. It gives honour to parents
   c. It makes people help you
   d. It makes your teacher proud about you
   e. It makes us get position in school

Role-play scenarios on obeying rules in the home, school and community.

Guide learners to role-play scenarios of a family which parents setting rules for the children to obey, those of the school and community to also obey by learners. Let learners understand that in every human institution even in the church and mosques there are rules governing the conduct of every member of the organization. Rules make people obedient and humble, disciplined and law abiding. Learners should be encouraged to abide by rules established by their parents, community elders and the school authorities. Let learners understand that they must do everything possible to sustain especially the rules set for classroom management or control in order to give respect to the leadership and entire class members.

Evaluation Exercise
Expected Answers

(Refer to Learners Book 2, pages 36 for exercise and Activities)

Exercise 1
Q1.
   a. Knock on a closed door before entering.
   b. Tell the Truth. I will always tell the truth. Everybody must tell the truth.
   c. Treat the property of people with respect. Yours will also be treated with respect.

Q2.
   a. Class exercise should be done on time.
   b. Being kind and polite
   c. Keep the classroom clean.

Q3.
Learners are to create posters for five (5) rules in their home.

Q4.
Learners are to create posters for five (5) rules in their classroom.

Reflections

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Learners are asked to do the following by way of reflecting on the lesson:
- Tell the class what you learnt.
- Tell the class how you will use the knowledge you acquired during the lesson.
- Which aspect of the lesson did you not understand?
Strand: 2
All around us
Introduction

Our environment is made up of both natural and man-made things. Our immediate environment refers to the place in which we live. A clean environment is very important to keep us healthy.

Ask learners to discuss the things they do to make the environment clean and safe. We rely on our environment to lead a healthy life and avoid getting sick.

A clean environment is one that is devoid of any form of pollution and its effect. Hence it could be an environment that has clean air, clean water, and clean energy.

It is important that we protect our environment from degradation. Learners in a group identify ways of protecting the land from degradation.

Items needed to keep our environment clean:

1. Spade
2. Shovel
3. Rake
4. Waste disposal bins
5. Brooms
6. Cutlasses
7. Wheelbarrow
8. Water

Other examples are baskets, long brooms, pick axe etc.

Through nature walk around the school compound, ask learners to talk about things they do to protect the environment. The things should include the following:

1. Planting more tree
2. Proper waste disposal
3. Avoid bush burning
4. Surface mining
5. Sand winning
6. Chemicals must be properly disposed off
7. Reduce the usage of your electrical appliances
8. Reduce the usage of your wooden stove
9. Maintain a healthy eco system
10. Recycle the waste products
11. Grow your food locally
12. Hand hygiene, such as washing your hands.
13. Covering your nose and mouth when coughing or sneezing
14. Having good personal hygiene, yourself.
15. Making sure you provide the older adult with good personal hygiene.
16. Using proper food preparation and storing food
17. Keeping dishes and utensils clean

Activities to support learners
1. Using pictures assist learners to identify man- made and natural things in their environment
2. Guide learners to draw school boy and girl sweeping the school compound
3. Ask learners to tell the things they do to keep the environment clean
4. Assist learners to draw and colour a clean environment.
5. Guide learners to draw a police officer on duty in the community
7. Ask learners to identify four ways of protecting the land.

Evaluation Exercise
Expected Answers
(Refer to Learners Book 2, pages 46 and 49 for exercises and Activities)
Exercise 1
Q1. Tree, fish, sun flower, air
Q2. Bus, chairs, books, ships, spoon.

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:
1. Tell the class what you learnt during the lesson.
2. Tell the class how you will use the knowledge acquired during the lesson.
3. Which aspect of the lesson did you not understand?

Suggested homework
1. Draw two man-made things and two natural things found in your school compound
Learners answer
2. Identify four ways of protecting the environment
   a. do not defecate in the open
   b. plant more trees
   c. do not throw rubbish anyhow especially near water bodies
   d. avoid bush burning
3. Name two people that make our community safe
   a. the police
   b. fire service
   c. nurse

Introduction

Elements of Weather
Discuss with learners each of the elements of weather and instruments for measuring the elements.

There are several primary conditions of the atmosphere, or weather elements. They include wind, temperature, pressure, humidity, clouds, and precipitation.

Put learners in groups to describe the elements of weather, e.g. temperature, rainfall/precipitation, humidity, wind and cloud cover.

Temperature is measured with a thermometer. A thermometer is a device that measures temperature.

Group learners to draw a chart like this and indicate the weather condition on each day.

Note: There may be more than one weather condition on each day.

Learners watch videos or pictures of different weather conditions.

Use the helpful links above to show videos on elements of the weather to the learners and discuss their observations.

Activities to support learners
1. Mention the elements of weather
2. Mention the weather condition for the day
3. Draw and paint the weather condition for the day.
4. Construct the various instruments for measuring the elements of weather.
5. Let learners draw weather chart in their drawing book using symbols.
6. Let learners watch videos or pictures in the computer laboratory of different weather conditions.
Evaluation Exercise
Expected Answers
(Refer to Learners Book 2, page 55 for exercises and Activities)

Exercise 1

1.

a. Cloud cover occurs when water vapour changes to liquid.

b. Humidity is the amount of water vapour or moisture in the atmosphere in a given time.

c. Temperature is how hot or cold a place or a body is.

2. Through precipitation or rainfall.

Home work

1. Draw a weather chart and indicate the various weather conditions for week.

2. Learners answer

Reflections

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask the learners these questions to consolidate learning.

What made the lesson enjoyable?
What do you expect to experience in the next lesson?

English dictionary

KEY WORDS
Interact, benefit, disperse, pollinate, complicated, contribute, components.

HELPFUL LINKS

Introduction
Introduce these lesson by asking learners about the importance of plants in their community. Ask in each learner the plant he/she likes most and why? Expected answers may include: food, shade, shelter, medicine, clothing and or decoration.

Use their answers to engage the learners on the importance of plants in whole class discussion. Display pictures of important plants in Ghana such as Cocoa tree, shea tree, rubber tree etc. Break the class into small groups and assign to each group a particular popular plant in Ghana. In their small groups let them discuss the importance of the plant assigned to them.

Living things need plants to live – they eat them and live in them. Plants also absorb carbon dioxide and release oxygen from their leaves, which humans and other animals need to breathe. Animals on the other hand have made human life easier by providing us with food, medicine, clothing etc.

Ask learners to brainstorm the importance of plants in the community.

The main crops grown in Ghana include:
• Cocoa
• Beans
• Palm
• Oil
• Pineapples
• Cotton
• Bananas
• Corn
• Yam
• Cassava
• Plantain
• Coconut etc.

Importance of plants
In groups, ask learners to talk about the importance of plants.

• The following points should be considered:
• Plants are used as sources of food and goods for humans.
• They can be used for shelter.
• They provide shade for protection from the hot sun.

• Humans use plants for fuel. We also use plants to make cloth, dyes and medicines.

• We get money from plants and animals

• Dead plants provide fertile land for farming.

• We can prepare manure from plants.

• Plants help people to stay healthy. They remove carbon dioxide and air pollutants from the environment.

• Trees keep us cool. Trees can cut air conditioning costs.

• Trees stop erosion. Their root systems slow and stops rain run-off by absorbing excess water. This reduces the amount of soil that is washed into streams and lakes and decreases erosion.

Things needed to take good care of crops
Farmers adopt or employ good farming practices to improve production. Group learners talk about things they need to do to take good care of their crop plants.

Items needed to promote crop production.
• Fertilizer
• Irrigation
• Accessible roads
• Good soil
• Tractors
• Hoes
• Cutlasses etc.

Through group discussions, learners talk about the things they do to take care of crop plants. The things they do should include the following:
• Fertilizer application
• Wedding
• Disease control
• Manuring
• Thinning
• Mulching

Guide learners to brainstorm how each of the practices is used to take good care of crop production. Examples of activities that could be demonstrated in class are application of fertilizer, mulching and manuring.

Other ways to keep good care of crops include:
1. Watering
2. Stirring of soil
3. Pruning
4. Weeding
5. Thinning out
6. Application of pesticides

Activities to support learners
i. Guide learners identify some common crops grown in the community
ii. Ask learners to talk about the importance of crops in the community
iii. Guide learners to draw any two crops and colour them
iv. Assist learners to draw some food crops
v. Guide learners to talk about caring for crop plants
vi. Guide learners watch the real crops in a video and discuss the importance of food crops
vii. Through think-pair share, ask learners talk to parents about the importance of taking good care of crops
viii. Learners ask to explain uses of certain crops grown in the community

Suggested Homework
1. Draw, label and colour a crop.
Learners answer
2. Draw label and colour a plant.
Learners answer
3. Name three examples of vegetables and tuber crops.
   a. vegetables: tomatoes, onion, cabbage
   b. tubers: cassava, cocoyam, water yam

Reflections
- Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
- What went well?
- What went badly?

What would you improve next time?
In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

i. Ask learners to do the following by way of reflecting on the lesson:

   ii. Tell the class what you learnt during the lesson

   iii. Tell the class how you will use the knowledge acquired during the lesson

   iv. Which aspect of the lesson did you not understand?
Sub-strand 2: Plants and animals

KEY WORDS

HELPFUL LINKS
https://www.wowamazing.com/animals/top-9-ways-how-to-take-care-of-your-pets/

In pairs, ask learners to mention some domestic animals in the community and talk about why they are important.

Some animals live in the home of men. These are called Domestic animals. The cow, buffalo, horse, goat, sheep are some of the domestic animals.

- Animals are used by some plants to disperse seeds.
- Some animals can eat other plant-eating animals.

- Bees and other insects help pollinate flowers.
- Earthworms aerate the soil so that the roots of plants can better obtain oxygen.
- Man keep them for milk, food, hunting, riding and for many other purposes.
- The cow is most useful of all as it gives milk and milk is a good food and from that milk we produce butter, cheese, curd etc.,
- Men keep buffaloes for milk and for drawing carts and ploughing the field.
- The sheep is kept for its hair and flesh. The hair is made into wool. This wool is used in making warm clothes.
- The horse is kept for riding. Some horses draw carts and carriages, plough the field and carry loads. Some horses are trained to run races. A race horse sometimes brings a large fortune to its master.

Caring for domestic animals
Visit the veterinary office with your pet. It is necessary that you look for a good vet, who can provide your pet the best possible care, especially during times of emergency. Whenever something bad happens, make sure he or she is able to handle it well

Provide a healthy environment
When choosing a place for your pets, be sure you consider their comfort, health, and happiness.

1. Feed them with good food: When choosing
the food for your pets, you need to provide something healthy and of good-quality. It has to suit their age and breed so as to keep them healthy. Also, do not buy pet foods that use low-quality meat. Even if they are cheap, these are unhealthy for your pets.

2. Provide your pets with sufficient amount of food: Food labels aren’t always true. Sometimes, companies overestimate the serving sizes in order to increase their earnings.

- Do not give them people food: Although most foods are not dangerous for pets, some of them can cause problems. Among these foods are chocolates, coffee, alcohol, macadamia nuts, caffeine, avocado, raisins, grapes, raw eggs, chives, onions, milk, salt, garlic, xylitol, and raw bones.

- Do not forget the vaccinations: Vaccinations depend on the size and breed of the pet. This means that every pet has varying amounts of shots. So, ask your vet about the right vaccination your pet needs.

- Animal Comfort: Happy animals are productive animals. Happy, comfortable cows produce more milk.

- Housing provide good housing conditions for the animals.

- Exercise your pet: play with the pet to exercise

- Play more games

Activities to support learners
This is the first statement in the home.

1. Draw one of the animals.
2. Why do you think people keep those animals?
3. Explain ways which domestic animals are to be cared for.
4. Draw and colour two domestic animals.
5. Compose a rhyme using domestic animals.

Home work
1. Create a poster on how to care for domestic animal

2. Compose a poem using domestic animals

3. Draw the domestic animal you like best

Protect work
Learners talk to parents on the importance of being kind to animals by taking good care of them and share feedback in class.

Evaluation Exercise
Expected Answers
(Refer to Learners Book 2, pages 67 to 69 for exercises and Activities)
Exercise 1

Q1. Learners are to draw any two domestic animals and colour them.

Q2. Fowl, Cat, Turkey.

Q3. Animals give us protein, money, they are used to carry goods.

Q4. Tea plant, Coffee plant, Sugar cane

Q5. Turkey, fowl, Pig.

Q6. Plants give us shade, they are medicines, used for construction.

Q7. Learners are to search the following words in the box below and circle them.

Leaf, stem, root, flower, seed, plant, tree, fruit.

Q8. Nostrils
Q9. Pores
Q10. Reproduce
Q11. Eggs
Q12. Seeds
Q13. House them, take them to Veterinary doctor for vaccination
Q14. Dog and Cat

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
• What went well?
• What went badly?
• What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Test the learners understanding with the following activities/questions:

i. Tell the class what you learnt today.

ii. How will you apply the knowledge you gained in the lesson?
**CONTENT STANDARD:**
B2.2.3.1. Demonstrate understanding of the skills needed to map the environment.

**Indicator:**
B2.2.3.1. 1. Sketch and locate things in the classroom.

**CORE COMPETENCIES**
Critical thinking and Problem Solving
Communication and Collaboration, Paper, pencils, pictures, charts, computer, projector, blackboard/marker board and chalk/marker.

**SUBJECT SPECIFIC PRACTICES**
Observation, Creativity, Motor skills

**RESOURCES:**
Pencil Eraser, Drawing board, Tee square, Chop box, Chalk board, Tables, Chairs, Cardboard.

---

**Introduction**
Introduce the lesson by asking learners to observe the shapes of various things in the classroom. Ask them to describe the shape of some of the common things in the classroom.

Children need to acquire the skills to map the environment in which they live. Knowledge about mapping enables the children to understand the world around them.

Ask learners to discuss the skills they need to map the environment; a map is a drawing of the earth or part of the earth surface.

**Items needed for map making**
1. Drawing board
2. Pencil
3. Tee square
4. Cardboard
5. Protractor
6. Eraser
7. Compass
8. Calipers
9. Rule

Guide learners on how each of the items is used. This should first be demonstrated by the teacher. Examples could be demonstrated in the class on the use of the various instruments.

**Activities to support learners**
1. Name the things you can find in your classroom.
2. Which of those items has the shape of a rectangle, circle, a square?
3. Draw and colour items with rectangular shape in the school surroundings.

**Suggested Homework**
Draw two things in the home that have the shape of a:
1. Rectangle
2. Circle
3. Square

**Activities to support learners**
1. Name the things you can find in your classroom
2. Which of those items has the shape of a rectangle, circle, a square?

**Activities for the gifted**

i. Draw and colour items with rectangle shape in the school surroundings

**Evaluation Exercise**

**Expected Answers**

(Refer to Learners Book 2, pages 73 and 74 for exercises and Activities)

**Exercise 1**

Q3. The houses are rectangular, square and rounded in shape.

**Suggested Homework**

Draw two things in the home that have the shape of a:

1. Rectangle
2. Circle
3. Square

Learners answer

**Reflections**

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

1. Tell the class what you learnt during the lesson.
2. Tell the class how you will use the knowledge acquired during the lesson.
3. Which aspect of the lesson did you not understand?
Introduction
Everybody belongs to a family. Your family size may be small or large. But I have a small family size. The problem of large families are as follows:

1. Everything you own is a for all. It’s anything from blankets to jeans. Your parents don’t see the point in spending money when you have so many older cousins who can just give you their old clothes, toys, bed, phone, you name it.

2. No privacy. Privacy or having your own room is not possible. Even if your older sister or brother goes to college, your cousin who lives in another village decides to visit and take over your room for a few months.

3. No long showers. There is always a queue to use the bathroom, so you can’t spend more than 5 minutes in there before someone starts knocking on the door.

4. There’s never ~peace and quiet~ in your house. On the bright side, you can sleep through pretty much anything. You just learned how to block your ears.

5. Holidays are a madhouse with multiple tables for kids and adults. Classrooms are not the only place in your life where you have assigned seats.

6. You will usually meet a new family member at every holiday get together. It’s so awkward when a stranger comes up to you and knows your name, and asks how you have been.

7. Everyone always confuses you with one of your siblings or cousins. Your teachers/aunts and uncles/mom—no one can keep everyone’s names straight. You answer to any of your siblings’ names at this point, even your brothers.

8. You can never have slumber parties because your house is too crowded. There is no space for sleeping bags or places to braid each other’s hair.
9. **You eat really fast.** If you are late for dinner, there is a good chance there will be nothing left. And if you don’t put your name on your food, someone is sure to eat it up. You have to set the record straight: THIS IS MY BANKU. DO NOT EAT.

10. **Going anywhere as a family involves multiple trips, extra cars, or lapping up.** You would be better off renting an entire bus.

11. **Contagious illnesses:** If anything contagious enters the house of the large family, you are more likely to be affected. The germs have already spread before you’ve even spotted the symptoms.

**Activities to support learners**

1. Watch a video or picture of a large family.
2. Discuss your observations.
3. Draw a large family.
4. What three pieces of advice will you give to your parents about large family size?

**Evaluation Exercise**

**Expected Answers**

*(Refer to Learners Book 2, pages 78 and 79 for exercises and Activities)*

**Exercise 1**

Q1. Learners are to group their family members into male and female in tabular form as shown below and draw bar chat for the family.

<table>
<thead>
<tr>
<th>MALE</th>
<th>FEMALE</th>
<th>YEAR</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Q2.

a. when a member of the class is no more with the class
b. when a new member join the class
3. respect, tolerance, cooperation etc.

**Suggested Homework**

1. Draw and colour your family
Learners answer
2. How will you help a new member of your class to feel comfortable?
   a. respect the rights of member
   b. tolerate their views
   c. share ideas together
   d. cooperate with one another

**Reflections**

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

1. Tell the class what you learnt during the lesson
2. Tell the class how you will use the knowledge acquired during the lesson
3. Which aspect of the lesson did you not understand?
Strand: 3
Our beliefs and values
God is the one perfect being in the entire universe, completely worthy of worship. He is our creator, sustainer and salvation.

Guide learners to discuss the importance of worship at home.

1. **Guide learners to discuss the importance of worship at home.**

2. **Glorifies and Honors God** — This is the primary and essential reason.

3. **Centres the Home** Family worship has the wonderful effect of centering our homes upon our object of worship.

4. **It strengthens our faith** The home may be the hardest place to live out our spiritual lives.

5. **Encourages Peace in the Home** – We are sinners living under the same roof in tight quarters. Family worship helps us confront our sins and understand their effects upon one another.

6. **Binds the Family Together** In our fast-moving society there are few things that a family does together daily. Even eating a meal together these days seems like a feat. What if your family gathered together daily? And what if that gathering was for worship? It would become the most important and central aspect of its life.

7. **Provides Common Knowledge** – As the Scriptures are read together in family worship, the family grows in common knowledge. Conversations around the dinner table or in the car will change dramatically as you have a common knowledge from which to converse.
8. **Trains Children for Corporate Worship**  
   - Family worship provides the added benefit of training our children for corporate worship. As they sit and listen to the Word of God, hear prayers, and sing hymns these elements in corporate worship will take on a new meaning. The value of this cannot be overestimated.

9. **Encourages our Children in Christ**  
   - They will see that for mom and dad worship is not just something they do on Sunday mornings. It is something at the very core of their being, important enough that they center their home upon it. We are not raising children just to be moral and competent people, but worshipers of God.

10. **Reinforces Spiritual Headship**  
    - As a father leads his children and wife before God’s throne nightly and disciples them in their object of faith, they will increasingly look to him for spiritual leadership. This has the added benefit of reinforcing with the father/husband the spiritual mantle that is upon his shoulders.

11. **Provides Systematic Discipleship**  
    - Daily family worship will provide a strong foundation that is built upon hearing the Word daily, praying daily, and giving thanks daily. It takes time to build a strong house.

12. **Provides Generational Testimony**  
    - One of the greatest benefits of family worship is the actual passing on of our faith to the next generation. We are teaching our children how to read the Scriptures, pray, confess their sins, sing unto God, and more. Our children will leave the home with memories of this daily worship. They will have learned by watching and participating how to search the Bible, intercede for their future children, and rejoice in God. And by God’s grace and mercy they will carry it to the next generation of our families.

**Guide learners to discuss the importance of worship at school**

Collective worship in schools should aim to provide the opportunity for learners:

- To worship God
- To consider spiritual and moral issues and to explore their own beliefs
- To encourage participation and response, whether through active involvement in the presentation of worship or through listening to and joining in the worship offered
- To develop community spirit, promote a common ethos and shared values, and reinforce positive attitudes
- By giving learners an opportunity to reflect on the major themes of human existence we enable them to develop their own views
- To provide a structured approach to the education of the spirit, understanding where to start, what the end point would be and how to get there

Guide learners to discuss the importance of worship church/mosque/shrine.

- It unifies the congregation
- It is a great way to praise the lord
- It is a wonderful way to pray together
- It solidifies and teaches spiritual truth
- It can aid in revival

In groups, guide learners to discuss the importance of Christian worship.

**Points to consider:**

**Worship draws Christians closer to God.**  
Psalm 23 popular song

Through worship we communicate with God and have fellowship with Him in our daily lives.

Worshipping God helps the believer to stay away from sin and remains righteous.

We build our faith in God and strengthens us through worship.

Worshipping God helps Christians to uplift their spirit.

Christians worship God because it is a commandment from Him.

Worshipping God attracts blessings.

In pairs, learners talk about the importance of Islamic worship.
Points to consider:
Prayer helps us to be righteous to Allah at all times.
Prayer helps us draw closer to Allah.
We pray to Allah for forgiveness of our sins.
Muslims prayer to God shows their submission to the will of Allah.
Muslims show humility to Allah in their prayers.
Muslims pray to help them understand the will of Allah.

Discuss with learners why traditionalist worship.

Points to note:
It creates a feeling of fellowship.
Traditional worship helps the community to mark the important events of occasions.
Traditional worship promotes moral values for the worshippers.
Worship helps to maintain harmony in the society.
Traditional worship helps us to appreciate the blessings of God.
It helps in the maintenance of good relationship.
Traditional worship helps us to appreciate the blessings of God.
It helps in the maintenance of good relationship with the ancestors.
To recognise the supremacy of God over human beings.

Observe mode of worship in pictures/videos or on a visit to church, mosque or the shrine
Guide learners to understand the mode of worship using pictures/videos and practical demonstrations and visits to church, mosque and the shrine. Let learners understand that each religion has its own mode of worship and must be abided by each member. Let each student take note of what they have observed at the three sites of worship. After this visit, let the learners present their findings to the class for discussion.

Sing/recite popular religious songs/creed in the three main religions in Ghana.
Guide learners to sing and recite popular religious creed from the three religions in Ghana. Let learners understand that each religion has its own songs/creed and ways of worshipping God. A creed (also known as a confession, symbol, or statement of faith) is a statement of the shared beliefs of (an often religious) community in the form of a fixed formula summarizing core tenets.

Various religious traditions consider creed to be sacred, or of central importance to their religious tradition. Many religions and spiritual movements believe that their sacred creeds are divinely or supernaturally inspired.

Let learners sing or recite some simple verses from the Bible or Quran and some sayings from oral tradition, Example,

i. The Lord’s Prayer (Christian)
ii. Al-Fathila (Islam)
iii. Traditional prayer (ATR). This is in the form of pouring libation to the gods and at the same time making your prayer or intentions known to the gods using hard drinks, water or roasted corn flour in water.

Write simple texts from religious songs and recitations
Guide learners to write simple texts from religious songs and recitations. Let them understand that most religious songs hinge on religious texts and therefore, can write simple texts from those songs. They should know that those songs are inspiring and make one feel more religious.

Activities to support learners
1. Get them to mention the religion they belong.
2. Ask them the benefits they get from worship. They should discuss the similarities and the importance of worship among the three main religions in Ghana.
3. They should also talk about the differences among the three main religions in Ghana.
Evaluation Exercise

Expected Answers

(Refer to Learners Book 2, page 89 for exercises and Activities)

Exercise 1
Q1. five
Q2. for unity and peace
Q3. give offering during worship
Q4.

a. Worship brings us closer to God (Psalm 23)

b. We speak to God and have fellowship with Him in our daily lives.

c. We pray to Allah for forgiveness of our sins.

d. Muslims prayer to God and show their submission to the will of Allah.

e. It promotes good relationship with the ancestors.

f. It gives God the greatest over human beings

Suggested Homework
Draw and colour the worship sessions of the three main religions in Ghana

Learners answer

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

- Tell the class what you learnt during the lesson.

- Tell the class how you will use the knowledge acquired during the lesson.

- Which aspect of the lesson did you not understand?
Introduction

In book 1, we learnt about religious festivals the various ethnic groups celebrate in their traditional areas. We learnt that festivals are celebrated to mark important events in their beliefs and practices.

Discuss with learners about festivals they have witnessed:

Examples are:

i. Islam - Eid-ul-Fitr, Eid-ul-Adha
ii. Christianity - Easter, Christmas
iii. Traditional - Kundum, Odwira, Damba, Bugum, Yam Festival.

Discuss how the main religions celebrate their festivals

Ask learners to talk about the religious activities their families perform to show commitment to God. Morning devotion, going to church, mosque or the shrine.

Role-play activities that take place during the festivals

Guide learners to role-play activities that take place during festivals in Ghana. Learners should know that festivals go with the performance of various activities and every traditional area has its own activities they perform including the other two main religions in Ghana, Christian and Islamic. Let every learner participate fully in the activity and make critical observations so that they can present their findings to the class.

Draw scenes from festivals.

Assist learners to understand that festivals are colourful, which makes the celebrations beautiful. Learners are to draw this colourful events with people in various actions of the festivals being celebrated. Let learners draw festival scenes into their drawing book.

Activities to support learners

1. Mention the festivals celebrated by the three main religions in Ghana.
2. They should talk about what they do for God to be happy with them.
3. They should investigate how the main religions celebrate their festivals.
Evaluation Exercise

Expected Answers
(Refer to Learners Book 2, pages 97 to 100 for exercises and Activities)

Exercise 1
Q1. D. Easter
Q2. B. Eid-ul-Fitr
Q3. B. Easter
Q4. B. December
Q5. C. Akwapem
Q6. Eid-ul-Fitr
Q7. Hooting at hunger
Q8. Northern part of Ghana
Q9. Birth

Exercise 2

Suggested Homework
1. Describe how one festival is celebrated by Christians
   Learners answer
2. Describe how one festival is celebrated by Muslims
   Learners answer
3. Describe how one festival is celebrated by Traditional worshippers
   Learners answer
4. Describe one festival celebrated by your religion.
   Learners answer

Reflection
Teacher reflects on the following in relation to the indicators and makes amends in the next lessons:
1. What went well?
2. What went badly?
3. What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

4. Which aspect of the lesson did you not understand?
Introduction

Human beings have certain qualities of God. This makes man very important in all God’s creation. For this reason, human beings must be protected to help them do what God created them to do on earth.

In order to help human beings to do what God created them to do, we have as human beings universally agreed that human beings must have rights and freedoms.

The Human rights are the basic rights and freedoms that belong to every person in the world from birth till death.

In groups ask learners to talk about the importance of allowing others to enjoy their rights.

It is important to know that our rights and freedoms should not affect other people’s liberty. We must exercise our rights and freedoms as they are written in the constitution of Ghana.

We must allow other people to also enjoy their rights by tolerating and respecting their rights and freedoms.

Human rights enable people to satisfy their basic needs, such as food, housing, and education, so they can take full advantage of all opportunities.

When we exercise our rights within the law, we may live in peace with others.

This will also ensure teamwork and cooperation in the society.

How do we respect the rights of others?

Listen. Listening to what another person has to say is a basic way to respect them.

Affirm. When we affirm someone, we’re giving evidence that they matter.

Serve. ...

Be Kind. ...

Be Polite. ...

Be Thankful.

In demonstrating the need to respect the rights of others, there is the need for learners to show respect to their parents, siblings, to your teacher in a classroom, and others in the community. Learners be made aware that they have the duty to obey the rights of others just as they want others to do same to them.
If they do this their rights to education especially will be guaranteed. Learners should be encouraged to read other books on basic human rights so they can be abreast with time.

In respecting the rights of others, learners should be taken through the following:

**Be empathetic**
Empathy is where respect begins, and this means understanding someone else’s feelings by imagining yourself in their situation. Put yourself in someone else’s shoes. Think about how you would like to be treated, and then treat the other person the same way.

**Know your own rights**
Did you know that you can find the bill of rights online? It can be a long read, but it is important to know what your rights are, so that you can protect your rights and the rights of others.

**Listen to others**
The best way to understand someone else and what they have been through is simply to listen to them, hear how they feel. Everyone has their own story, and also their own opinions, and perspectives on how they view the world.

**Appreciate your differences**
We come from a very diverse country, which is what makes every one of us so special. But a lot of the time, our differences are used as a reason to judge others. This is discrimination and stigma. That shouldn’t be the case. We should always use being different as a chance to learn new things from each other. And being different is beautiful. We are all unique in our personalities, gender, race, beliefs, sexual orientation, culture, and background; and that should be celebrated.

**Role-play ways of allowing others to enjoy their rights**
Guide learners to role-play ways of allowing others to enjoy their rights as humankind or citizens of a nation. Let learners understand that as long as they will want others to respect their rights, they must also do same to others to ensure tolerance, peace and harmony. Let every learner participate actively and take notes of ongoing activities being performed for which learners should be assessed on that.

**Activities to support learners**
1. They should mention some basic needs in their lives.
2. Ask them to talk about how those things help them when they get them.
3. They should discuss how they can allow people to enjoy their rights.
4. They should draw people enjoying some rights. They should compose a poem with the basic rights.

**Evaluation Exercise**

**Expected Answers**

(Refer to Learners Book 2, pages 109 to 110 for exercises and Activities)

**Exercise 1**
- Q1. B. Survive
- Q2. C. Right to insult
- Q3. C. Peace
- Q4. D. Right to good health
- Q5. A. Right to life
- Q6. Fundamental
- Q7. The right to life
- Q8. Holidays

**Suggested Homework**
Describe how people help others in their neighbourhood to enjoy their rights.

**Learners to answer**

Introduction
Lead learners to tell stories about Jesus Christ in the Holy Bible and Prophet Muhammad in the Holy Quran that they have learnt during Children service session in the Church and Mosque respectively.

Talk about the early lives of these religious leaders.

Guide learners to narrate the story of the early life of the religious leaders in the three religions in Ghana. Let learners get to know that every religion that is being practiced in the world has a leader example, Christian religion has its leader as Jesus Christ, Islam has Prophet Muhammad and African Traditional Religion has also gotten their various leaders such as Okomfo Anokye of the Akan tradition of Ghana and Tohazie and that every leader draws his inspiration from one God, the Almighty. Learners should be aware that except Jesus Christ whose conception was by the Virgin after the Holy Spirit delivered a message of the birth of the Messiah through the Angel Gabriel to Mary and Joseph, the rest did not happen this way.

Let learners understand that the followers of the Christian religions worship God through Jesus Christ, Muslims do that through the Holy Prophet Muhammad and the believers in the African Traditional Religion Worship God through objects/images such as stones, water and trees among others. All the leaders perform a lot of miracles in their life time on this earth to prove the existence of a supernatural power in our midst. In addition, the leaders were at the forefront of spreading the word of God to ensure that they woo believers into the kingdom of God through the Scriptures but those in the African Traditional Religion do that through oral tradition and do not preach to woo people into their kingdom rather they go by initiations and incantations to prepare a follower or client into their kingdom.
More so, let learners understand that all these religious leaders exhibited good moral life when they were on this earth and that we need to emulate them so we can live upright life before we go into the next world. Examples include love, hard work, commitment, dedication, peace, empathy, forgiveness and so forth.

Talk about the moral lessons they have learnt from early lives of the religious leaders

Guide learners to understand the meaning of morality and the moral lessons exhibited by these leaders. Morality is a particular system of values and principles of conduct or the extent to which an action is right or wrong. The moral lessons of the early live of religious leaders cannot be discounted. These leaders led a kind of life that has positively changed the life of societies all over the world. Some of the moral lessons include the following:

i. They direct human beings to God, their creator
ii. They lived good lives in such a way that others will learn to do the same example, they must be holy, humble, forgiving, tolerant, and faithful among others.
iii. They help us to live in unity and not in chaos
iv. They cooperate with others in their communities
v. They showed courage in their latter lives
vi. They prepare us towards the judgement day by telling us how we would account for our stewardship
vii. They make us aware about God’s final reward and punishment for the righteous and unrighteous respectively
viii. They prompted leadership in their activities through humility and love for humankind
ix. They show how brave our fore bearers were and that we should also be brave in facing difficult situations in life.

Apply the moral lessons from the religious leaders in their daily lives.

Guide learners to demonstrate in their daily lives the moral lessons learnt from the lives of the religious leaders.

They can do this not only to their parents at home but to any other person in the school or the community. Below are how learners can demonstrate moral lessons learnt:

i. Learners are encouraged to ensure that they demonstrate or show in their daily lives the moral life led by the religious leaders mentioned in the text.
ii. Learners are to be obedient to their parents, teachers and other people in society.
iii. Learners should be hard working so that they get good results in whatever they do.
iv. They have to love one another as showed by religious leaders
v. Learners should show compassion towards one another in times of difficulty.
vi. Learners must show bravery in life situations no matter how difficult they might be.

Talk about the need to emulate the good moral values of these religious leaders, so that they can be good citizens.

Guide learners in discussion to realize the need to emulate the good moral values of these religious leaders, so that they can be good citizens. Let learners understand that these religious leaders led good moral life that all followers would like to emulate. Learners should know that there is the need because the leaders’ life help to morally shape our lives, make us obedient, have love for one another, forgive others who trespass, and lead us into the kingdom of God among others.

Leaders played very important roles that have positive impact on their followers. Some of these leaders are Jesus Christ, Prophet Mohammad, Okomfo Anokye.

Guide Learners to mention the names of the religious leaders:

The following points should be considered
i. Jesus Christ,
ii. The Holy Prophet (Sallahu Alaihi Wasallam- S.A.W. (Peace be upon him),
iii. Okomfo Anokye,

Leaders...
Through whole class discussion guide learners to talk about the early lives of these religious leaders.

i. The Lord Jesus Christ;
ii. The Holy Prophet Muhammad S.A.W.
iii. A Traditional Leader

Let learners role-play some important aspects of the early life of a religious leader.

Learners, through questions and answers, to talk about the moral lessons they have learnt from early lives of the religious leaders of the three main religions in Ghana.

The following points should be considered.

i. Love God with all that you are
ii. If you want forgiveness, first you must forgive others.
iii. They were humble to others
iv. They were kind to people
v. They were filled with compassion

Guide learners to explain how they will apply the moral lessons from the religious leaders in their daily lives.

The following points should be considered

i. Piety,
ii. Honesty,
iii. Sacrifice
iv. Patience
v. Hard work
vi. Courage
vii. Perseverance
viii. Humble
ix. Righteous
x. Kind
xi. Wish good for others
xii. Trustworthy
xiii. Obedience

Guide learners to role-play the moral lives of the religious leaders.

Through whole class discussion guide learners to talk about the need to emulate the good moral values of these religious leaders, so that they can be good citizens.

**Activities to support learners**

1. Draw Jesus Christ washing the feet of the disciples
2. Learners role-play the moral lives of the religious leaders
3. Write the names of this leaders
4. Write five sentences about the early life of Jesus Christ.
5. State five moral lessons learnt from these religious leaders.
6. State why we should emulate the good moral values of this leaders.
7. Explain how you will apply any of the moral values to your life.

**Evaluation Exercise**

**Expected Answers**

(Refer to Learners Book 2, pages 117 to 199 for exercises and Activities)

**Exercise 1**

Q1. C. Mohammed
Q2. D. Turning water into wine
Q3. B. Trading
Q4. C. The golden stool
Q5. A. Hatred
Q6. Christian, Islamic and Traditional religions
Q7. Jesus Christ
Q8. Mohammed

**Suggested Homework**

1. Write three things about the early life of Jesus Christ.
   a. He performed miracles
   b. He taught people in the church
   c. He preached to the multitude
2. State three moral lessons learnt from this religious leader
   a. obedience
   b. tolerance
   c. living in peace

3. State why we should emulate the good moral values of this leader
   a. we will be obedient to people
   b. be hard working
   c. we will love one another
   d. we will be courageous

4. Explain how you will apply any of the moral lessons to your life.
   a. by learning hard in school
   b. by respecting people
   c. by showing love to others
   d. by worshiping God

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

1. Tell the class what you learnt during the lesson
2. Tell the class how you will use the knowledge acquired during the lesson
3. Which aspect of the lesson did you not understand?
Strand: Our nation Ghana
Introduction

Values are basic and fundamental beliefs that guide attitudes and actions. They help us to determine what is important to us.

What are some of the things you value in life? When we value or cherish something, we pay attention to make sure they are well preserved or kept.

Values are not the visible things we can see and touch. We can think of values as qualities or behaviours that we demonstrate in our daily lives. They help us to lead acceptable lives in the community.

Learners in groups list values and behaviours cherished in the community.

The following points should be considered:

i. Respect,
ii. Teamwork,
iii. Honesty,
iv. Hard Work,
v. Obedience,
vi. Tolerance
vii. Patriotism
viii. High Achievement
ix. Volunteerism
x. Peace

Guide learners to role play the roles of members of the community in the upbringing of its members: education, discipline, counselling, etc.

Learners role play the following:

i. Patriotism
ii. Tolerance
iii. Volunteerism
iv. Love

Through whole class discussion guide learners to discuss the importance of practicing societal values.

The following points should be considered:

i. Promotes law and order
ii. Gives us sense of identity
iii. Encourages unity
iv. Makes people responsible

Guide learners to discuss ways of developing values in children.

The following points should be considered:

i. Educating them on the importance of values
ii. Disciplining them in a way to correct wrong doing.
iii. Organising counselling sessions for them.
iv. Teaching them to contribute their own money to charity.
v. Consciously teach and model good sportsmanship.

Role-play the roles of members of the community in the upbringing of its members

Assist learners to demonstrate ways by which values of society guide their decisions and actions. Value-based decision making means understanding what is most important to you and then incorporating this into your life on a daily basis. Knowing exactly what you believe also helps you make the decisions that naturally lead to a more fulfilling career. Learners should understand that whatever we do as individuals are being guided by these values and a little deviation from them makes people lose interest in us as well as respect. You may be ostracized, banned from or end up in jail if this deviant behaviour in you is to the extreme showing gross disrespect or violation of what everybody cherishes in society. If you want to do something untoward the values are there to serve as checks and balances in your life so that you reconsider your decision. Learners should be guided by the fact that socially acceptable values have these four qualities:

i. They tell us what to do and what not to do

ii. They are socially shared (in other words, most people have a general understanding and awareness of the norm)

iii. They carry an element of control or sanction, which can invoke feelings of guilt or fear if the social norm is not met

iv. They can actually constrain behaviour - or at least highly influence it

Learners should know that we make decisions every day - many times over - about how to act based on the societal values that dictate our social environments. Societal values work on us so deeply. They sometimes influence major life decisions such as how to **treat people, what career path to take, how to vote, and when and whom to marry.**

Knowing your values enables you to think clearly about the decisions you make in relation to any and all aspects of your life. When a new opportunity arises, whether it is a business partnership, a new job, a family holiday or you have been asked your date of birth, you are able to carefully consider your values. Does this opportunity meet your values, and will it take you a step closer towards your goal? If it does, what decisions do you need to make to implement it? If not, then the decision has been made for you. The answer is simple, "no thank you".

Some roles of members of the community in the upbringing of its members include education, discipline, counselling, patriotism, tolerance, volunteerism, and showing love.

**Activities to support learners**

i. What are values?

ii. State three ways of developing values in children

iii. State three importance of practicing societal values

iv. Draw people doing community work

v. Write four cherished values of your community

vi. Write four (4) ways children can learn values in the community

**Evaluation Exercise**

**Expected Answers**

(Refer to Learners Book 2, pages 125 to 127 for exercises and Activities)

**Exercise 1**

Q1. b. fear

Q2. d. council the child on issues

Q3. C. patriotism

Q4. C. be law abiding

Q5. d. volunteer
Suggested Homework

1. Write four cherished values of your community.
   respect, team work, hard work, commitment

2. Mention three roles of members of the community in the upbringing of each member
   a. make sure children are educated
   b. make sure children are taught values of the community
   c. make sure children receive enough training to make them disciplined

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

1. Tell the class what you learnt during the lesson
2. Tell the class how you will use the knowledge acquired during the lesson
3. Which aspect of the lesson did you not understand?
Introduction

A symbol can be described as something visible that is used to represent an idea, belief or another thing. National symbols are, therefore, patriotic symbols representing nations and countries.

Guide learners to demonstrate various ways of showing respect to the national symbols.

CONTENT STANDARD
B2.4.2.1. Demonstrate understanding of national symbols

INDICATOR
B2.4.2.1.1. Explain ways to appreciate national symbols, as a responsible citizen

CORE COMPETENCIES
Communication and Collaboration
Creativity and Innovation
Personal Development and Leadership
Critical Thinking and Problem Solving

SUBJECT SPECIFIC PRACTICES
Responsibility, Love, Sharing, Commitment, Obedience, Respect, Humility, Honesty, Trust

RESOURCES:
Ghanaian cedi notes, Coins, Pictures, Videos, Paper, pencils, charts, computer, projector, blackboard/markboard and chalk/marker.

KEY WORDS
National symbols, importance, coat of arm, the Ghana flag,

OTHER USEFUL MATERIALS
English dictionary

HELPFULINK:

The following points should be considered

i. Standing while the National Anthem is being played

ii. Reciting national pledge

iii. Singing the national anthem at school and national durbars

Learners sing/recite the National Anthem and Pledge.

The Pledge
I promise on my honour
To be faithful and loyal to Ghana my motherland I pledge myself to the service of Ghana
With all my strength and with all my heart I promise to hold in high esteem our heritage Won for us through the blood and toll of our fathers And I pledge myself in all things To uphold and defend the good name of Ghana So help me God.

Learners, through role play, talk about ways they can help to protect national symbols.

Demonstrate various ways of showing respect to the national symbols

Guide learners to understand that there is the need to show respect to the National symbols because of the history behind them. Let learners know that people fought and shed their blood for the Independence of the nation, Ghana so there is the need for showing respect to them represented by the flag of Ghana. We can do that by standing while the National Anthem is being played, salute the National Flag, put right hand on chest while reciting the National Pledge. Encourage learners to do these at all times and at any place they may find themselves.
Sing/recite the National Anthem and National Pledge

Lead learners to sing/recite the National Anthem and the National pledge. Let learners understand that National Anthem and the National pledge and any other symbol of the nation is a historical artefact and cornerstone of our nation and that it must be preserved. Learners must be taught in the classroom and at Assembly ground how to sing/recite them very well. They should be aware that Ghanaians are identified by the National Flag, the Coat of Arms and other symbols of Ghana such as Adinkra. In order to be perfect in the singing and recitation learners could be tasked to keep on practicing at home anytime school closes or are on holiday. They could also be encouraged to have recorded voice of the National Anthem and the National Pledge played on the mobile phones of their parents.

Teacher should ensure that learners get to know that the National Pledge of Ghana is recited immediately after the national anthem “God Bless Our Homeland Ghana” and is as follows: I promise on my honour. To be faithful and loyal to Ghana my motherland. I pledge myself to the service of Ghana. With all my strength and with all my heart. I promise to hold in high esteem…. The following points should be considered

i. Obedience,
ii. Reporting people who destroy the national symbols,
iii. Respect for the symbols.

Activities to support learners
i. Draw the national flag
ii. Draw the Coat of Arms iii. What does the colours in the national flag stand for?
iii. Write any three national symbols
iv. Draw the independence Arch
v. Write down the first stanza of the National Anthem
vi. List five National Symbols of Ghana
vii. Write down the National Pledge
viii. Draw and colour the State Sword

Evaluation Exercise
Expected Answers

(Refer to Learners Book 2, pages 133 to 136 for exercises and Activities)  
Exercise 1

Q2. Respect the symbols, apply the good morals in the national anthem in our lives, report people who destroy national symbol to the appropriate authorities.

Q3. Coin, Coat of Arms, Parliamentary mace, national flag,

Suggested Homework

The Ghana Cedi Notes, Coins, Ghana Flag, Coat of Arms, Independence Arc.

Q2. Respect the symbols, apply the good morals in the national anthem in our lives, report people who destroy national symbol to the appropriate authorities.

Ways we can help to protect national symbols.

Guide learners to understand that the National symbols mentioned above under “materials required” have been protected since the birth of the country, Ghana so that generations yet unborn can also benefit from our culture. Learners should be aware that these symbols can be kept in the National Museums for safe keeping. Discuss with them that apart from those measures mentioned above there are other ways of appreciating and protecting National symbols including obedience, reporting people who destroy the national symbols.
1. **Q3. Coin, Coat of Arms, Parliamentary mace, national flag** List five National Symbols of Ghana

2. **Write the National Pledge and recite.**
Learners answer

**Reflections**
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task.

The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

1. Tell the class what you learnt during the lesson.
2. Tell the how you educate the family with the knowledge gained from the lesson.
3. Tell the class how you will use the knowledge acquired during the lesson.
4. Which aspect of the lesson did you not understand?
**CONTENT STANDARD**
B2.4.3.1. Exhibit knowledge of conserving energy.

**INDICATOR**
B2.4.3.1.1. Describe ways of conserving energy in the home, school and community.

Solar panels
Energy serving bulbs
Pictures
Videos

**OTHER USEFUL MATERIALS**
English dictionary

**KEY WORDS**
Conserve, energy, unplug, bulk, turnoff.

**HELPFULLINK:**

---

**Introduction**

**Energy Conservation.**
It is the practice of reducing the quantity of energy used or consumption of energy services.

Guide learners, through questions and answers, to explain energy conservation.

---

The following points should be considered: the prevention of the wasteful usage of energy.

Guide learners, through think-pair-share, to talk about strategies for energy conservation, e.g.

- Using solar or wind energy instead of petroleum,
- Making efforts to reduce the consumption of energy (e.g. turning off lights when leaving the room)
- Recycling plastics or paper, using more natural light from the sun).

Guide learners to describe conserving energy in their homes or in the community, using small group drama.

Learners talk about ways of conserving energy; the following points should be considered:

i. Turning off the light,
ii. Turn off television if not in use.
iii. Unplug iron after use
iv. Turn off fan after use.
v. We should iron our clothes in bulk.
vi. Defrost your fridge and freezer regularly.
vii. Switch to new, energy-efficient light bulbs
viii. Don’t leave electrical devices on standby

Learners sing and recite rhymes on how energy can be conserved in the community.

The following song should be considered:

**If You Save Energy and You Know It, Clap Your Hands**

**Verse 1:**
If You **Use Less** and you know it, clap your hands.

If **You Use Less** and you know it, clap your hands.

If **You Use Less** and you know it, then your face will really show it.
If You Use Less and you know it, clap your hands.

Verse 2:
If You Unplug and you know it, stomp your feet.

Verse 3:
If You Reuse and you know it, wave your hands.

Final verse:
If You Save Energy and you know it, do all three.

Through whole class discussion guide learners to discuss the importance of energy conservation. The following points should be considered:

i. It plays important role of lessening climate change.
ii. Low electricity bills, reduced maintenance, operation and service costs for electronic equipment.
iii. We save the country a lot of money when we save energy.
iv. It reduces environmental pollution.

Activities to support learners

i. Draw a girl turning off light
ii. Draw someone closing a fridge
iii. Write down three ways of conserving energy.
iv. Learners role-play how energy can be conserved in the community.

Evaluation Exercise

Expected Answers
(Refer to Learners Book 2, page 144 for exercises and Activities)

Exercise 1
1. unplug
2. lights
3. thermostat
4. heater

Exercise 2
Q1. Use of solar energy, wind energy, turn off completely all electrical gadgets if not in use.
Q2. It makes us pay less for energy, it saves energy for the producing company, it promotes energy efficiency.
Q3. Learners to draw, label and colour a solar panel or a wind turbine.

Suggested Homework

1. What is energy conservation?
   a. it about using anergy wisely
2. State four importance of energy conservation
   a. we pay less bills
   b. To maintain our electrical equipment in good condition.
   c. We save the country a lot of money when we save energy.

3. State three ways we can conserve energy in our homes
   a. we should turn off all gadgets if not in use.
   b. we should use gadgets that use less energy.
   c. we should use cheaper source of energy. Example, solar or wind energy.

4. Write a song on energy conservation
Introduction
Crop farming means the practice of producing agricultural crops. The food crops grown in Ghana include millet, maize, rice, groundnuts, tomatoes and onions. Others are cassava, maize, water yam, cocoyam, plantain, pepper and garden eggs.

Through whole class discussion guide learners to talk about various farming activities in Ghana. The following points should be considered:

i. Crop farming
ii. Cash crop farming
iii. Livestock farming
iv. Flower garden
v. Fish farming
vi. Poultry farming

Learners visit and observe different farm activities: Poultry farm, crop farm, flower garden, etc.

Learners in groups talk about importance of farming in their community.

The following points should be considered.

i. Provides food
ii. Provides employment
iii. Export earning
iv. Provides raw materials for the factories
v. The government and individual farmer get money from farming

Guide learners to draw the main farm activity in their community.

Learners observe simple agricultural tools and talk about their uses.

The following points should be considered.

i. Hoe
ii. Cutlass
iii. Watering can
iv. Axe
v. Hand trowel  
iv. Mattock  
vii. Rake  
viii. Hand fork  

Learners visit the school garden/farms or gardens close to the school and let learners observe and talk about tools used for digging, pruning, harvesting, weeding, watering.

Show pictures/videos of different types of agricultural tools from books, and let learners talk about their differences and draw.

Guide Learners to sketch different agricultural tools.

Learners in groups talk about ways of caring for agricultural tools.

The following points should be considered:

i. Clean the tools after use,
ii. Oil metallic agricultural tools,
iii. keep the tools in appropriate place,
iv. use the tool for the appropriate work.

Activities to support learners

i. Mention three farming activities in Ghana
ii. Write five farming or agricultural tools
iii. Draw one agricultural tool
iv. Demonstrate how to take of agricultural tools
v. State four ways of caring for agricultural tools
vi. State four importance of farming in Ghana
vii. List four agricultural tools and state their uses
viii. What is farming
ix. Write five farming or agricultural tools

Evaluation Exercise

Expected Answers

(Refer to Learners Book 2, pages 147 for exercises and Activities)

1. Farming is the cultivation of crops and the rearing of animals.

2.

a. fishing
b. crop farming
c. livestock
d. flower gardening

3. learners describe one of the above.

4. a. it gives us money
b. it gives us food
c. it gives us job
Evaluation Exercise

Expected Answers
(Refer to Learners Book 2, pages 149 and 150 for exercises and Activities)

Exercise 1

Q1.
hoe: for weeding grasses in the farm
cutlass: for cutting trees and grasses

Q2.
a. by cleaning them after use
b. keeping them at safe places.
c. we should oil them to prevent rusting.
b. it gives us food
c. it gives us job

Q3. Learners answer depending on tool they choose.

Q4.
a. to last longer.
b. to make them work well
c. to reduce cost of maintainence

Suggested Homework

1. State four ways of caring for agricultural tools
   a. water plants regularly
   b. prune branches of trees regularly
   c. provide mulch around plants

2. State four importance of farming in Ghana
   a. it gives us money
   b. it gives us food
   c. it gives us job

3. List four agricultural tools and state their uses
   a. it gives us money
   b. it gives us food
   c. it gives us job

Reflections

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

i. Tell the class what you learnt during the lesson
ii. Tell the class how you are going to take care of farming tools
iii. Tell the class how you will use the knowledge acquired during the lesson
iv. Which aspect of the lesson did you not understand?
Strand: My global community
CONTENT STANDARD:  
B2.5.1.1. Demonstrate knowledge of Ghana’s neighbouring countries.

INDICATOR:  
B2.5.1.1.1. Mention Ghana’s neighbours and locate them on a map.

CORE COMPETENCIES

KEYWORDS:  
Locate

Introduction  
Ghana is a country located along the Gulf of Guinea and Atlantic Ocean in the sub region of West Africa. Ghana is boarded by the Ivory Coast in the west, Burkina Faso in the north and Togo in the east.

Other neighbouring countries of Ghana includes Nigeria, Liberia, Benin, Cameroon, Senegal, Sierra Leone, Niger, Gambia, Guinea Bissau, Guinea, Mali.

Song on West African neighbours.  
Mauritania, Mali, Burkina Faso  
Niger, Niger, Chad Republic  
From Senegal to Gambia, Guinea Bissau, Sierra Leone  
We go to Nigeria, We go to Côte D’voire, Ghana, Togo land, Republic of Benin, Nigeria, Cameroon.

In groups, guide learners locate Ghana on a map of West Africa using the idea of the cardinal points.

Discuss the neighbours of Ghana with the learners using the idea of the cardinal points.

Burkina Faso is to the North  
Togo is to the East  
La Cote d’Ivoire is to the west

Note: there is no country in the south. The Atlantic Ocean is located there.

In groups, guide learners to locate Ghana’s neighbours on a map of West Africa using the idea of the cardinal points.

Activities to support learners  
i. Colour the map of Ghana from an outline map of Africa  
ii. Learners compose a song/rhyme on Ghana and her neighbours  
iii. Guide the learners to cut out the map of Ghana from a sketched West Africa map.  
iv. Ask learners to trace the map of Ghana
Evaluation Exercise
Expected Answers
(Refer to Learners Book 2, pages 157 and 158 for exercises and Activities)

Exercise 1
Q1. Ghana is located along the Gulf of Guinea and Atlantic Ocean in the sub region of West Africa. Ghana is boarded by Ivory Coast in the west, Burkina Faso in the north and Togo in the east.
Q2. East
Q3. North
Q5. Ghana-Accra,
Q6. Togo-Lome
Q7. Nigeria-Abuja
Q8. Liberia-Monrovia
Q10. Learners are to draw and colour map of Ghana showing her neighbours.

Suggested Homework
Colour the map of Ghana from a West African map.

Learners answer

Reflections

CONTENT STANDARD:
B2.5.2.1. Demonstrate understanding of the parts of a computer

INDICATOR:
B2.5.2.1.1. Identify the left, right mouse buttons, use the mouse to perform single and double clicking.

CORE COMPETENCIES
Creativity and Innovation Communication and Collaboration Cultural Identity and Global Citizenship Personal Development and Leadership Digital Literacy

SUBJECT SPECIFIC PRACTICES
Keyboarding Skills

RESOURCES:
A computer mouse or its picture, Paper, pencils, pictures, charts, computer and its parts, projector, blackboard/marker board and chalk/marker.

OTHER USEFUL MATERIALS
English dictionary

KEY WORD
program, launch, folder, icons

Introduction
A mouse is a device used with the computer. We use our hands to operate the mouse. It is a small object you can roll along a hard surface. Its name is derived from its shape, which look a bit like a mouse, with a connecting wire that one can imagine to be the mouse tail. It has a trackball underneath in a holder, which helps to move its cursor on a screen. It is called a scroll wheel. When you move a mouse, it moves the pointer in the same directions on the computer screen.

Uses of A Mouse
A mouse is used to open program, select icons and draw objects on the computer. The mouse pointer can change to a cursor or other shapes on a computer screen when working. The often-used mouse pointer is an arrow.

In groups ask learners to talk about the parts of a computer they have ever seen.

Show the computer mouse to them and ask them to observe critically and describe it.

Learners discuss and point out parts of the mouse and call out the name of the parts pointed.

The parts of a computer mouse are; left button (left-click), right button(right-click), scroll wheel (nub) and the body of the mouse.

Guide learners to demonstrate how to use the mouse e.g. the left button and perform single and double clicks in a game exercise.

1. Revise the previous knowledge on parts of computer.

2. Guide learners to identify the parts of computer mouse. eg. Right, Left and scroll wheel.

3. Guide learners to identify the uses of the mouse button.

4. Guide learners to identify the various form of clicking.
• Single clicking
• Double clicking
• Right clicking

5. Group learners to practice single clicking, double clicking, and right clicking.

Activities to support learners
i. They should have a feel of the mouse
ii. They should draw the mouse and label it
iii. They should practice the various clicks

Evaluation Exercise
Expected Answers
(Refer to Learners Book 2, page 161 for exercises and Activities)

Exercise 1
Q1. A mouse is a computer device we use our hands to operate.
Q2. Learners are to colour a computer mouse already drawn in book.
Q3. Learners are to label a computer mouse.
Q4. A mouse is used to:
   a. open program.
   b. select icons
   c. draw objects on the computer

Suggested Homework
Draw and label a computer mouse.
Learners to draw a computer mouse and label it.

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
• What went well?
• What went badly?
• What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:
1. Tell the class what you learnt during the lesson.
2. Tell the class how you will use the knowledge acquired during the lesson.
3. Which aspect of the lesson did you not understand?
Introduction

In groups, ask learners to talk about how they get information from other parts of the country.

Points to note: through telephone, mobile phone, radio etc.

Guide learners to talk about the use of these technological tools.

Mobile phone is used to send and receive information using text messages.
Evaluation Exercise

Expected Answers
(Refer to Learners Book 2, pages 165 for exercises and Activities)

Exercise 1

Q1. Mobile phone, telephone, radio, television, sound system.

Q2. Mobile phone is used to
   a. send information
   b. receive information
   c. Text messages

A telephone is a tool used for
   a. receiving calls.
   b. making calls
   c. sending messages.

A radio is used for
   a. receiving audio information.

Activities to support learners
1. They should tell how their parents send or receive information from friends and relatives in other towns.
2. They should name the things they will use to send or receive information from friends and relatives in other towns.
3. They should draw the gadgets needed to send and receive information from the towns.
4. Write three advantage of the gadgets over travelling to those places for the information.

Suggested Homework
1. Name three sources of information in the home
2. Draw and colour two sources of information in the home

Reflections
Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:
- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task. The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking - assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:
1. Tell the class what you learnt during the lesson.
2. Tell the class how you will use the knowledge acquired during the lesson.
3. Which aspect of the lesson did you not understand?
Introduction

Information can be sent or received through various means.

In groups, learners discuss where one can send and receive information.

Points to note
Poster, road signs, newspapers, telephones calls, SMS, etc.

Discuss with learners that information is gathered through data collection e.g. newspapers or class registers.

GUIDE LEARNERS, THROUGH DEMONSTRATION, TO IDENTIFY DATA AND RECORD THEM IN THEIR BOOKS, E.G. LISTENING TO RADIO, NEWSPAPER, TALKING TO PEOPLE.

Through group work, guide learners to talk about the type of information they should pay attention to, e.g., information on their education, and parents among others.

Activities to support learners

1. They should handle newspapers and discuss their observations.
2. They should handle other communication gadgets.
3. They should design some of the communication gadgets.
4. They should draw and label some of the communication gadgets.

Evaluation Exercise

Expected Answers

(Refer to Learners Book 2, pages 170 a for exercises and Activities)

Exercise 1

Q1. Posters are writings or images on paper or mat posted on walls. They are also on notice board or billboards.

Q2. Post no bill, beware of dogs, no smoking.

Q3. Road signs are directions used on our Roads to control Traffic.

Q4. No parking, men at work, no overtaking, STOP, traffic light ahead.

Suggested Homework

Draw two communication gadgets at home. Learners answer. Eg. TV, radio, mobile phone etc.

Reflections

Teacher reflects on the following in relation to the indicator and makes informed decision in the next lessons:

- What went well?
- What went badly?
- What would you improve next time?

In thinking about or answering the above questions, the teacher should make use of those cognitive skills or strategies that increase the probability of a desirable outcome. Use thinking that is purposeful, reasoned and goal directed; the kind of thinking involved in solving problems, formulating inferences, calculating likelihoods, and making decisions when the teacher is using skills that are thoughtful and effective for the particular context and type of thinking task.

The teacher should also analyze and make judgments about what has happened or been taught.

Also, learners should be aware of and control their learning by actively participating in reflective thinking- assessing what they know, what they need to know, and how they bridge that gap during learning situations.

Ask learners to do the following by way of reflecting on the lesson:

i. Tell the class what you learnt during the lesson
ii. Tell the class how you will use the knowledge acquired during the lesson
iii. Which aspect of the lesson did you not understand?

Ask learners to do the following by way of reflecting on the lesson:
A
Abilities: talents, skills, or proficiencies in a particular area.
Agricultural Tools: **Agricultural tools** are instruments we use in the farm to aid us in farm work, thereby making it easy.
Apologies: regretful acknowledgements of an offence or failure
Apologise: express regret for something that one has done wrong.
Appreciate: recognize the full worth of something.
Atmosphere: the envelope of gases surrounding the earth or another plane
Attitudes: ways of thinking or feeling about something
Attribute: a quality or feature regarded as a characteristic or inherent part of someone or something.

B
Behaviours: the way in which one acts or conducts oneself, especially towards others.
Beliefs: acceptance that somethings exist or is true, especially one without proof.
Boundaries: lines which marks the limits of an area; a dividing line
Bulk: the mass or size of something large.

C
Celebrate: acknowledge (a significant or happy day or event) with a social gathering or enjoyable activity.
Character: the mental and moral qualities distinctive to an individual.
Chores: routine tasks, especially a household one
Christianity: the religion based on the person and teachings of Jesus Christ, or its beliefs and practices
Clouds: a visible mass of condensed watery vapour floating in the atmosphere, typically high above the general level of the ground.
Coat of Arm: A coat of arms is a heraldic visual design on an escutcheon, surcoat, or tabard.
Commanded: give an authoritative or peremptory order
Commandment: a divine rule, especially one of the Ten Commandments
Commitment: the state or quality of being dedicated to a cause, activity,
Complicated: consisting of many interconnecting parts or elements; intricate
Components: a part or element of a larger whole, especially a part of a machine or vehicle
Conscious: aware of and responding to one’s surroundings
Conserve: protect (something, especially something of environmental or cultural importance) from harm or destruction.
Contribute: give (something, especially money) in order to help achieve or provide something.
Courteous: polite, respectful, or considerate in manner.
Crop Farming: **Crop farming** can refer to a business or enterprise in which an agri-entrepreneur ventures in the commercial **production** of agricultural **crops**.
Curfew: a regulation requiring people to remain indoors between specified hours, typically at night.

D
Devotion: love, loyalty, or enthusiasm for a person or activity.
Disease: a disorder of structure or function in a human, animal, or plant, especially one that produces specific symptoms or that affects a specific location and is not simply a direct result of physical injury.
Disperse: distribute or spread over a wide area
Displayed: of information) shown on a computer screen or other device.
**Electronics:** the branch of physics and technology concerned with the design of circuits using transistors and microchips, and with the behaviour and movement of electrons in a semiconductor, conductor, vacuum, or gas.

**Encourage:** give support, confidence, or hope to (someone).

**Energy:** power derived from the utilization of physical or chemical resources, especially to provide light and heat or to work machines.

**Errands:** a short journey undertaken in order to deliver or collect something, especially on someone else’s behalf.

**Exaggerated:** regarded or represented as larger, better, or worse than in reality.

**Fellowship:** friendly association, especially with people who share one’s interests.

**Freezing:** the freezing point of water (0°C).

**Functions:** an activity that is natural to or the purpose of a person or thing.

**Fundamental:** forming a necessary base or core; of central importance.

**Garden:** piece of ground adjoining a house, in which grass, flowers, and shrubs may be grown.

**Globe:** the earth.

**Hadith:** a collection of traditions containing sayings of the prophet Muhammad which, with accounts of his daily practice (the Sunna), constitute the major source of guidance for Muslims apart from the Koran.

**Harvest:** the process or period of gathering in crops.

**Honour:** high respect; great esteem.

**Humidity:** a quantity representing the amount of water vapour in the atmosphere or in a gas.

**Hurt:** cause pain or injury to.

**Impact:** the action of one object coming forcibly into contact with another.

**Interact:** act in such a way as to have an effect on each other.

**Keyboarding Skills:** Keyboarding skills are a set of skills required to operate a keyboard smoothly while typing.
ESSENTIAL Our World and Our People is an integrated subject that brings together facts, ideas and concepts from interrelated subjects of the Social Sciences.

ESSENTIAL Our World and Our People Primary Book 2 meets the full requirements of the current New Standards-based curriculum by the National Council for Curriculum and Assessment (NaCCA) with a problem-solving approach to learning. It provides full coverage of all indicators outlined in the curriculum.

The Teacher’s Guide offers the approaches, methods, strategies, and appropriate relevant teaching and learning resources to ensure that every learner benefits from the teaching and learning process. A variety of resources (low or no cost) are provided for use in your lessons.

Each theme in the Learner’s Book contains activities that will help your learners achieve the objectives of that theme. They are designed to develop a range of skills and you can adapt individual tasks to the needs of each learner. You will need additional activities to broaden the learning experience, some tailored to the needs of more or less able learners and others to add variety and depth to various topics.

• Helpful links have been provided to help the teacher find and acquire additional knowledge to help the learners.
• Answers to all exercises in the Learner’s Book have been provided.

ESSENTIAL, your guarantee of success!
